

BSI Standards Publication

Information technology — Implementation and operation of customer premises cabling

Part 3: Testing of optical fibre cabling

National foreword

This British Standard is the UK implementation of ISO/IEC 14763-3:2014+A1:2018, incorporating corrigendum March 2015. It supersedes BS ISO/IEC 14763-3:2006+A1:2009, which is withdrawn.

The start and finish of text introduced or altered by amendment is indicated in the text by tags. Tags indicating changes to IEC text carry the number of the IEC amendment. For example, text altered by IEC amendment A1 is indicated by A1 A1.

The start and finish of text introduced or altered by corrigendum is indicated in the text by tags. Text altered by IEC corrigendum March 2015 is indicated in the text by AC1 AC1.

The UK participation in its preparation was entrusted to Technical Committee TCT/7/1, Telecommunications - Installation requirements - Cabling infrastructure, design, planning and commissioning.

A list of organizations represented on this committee can be obtained on request to its secretary.

This publication does not purport to include all the necessary provisions of a contract. Users are responsible for its correct application.

CONTENTS

FOREWORD.....	6
INTRODUCTION.....	8
1 Scope.....	9
2 Normative references	9
3 Terms, definitions and abbreviations	10
3.1 Terms and definitions.....	10
3.2 Abbreviations.....	13
3.3 Symbols.....	13
4 Conformance.....	14
5 General requirements	14
5.1 Test system	14
5.2 Reference measurement and calibration	15
5.3 Environmental conditions	15
5.3.1 Protection of transmission and terminal equipment	15
5.3.2 Inspecting and cleaning connectors	15
5.3.3 Use of test equipment.....	15
5.3.4 Relevance of measurement	16
5.3.5 Treatment of marginal test results.....	16
5.4 Documentation.....	16
6 Test equipment.....	16
6.1 Light source and power meter	16
6.1.1 General	16
6.1.2 Light sources	16
6.1.3 Power meters	17
6.1.4 Test system stability (ffs)	17
6.2 OTDR	17
6.2.1 General	17
6.2.2 OTDR characterization using a launch test cord and a tail test cord.....	18
6.3 Test cords and adapters	18
6.3.1 Connecting hardware at test interfaces	18
6.3.2 Reference connector requirements	19
6.3.3 Test cords	20
6.4 MMF launched modal distribution.....	22
6.5 SMF launch condition.....	22
7 Inspection equipment.....	22
8 Cabling under test – Channels and permanent links	23
8.1 General.....	23
8.2 Reference planes.....	23
8.3 Wavelength of measurement.....	24
8.4 Direction of measurement	24
9 Testing of installed cabling	25
9.1 Attenuation	25
9.1.1 LSPM	25
9.1.2 OTDR	29

9.2	Propagation delay	31
9.2.1	Test method	31
9.2.2	Treatment of results	32
9.3	Length	32
9.3.1	Test method	32
9.3.2	Measurement uncertainty	32
9.3.3	Treatment of results	32
10	Testing of cabling components within installed cabling	33
10.1	Attenuation of optical fibre cable	33
10.1.1	Test method	33
10.1.2	Measurement uncertainty	33
10.1.3	Treatment of results	33
10.2	Attenuation of local and remote test interfaces	34
10.2.1	Test method	34
10.2.2	Test system measurement uncertainty	34
10.2.3	Treatment of results	35
10.3	Attenuation of connecting hardware	36
10.3.1	Test method	36
10.3.2	Treatment of results	36
10.4	Return loss of connecting hardware	37
10.4.1	Test method (in accordance with IEC 61300-3-6, method 2)	37
10.4.2	Treatment of results	38
10.4.3	Measurement uncertainty	39
10.5	Optical fibre length	39
10.5.1	Test method	39
10.5.2	Measurement uncertainty	41
10.5.3	Treatment of results	41
10.6	Attenuation of cords	41
10.6.1	Test method	41
10.6.2	Treatment of results	42
11	Inspection of cabling and cabling components	42
11.1	Optical fibre continuity	42
11.2	Cabling polarity	42
11.3	Optical fibre cable length	42
11.4	Inspection of optical fibre end faces	43
11.5	Optical fibre core size	43
Annex A (normative) Launch modal conditions for testing multimode optical fibre cabling		44
Annex B (normative) Visual inspection criteria for connectors		45
B.1	Specifies optical fibre cabling interfaces	45
B.2	The inspection equipment	45
B.3	Return loss requirements for cabling interfaces	46
B.3.1	General	46
B.3.2	Multimode cylindrical and rectangular ferrules (20 dB return loss)	46
B.3.3	Single mode PC cylindrical ferrules (35 dB return loss)	48
B.3.4	Single-mode APC cylindrical and rectangular ferrules (60 dB return loss)	49
Annex C (informative) Optical time domain reflectometry		52
C.1	Operational capability	52
C.1.1	Effective characterization	52
C.1.2	Dynamic range	52

