BUILDERS HARDWARE MANUFACTURERS ASSOCIATION, INC.

AMERICAN NATIONAL STANDARDS INSTITUTE
Approved December 23, 2015

AMERICAN NATIONAL STANDARD

An American National Standard implies a consensus of those substantially concerned with its scope and provisions. An American National Standard is intended as a guide to aid the manufacturer, the consumer and the general public. The existence of an American National Standard does not in any respect preclude anyone, whether he has approved the standard or not, from manufacturing, marketing, purchasing, or using products, processes, or procedures not conforming to the standard. American National Standards are subject to periodic review and users are cautioned to obtain the latest editions.

CAUTION NOTICE: This American National Standard is permitted to be revised or withdrawn at any time. The procedures of the American National Standards Institute require that action be taken to reaffirm, revise or withdraw this standard no later than five years from the date of publication. Purchasers of American National Standards receive current information on all standards by calling or writing the American National Standards Institute.

This standard was first published December 1969 by the Builders Hardware Manufacturers Association, Inc. It was entitled, "Standard 1001 BHMA Product Standards Section J, Architectural Door Trim." This Standard was approved by ANSI under the Canvass Method. BHMA was accredited on 21 March 1983 as a sponsor using the Canvass Method.

FOREWORD (This Foreword is not a part of ANSI/BHMA A156.6)

The general classification of builders hardware includes a wide variety of items which are divided into several categories. To recognize this diversity, a sectional classification system has been established. Architectural Door Trim is one such section and this Standard is a result of the collective efforts of members of the Builders Hardware Manufacturers Association, Inc. who manufacture this product. The total Product Standards effort is, therefore, a collection of sections, each covering a specific category of items.

Performance tests and, where it has been necessary, material and dimensional requirements have been established to insure safety and stability to which the public is entitled. There are no restrictions on design except for those dimensional requirements imposed for reasons given above.

The BHMA recognizes that errors will be found, items will become obsolete, and new products, methods and materials will be developed. With this in mind, the Association plans to update, correct and revise these Standards on a regular basis.

The BHMA numbers which indicate types and functions of hardware do not identify size, finish, material or design and are not intended to be used without necessary supplementary information. Users of this Standard who require a specific design for a product type should describe it, using generic terms or the manufacturer's name and description of the product desired.

TABLE OF CONTENTS

1. SCOPE	5
2. DEFINITIONS	5
3. GENERAL	5
4. PRODUCT CATEGORY J100 - DOOR PROTECTION PLATES	6
5. PRODUCT CATEGORY J200 - DOOR EDGINGS	7
6. PRODUCT CATEGORY J300 - PUSH PLATES	8
7. PRODUCT CATEGORY J400 - DOOR PULLS AND PUSH/PULL UNITS	9
8. PRODUCT CATEGORY J500 - PUSH BARS AND PULL BARS	11
9. FINISH TESTS	13
APPENDIX A (NOT A PART OF ANSI/BHMA A156.6)	15
