

RATIFICACIÓN DE DOCUMENTOS EUROPEOS ENERO 2016

HOJA DE ANUNCIO

En cumplimiento del punto 11.2.6.4 de las Reglas Internas de CEN/CENELEC Parte 2, se ha otorgado el rango de norma española al Documento Europeo siguiente:

Documento Europeo	Título	Fecha de Disponibilidad
EN 1539:2015	Secadoras y hornos en los que se desprenden sustancias inflamables. Requisitos de seguridad (Ratificada por AENOR en enero de 2016.)	2015-10-07

Este anuncio causará efecto a partir del primer día del mes siguiente al de su publicación en la revista UNE. La correspondiente versión oficial de este documento se encuentra disponible en la sede de AENOR, Calle Génova 6, 28004 MADRID.

English Version

Dryers and ovens, in which flammable substances are released - Safety requirements

Séchoirs et fours dans lesquels se dégagent des substances inflammables - Prescriptions de sécurité

Trockner und Öfen, in denen brennbare Stoffe freigesetzt werden - Sicherheitsanforderungen

This European Standard was approved by CEN on 27 June 2015.

CEN members are bound to comply with the CEN/CENELEC Internal Regulations which stipulate the conditions for giving this European Standard the status of a national standard without any alteration. Up-to-date lists and bibliographical references concerning such national standards may be obtained on application to the CEN-CENELEC Management Centre or to any CEN member.

This European Standard exists in three official versions (English, French, German). A version in any other language made by translation under the responsibility of a CEN member into its own language and notified to the CEN-CENELEC Management Centre has the same status as the official versions.

CEN members are the national standards bodies of Austria, Belgium, Bulgaria, Croatia, Cyprus, Czech Republic, Denmark, Estonia, Finland, Former Yugoslav Republic of Macedonia, France, Germany, Greece, Hungary, Iceland, Ireland, Italy, Latvia, Lithuania, Luxembourg, Malta, Netherlands, Norway, Poland, Portugal, Romania, Slovakia, Slovenia, Spain, Sweden, Switzerland, Turkey and United Kingdom.

Annex A (normative) Basis for air flow calculation of chamber dryers and continuous flow dryers.....	50
A.1 Calculation basis for chamber dryers	50
A.1.1 General	50
A.1.2 Calculation of chamber dryers in case of rapid evaporation - Method A	50
A.1.3 Determination in case of slow evaporation – Method B.....	54
A.2 Calculation basis for continuous flow dryers	55
Annex B (informative) Examples of calculation	57
B.1 Chamber dryers.....	57
B.1.1 Example 1: Calculation of the required minimum exhaust flow (see 3.20)	57
B.1.2 Example 2: Calculation of the maximum admissible amount of varnish.....	58
B.2 Continuous flow dryers	60
B.2.1 Example 3: Calculation of the minimum exhaust flow rate	60
B.2.2 Example 4: Calculation of the minimum exhaust flow rate	62
B.2.3 Example 5: Calculation of the maximum admissible throughput of flammable substances	63
Annex C (normative) Concentration measurement in dryers	65
C.1 Measurement of flammable substances	65
C.1.1 General	65
C.1.2 Requirements for concentration monitoring systems.....	65
C.2 Monitoring of oxygen concentration	66
C.2.1 General	66
C.2.2 Requirements for oxygen monitoring systems.....	66
Annex D (normative) Calculation of the lower explosion limit at drying temperature	68
D.1 General	68
D.2 Influence of temperature on the indicated value of concentration (physical influence).....	68
D.3 Influence of the temperature of mixture on the kinetics of reaction (chemical influence).....	69
D.4 Consideration of chemical and physical influences	69
Annex E (normative) Explosion reliefs	70
Annex F (informative) Sensors for measurement of the volume flow	71
F.1 Pitot-static tubes.....	71
F.2 Venturi nozzles.....	71
F.3 Wind vanes and plate anemometers	71
F.4 Hot-wire anemometers.....	71
F.5 Ultrasonic anemometers.....	71
F.6 Windmill anemometer.....	72

Annex G (normative)	Requirements for energy-efficiency and reduction of environmental impact.....	73
G.1	General.....	73
G.2	Acquisition.....	73
G.3	Production	73
G.4	Use	73
G.4.1	General.....	73
G.4.2	Energy usage	73
G.4.3	Minimizing of emissions to air	74
G.4.4	Minimizing of noise emissions	74
G.5	End of Life.....	74
Annex H (informative)	Guide for implementation of control system requirements for explosion protection for type A dryers	75
H.1	General.....	75
H.2	Example for chamber dryer	76
H.3	Example for continuous flow dryer	77
Annex ZA (informative)	Relationship between this European Standard and the Essential Requirements of EU Directive 2006/42/EC	80
Bibliography.....		81

European foreword

This document (EN 1539:2015) has been prepared by Technical Committee CEN/TC 271 "Surface treatment equipment - Safety", the secretariat of which is held by DIN.

