REVISED AMERICAN NATIONAL STANDARD/AMERICAN DENTAL ASSOCIATION STANDARD NO. 127 FOR DYNAMIC LOADING TEST FOR ENDOSSEOUS DENTAL IMPLANTS

The ADA Standards Committee on Dental Products (SCDP) has approved ANSI/ADA Standard No. 127 for Dynamic Loading Test for Endosseous Dental Implants. This and other standards for dental materials, instruments and equipment are being formulated by working groups of the ADA SCDP. The Committee has representation from all interests in the United States in the standardization of materials, instruments and equipment in dentistry. The Committee has adopted the standards, showing professional recognition of their usefulness in dentistry, and has forwarded them to the American National Standards Institute with a recommendation that the standards be approved as American National Standards. The American National Standards Institute granted approval of ADA Standard No. 127 as an American National Standard on May 18, 2018.

The ADA Standards Committee on Dental Products thanks the officers of SCDP Subcommittee 8 on Dental Implants and the organizations with which they were affiliated at the time the standard was developed:

Floyd Larson (chairman), PaxMed International, Carlsbad, CA; and

Jack Lemons, University of Alabama, Birmingham, AL.

REVISED AMERICAN NATIONAL STANDARD/AMERICAN DENTAL ASSOCIATION STANDARD NO. 127 FOR DYNAMIC LOADING TEST FOR ENDOSSEOUS DENTAL IMPLANTS

FOREWORD

(This Foreword does not form a part of the revised ANSI/ADA Standard No. 127 for Dynamic Loading Test for Endosseous Dental Implants).

This standard is an identical adoption of ISO 14801:2016, Dentistry – Implants – Dynamic loading test for endosseous dental implants. ADA SCDP Subcommittee 8 on Dental Implants examined the international standard and found it acceptable for identical adoption as ANSI/ADA Standard No. 127. This revision cancels and replaces ADA Standard No. 127:2012.
