Thank you for ordering the *Outside Plant Design Reference Manual*, 6th edition, 2018. Please place the chapter tabs and appendix tabs in front of the title page for each chapter and appendix.

The section tabs should be inserted in front of the following pages:

Chapter 4: Pathways and Spaces

4-11	Section 1: Underground Pathways
4-77	Section 2: Direct-Buried Pathways
4-95	Section 3: Aerial Pathways
4-213	Section 4: Spaces

This publication is not a single source document but a compendium of many sources of information and communications technology (ICT) industry-related practices, processes, and procedures.

The information contained in this publication includes, but is not limited to, national and international codes, de jure and de facto standards, and industry-accepted best practices. All source information can be found in Appendix A: Codes, Standards, Regulations, and Organizations and the Bibliography section of this publication.

BICSI® recommended best practices are industry established best practices and not specifically developed by BICSI. When necessary, BICSI will select and recommend widely used and acceptable methods for the performance of a particular task or process based on numerous factors, including, but not limited to, widespread field acceptance, manufacturer's recommended methods, and safety.

WARNING

It is the responsibility of the user of this publication to determine the use of the applicable safety and health practices (e.g., in the United States, Occupational Safety and Health Administration [OSHA], National Electrical Code® [NEC®], National Electrical Safety Code® [NESC®]) associated with ICT installation and design practices. BICSI shall not be liable to the purchaser or any other entity with respect to any liability, loss, or damage caused directly or indirectly by application or use of this publication. No project is so important nor any completion deadline so critical to justify nonconformance to ICT industry standards. This publication does not address safety issues associated with its use. It is the ICT industry professional's responsibility to use established and appropriate safety and health practices and to determine the applicability of all regulatory issues.

advancing the information and communications technology community

The *OSPDRM* 6th edition truly is the latest and greatest. As the next progression in updated content, it's easy to see why this edition is the latest, but it is thanks to the efforts of the outstanding *OSPDRM* 6th Edition Revision Team that it can be called the greatest. This group of incredibly talented people took on this monumental task knowing that much has changed in our industry, and demonstrated these changes by aligning the manual with the updated Job Task Analysis (JTA).

The JTA defines the knowledge and skills that designers need to effectively perform their jobs in the OSP industry. In order to ensure a thorough review, BICSI chose to ask individuals that hold the OSP Designer credential to provide input into this process. This survey resulted in the identification of more than 900 OSP designer tasks, and it was the *OSPDRM* 6th Edition Revision Team's responsibility to address these items in the new revision.

This final, most difficult task was to determine if the proposed content of the new *OSPDRM* 6th edition sufficiently addressed each and every one of these JTA items.

Needless to say, not all were covered sufficiently enough. That required the revision team to go back into the manual. Once again, the team responded and was able to sufficiently address the remaining items, ensuring that all of the material in this new manual is the information students will need to be first-class OSP Designers.

After 54 years in the telecommunications business, I've learned about our industry and I've learned even more about identifying great people and great accomplishments. I can tell you with certainty that the *OSPDRM* 6th edition is the greatest OSP document in the world because it was created by great people with an unparalleled level of knowledge and dedication. The combined experience of all who participated in the Editorial Review alone was a remarkable 488 years! One can only imagine what the combined experience of everyone on the revision team was! On the following pages you can see just how many dedicated team members worked on this fine publication.

My heartfelt thanks to the entire *OSPDRM* 6th Edition Revision Team.

Sincerely,

John C. Adams, RCDD, OSP

Acknowledgments

BICSI's Technical Information and Methods (TI&M) Committee serves to coordinate the information within all of BICSI's technical publications. BICSI officers, membership, and Technical Publications & Design staff wish to thank the following dedicated TI&M Subject Matter Experts (SMEs) who provided the key expertise required for the development of the *Outside Plant Design Reference Manual (OSPDRM)* 6th edition technical content:

TI&M Chair: Michael A. Collins, RCDD, RTPM; AT&T

TI&M Vice-Chair: Robert B. Hertling Jr., RCDD, OSP; Parsons

Transportation Group

TI&M Secretary: Robert Y. Faber Jr., RCDD, NTS; Atras Network

Communications

Subject Matter Team Leader (SMETL): John C. Adams, RCDD, OSP; Adams Telecomm

Contributing SMEs:

Chapter 1 Chapter SMETL: John C. Adams, RCDD, OSP, Adams Telecomm

Introduction to Outside

Plant

SME Contributor: Robert (Bob) Erickson, RCDD, OSP, NTS, WD,
