API RECOMMENDED PRACTICE 550
FOURTH EDITION, FEBRUARY 1980

OFFICIAL PUBLICATION

REG U S PATENT OFFICE

API recommended practices are published as an aid to standardization of methods and procedures. These recommended practices are not intended to inhibit the use of practices other than those of API nor to inhibit the purchase or production of products made to specifications other than API.

Nothing contained in any API recommended practice is to be construed as granting any right, by implication or otherwise, for the manufacture, sale, or use in connection with any method, apparatus, or product covered by letters patent nor as insuring anyone against liability for infringement of letters patent.

API recommended practices may be used by anyone desiring to do so. Every effort has been made by the Institute to assure the accuracy and reliability of the data contained in them; however, the Institute makes no representation, warranty, or guarantee in connection with the publication of API recommended practices. The Institute hereby expressly disclaims any liability or responsibility for loss or damage resulting from their use; for the violation of any federal, state, or municipal regulation with which an API recommended practice may conflict; or for the infringement of any patent resulting from the use of an API recommended practice.