This European Standard shall be given the status of a national standard, either by publication of an identical text or by endorsement, at the latest by April 2016, and conflicting national standards shall be withdrawn at the latest by April 2016.

This document supersedes EN 1539:2009.

This document has been prepared under a mandate given to CEN by the European Commission and the European Free Trade Association, and supports essential requirements of the EU Directive 2006/42/EC.

For relationship with the EU Directive, see informative Annex ZA, which is an integral part of this document.

This European Standard is part of a series of standards in the area of safety for development and construction of machines and plants for the coating of surfaces with organic substances (paints, lacquers and similar products).

This European Standard was prepared with contribution of the following TCs:

- TC 186 "Industrial thermoprocessing - Safety";
- TC 198 "Printing and paper machinery - Safety";
- TC 200 "Tannery machinery - Safety";
- TC 202 "Foundry machinery".

NOTE 1 Although a dryer as a whole is not subject to the ATEX Directive 94/9/EC in a formal way, this document is based on a fundamental risk assessment according to this Directive.

NOTE 2 This European Standard is based on an explosion protection concept which does not define zones for areas with potentially explosive atmosphere.

In relation to the previous version of the standard, the following main modifications have been made

- the scope has been adjusted to meet the fields of application of the standard;
- the requirements for safety related controls have been modified for clarification;
- guidance for implementation of safety related control systems has been included;
- requirements for monitoring of heating system have been implemented;
- requirements for type B dryers have been detailed;
- requirements for minimization of energy usage and environmental impact have been included.

According to the CEN/CENELEC Internal Regulations, the national standards organisations of the following countries are bound to implement this European Standard: Austria, Belgium, Bulgaria, Croatia, Cyprus, Czech Republic, Denmark, Estonia, Finland, Former Yugoslav Republic of Macedonia, France, Germany, Greece, Hungary, Iceland, Ireland, Italy, Latvia, Lithuania, Luxembourg, Malta, Netherlands, Norway, Poland, Portugal, Romania, Slovakia, Slovenia, Spain, Sweden, Switzerland, Turkey and the United Kingdom.

Introduction

This document is a type C standard as stated in EN ISO 12100.

This document is of relevance in particular for the following stakeholder group representing the market players with regard to machinery safety:

- machinery manufacturers (small, medium and large enterprises);
- health and safety bodies (regulators, accident prevention organisations, market surveillance).

The machinery concerned and the extent to which hazards, hazardous situations and hazardous events are covered are indicated in the scope of this European Standard.

When provisions of this type C standard are different from those which are stated in type A or B standards, the provisions of this type C standard take precedence over the provisions of the other standards, for machines that have been designed and built according to the provisions of this type C standard.

This European Standard deals with all significant hazards, hazardous situations and hazardous events relevant to ovens and dryers in which flammable substances are released by evaporation from and curing of coating materials.

This European Standard is only applicable to machines which are used as intended and under the conditions which are foreseeable as malfunction by the manufacturer (see Clause 4).

This European Standard is not applicable to:

- This European Standard is not applicable to machinery manufactured before the date of its publication as EN.

The following documents, in whole or in part, are normatively referenced in this document and are indispensable for its application. For dated references, only the edition cited applies. For undated references, the latest edition of the referenced document (including any amendments) applies.

EN 619, Continuous handling equipment and systems — Safety and EMC requirements for equipment for mechanical handling of unit loads

EN 746-1, Industrial thermoprocessing equipment — Part 1: Common safety requirements for industrial thermoprocessing equipment

EN 746-2, *Industrial thermoprocessing equipment - Part 2: Safety requirements for combustion and fuel handling systems*

EN 953, *Safety of machinery — Guards — General requirements for the design and construction of fixed and movable guards*
