Date of Issuance: May 20, 2022

This Standard will be revised when the Society approves the issuance of a new edition.

Periodically certain actions of the ASME Y14 Committee may be published as Cases. Cases are published on the ASME website under the Y14 Committee Page at <http://go.asme.org/Y14committee> as they are issued.

Errata to codes and standards may be posted on the ASME website under the Committee Pages to provide corrections to incorrectly published items, or to correct typographical or grammatical errors in codes and standards. Such errata shall be used on the date posted.

The Y14 Committee Page can be found at <http://go.asme.org/Y14committee>. There is an option available to automatically receive an e-mail notification when errata are posted to a particular code or standard. This option can be found on the appropriate Committee Page after selecting “Errata” in the “Publication Information” section.

ASME is the registered trademark of The American Society of Mechanical Engineers.

This code or standard was developed under procedures accredited as meeting the criteria for American National Standards. The standards committee that approved the code or standard was balanced to ensure that individuals from competent and concerned interests had an opportunity to participate. The proposed code or standard was made available for public review and comment, which provided an opportunity for additional public input from industry, academia, regulatory agencies, and the public-at-large.

ASME does not “approve,” “rate,” or “endorse” any item, construction, proprietary device, or activity. ASME does not take any position with respect to the validity of any patent rights asserted in connection with any items mentioned in this document, and does not undertake to insure anyone utilizing a standard against liability for infringement of any applicable letters patent, nor does ASME assume any such liability. Users of a code or standard are expressly advised that determination of the validity of any such patent rights, and the infringement of such rights, is entirely their own responsibility.

Participation by federal agency representatives or persons affiliated with industry is not to be interpreted as government or industry endorsement of this code or standard.

ASME accepts responsibility for only those interpretations of this document issued in accordance with the established ASME procedures and policies, which precludes the issuance of interpretations by individuals.

No part of this document may be reproduced in any form,
in an electronic retrieval system or otherwise,
without the prior written permission of the publisher.

B-2	Sample Die-Cast Part Drawing	50
C-1	Form and Proportion of Symbols	51
D-1	Movable Target Symbol	52
D-2	End-Item Method	53

FOREWORD

This is a revision of ASME Y14.8-2009 (R2014), Castings, Forgings, and Molded Parts. Based on guidance from the ASME Y14 Committee, the material formerly in [Section 1](#) has been reorganized into [Sections 1](#) through [3](#), and the subsequent Sections have been renumbered. The scope of the Standard has expanded to include full feature concepts as a result of draft. Changes to both the text and figures have been made to better illustrate drafting practices pertaining to drawings of cast, forged, and molded parts.

Figures for plus draft, minus draft, and draft included have been improved. A new symbol for full feature has been created, and figures have been added to show application of the full feature symbol. Customized datum references are shown to demonstrate control of specific degrees of freedom due to process variations, such as mismatch and die closure. The effect of applying profile of a surface with datum references to surfaces containing datum targets is continued for the increased use of form tolerancing in model-based computer-aided design (CAD) systems. Text and figures have been revised to reflect these changes.

The successful revision of this Standard is attributed to the commitment of the committee members and the support of their sponsoring companies. Their time commitment and their contributed expertise are gratefully acknowledged. Don E. Day, former chair of the ASME Y14.8 Subcommittee, is acknowledged for his tireless leadership, commitment, and knowledge, which have made this revision possible.

This Standard was approved by the American National Standards Institute as an American National Standard on March 17, 2022.

ASME Y14 COMMITTEE

Engineering Product Definition and Related Documentation Practices

(The following is the roster of the Committee at the time of approval of this Standard.)

STANDARDS COMMITTEE OFFICERS

J. B. Hoskins, *Chair*
J. D. Meadows, *Vice Chair*
F. Constantino, *Secretary*

STANDARDS COMMITTEE PERSONNEL

A. R. Anderson , Dimensional Dynamics, LLC	W. A. Kaba , Spirit AeroSystems, Inc.
T. Bowers , Lockheed Martin	A. Krulikowski , Krulikowski Consulting, LLC
J. Burleigh , Unaffiliated	S. Lege , U.S. Army
F. Constantino , The American Society of Mechanical Engineers	E. F. McCarthy , E. F. McCarthy Consulting, Inc.
W. Cockrell , Raytheon Technologies	P. J. McCuistion , Multimac DMS
D. O. Coon , Applied Geometrics, Inc.	J. D. Meadows , James D. Meadows and Associates, Inc.
R. Courson , SAE International	M. E. Meloro , Northrop Grumman Corp.
K. Dobert , Siemens PLM Software	J. Michalowicz , Stryker Corp.
P. Drake , MechSigma Consulting, Inc.	J. I. Miles , Technical Consultants, Inc.
B. Fischer , TDP360, LLC	H. W. Oakes , U.S. Air Force (University of Dayton Research Institute)
S. Hauger , Deere and Co.	K. E. Wiegandt , Consultant
J. B. Hoskins , Boeing Co.	B. A. Wilson , Consultant
J. Houck , Woodward, Inc.	E. Zwettler , Sigmetrix
R. Jensen , Hexagon Manufacturing Intelligence	J. Scheibel , <i>Alternate</i> , Boeing Co.

SUBCOMMITTEE 8 — CASTINGS, FORGINGS, AND MOLDED PARTS

J. Houck , <i>Chair</i> , Woodward, Inc.	M. Long , Tec-Ease, Inc.
B. Lumb , <i>Vice Chair</i> , Werfen	E. F. McCarthy , E. F. McCarthy Consulting, Inc.
N. W. Cutler , Dimensional Management, Inc.	P. J. McCuistion , Multimac DMS
E. R. Evans, Jr. , Pennsylvania State University, Erie — The Behrend College	S. D. Pruss , General Motors, Retired
R. J. Hoyt , Consultant	T. Raffelson , Pace Industries
D. E. Jakstis , Spirit AeroSystems, Inc.	J. A. Rivers , Rivers Precision, LLC
K. Kiehl , AGCO Corp.	P. Van de Bogert , Sub-Zero Group, Inc.
	D. Watts , Validate-3D