C.1.3	Pulse width	52
C.1.4	Integration or sample count	52
C.2	Limitations of OTDR capability	53
C.2.1	Minimum lengths of operation – Attenuation dead zone	53
C.2.2	Ghosting	54
C.2.3	Effective group index of refraction	55
C.2.4	Backscattering coefficient	55
Annex D (normative)	Inspection and testing of test and substitution test cords	56
D.1	General requirements	56
D.2	Attenuation (test and substitution test cord reference connections)	56
Annex E (informative)	Enhanced three-test-cord and one-test-cord reference methods for link and channel attenuation	58
E.1	Reference methods for link attenuation	58
E.2	One-test-cord method link attenuation	58
E.2.1	General	58
E.2.2	Test method	58
E.3	Enhanced three-test-cord reference method for link attenuation	59
E.3.1	General	59
E.3.2	Test method	59
Annex F (informative)	Quality planning	61
F.1	Inspection and test schedules	61
F.2	Stage 1 inspection and testing	61
F.3	Stage 2 testing	61
F.3.1	Basic test group	61
F.3.2	Extended test group	62
Annex G (informative)	Examples of calculations of channel and permanent link limits	63
G.1	Channel measurement	63
G.2	Permanent link measurement	63

INTERNATIONAL ELECTROTECHNICAL COMMISSION

**INFORMATION TECHNOLOGY – IMPLEMENTATION
AND OPERATION OF CUSTOMER PREMISES CABLING –****Part 3: Testing of optical fibre cabling**

FOREWORD

- 1) ISO (the International Organization for Standardization) and IEC (the International Electrotechnical Commission) form the specialized system for worldwide standardization. National bodies that are members of ISO or IEC participate in the development of International Standards through technical committees established by the respective organization to deal with particular fields of technical activity. ISO and IEC technical committees collaborate in fields of mutual interest. Other international organizations, governmental and non-governmental, in liaison with ISO and IEC, also take part in the work. In the field of information technology, ISO and IEC have established a joint technical committee, ISO/IEC JTC 1.
- 2) The formal decisions or agreements of IEC and ISO on technical matters express, as nearly as possible, an international consensus of opinion on the relevant subjects since each technical committee has representation from all interested IEC National Committees and ISO member bodies.
- 3) IEC, ISO and ISO/IEC Publications have the form of recommendations for international use and are accepted by IEC National Committees and ISO member bodies in that sense. While all reasonable efforts are made to ensure that the technical content of IEC, ISO and ISO/IEC publications is accurate, IEC or ISO cannot be held responsible for the way in which they are used or for any misinterpretation by any end user.
- 4) In order to promote international uniformity, IEC National Committees and ISO member bodies undertake to apply IEC, ISO and ISO/IEC publications transparently to the maximum extent possible in their national and regional publications. Any divergence between any ISO, IEC or ISO/IEC publication and the corresponding national or regional publication should be clearly indicated in the latter.
- 5) ISO and IEC do not provide any attestation of conformity. Independent certification bodies provide conformity assessment services and, in some areas, access to IEC marks of conformity. ISO or IEC are not responsible for any services carried out by independent certification bodies.
- 6) All users should ensure that they have the latest edition of this publication.
- 7) No liability shall attach to IEC or ISO or its directors, employees, servants or agents including individual experts and members of their technical committees and IEC National Committees or ISO member bodies for any personal injury, property damage or other damage of any nature whatsoever, whether direct or indirect, or for costs (including legal fees) and expenses arising out of the publication of, use of, or reliance upon, this ISO/IEC Publication or any other IEC, ISO or ISO/IEC publications.
- 8) Attention is drawn to the normative references cited in this publication. Use of the referenced publications is indispensable for the correct application of this publication.
- 9) Attention is drawn to the possibility that some of the elements of this ISO/IEC Publication may be the subject of patent rights. ISO and IEC shall not be held responsible for identifying any or all such patent rights.

International Standard ISO/IEC 14763-3 was prepared by subcommittee 25: Interconnection of information technology equipment, of ISO/IEC joint technical committee 1: Information technology.

This second edition cancels and replaces the first edition published in 2006 and its Amendment 1:2009.

This edition constitutes a technical revision.

This edition includes the following significant technical changes with respect to the previous edition:
