

AAMI Consensus Report

Basic Introduction to the
IEC 60601 Series

AAMI CR500:2019

Basic Introduction to the IEC 60601 Series

Approved December 2019 by
AAMI

Abstract: This document provides information regarding concepts and principles that underlie the IEC 60601 series of standards. (The IEC 60601 series is defined in the Introduction.) This document is intended to clarify and to point out the importance of the series as well as to provide guidance to understanding and to implementing the series.

Key Words electromedical equipment, medical electrical equipment, medical electrical systems, basic safety, essential performance, risk management

AAMI Consensus Report

A consensus report (CR) is a publication of the Association for the Advancement of Medical Instrumentation (AAMI) developed to provide concise, prompt and practical guidance on narrowly focused topics of high importance to the health technology community. A Consensus Report is intended provide initial consensus guidance in response to an urgent/immediate need for guidance in the following instances:

- While more robust data/information develops on emergent areas
- When variation in the development, implementation or use of a product or process exists
- When existing standards or other documents require additional context/clarification

A Consensus Report is not subject to the same formal process as a standard and while similar in nature to a technical information report (TIR), a CR is based on the collective knowledge and experience of a selected group of stakeholders and has not undergone the wider reviews of a TIR or standard, and offers an even greater response time.

CAUTION NOTICE: This AAMI CR may be revised or withdrawn at any time. Because it addresses a rapidly evolving field or technology, readers are cautioned to ensure that they have also considered information that may be more recent than this document.

All standards, technical information reports, consensus reports and other types of technical documents developed by AAMI are *voluntary*, and their application is solely within the discretion and professional judgment of the user of the document. Occasionally, voluntary technical documents are adopted by government regulatory agencies or procurement authorities, in which case the adopting agency is responsible for enforcement of its rules and regulations.

Comments on this technical information report are invited and should be sent to AAMI, Attn: Standards Department, 901 N. Glebe Rd, Suite 300, Arlington, VA 22203.
