

Matting of insulating material for electrical purposes

ICS 13.260

National foreword

This Draft for Development is the official English language version of ENV 61111:2001.

This publication is not to be regarded as a British Standard.

It is being issued in the Draft for Development series of publications and is of a provisional nature. It was developed by CENELEC as a potential full standard but was never completed. The work has now been transferred to IEC (International Electrotechnical Commission). The CENELEC committee decided it should be published on a provisional basis, so that information and experience of its practical application may be obtained. Users are still encouraged to use BS IEC 61111:1992, *Matting of insulating material for electrical purposes*.

Comments arising from the use of this Draft for Development are requested so that UK experience can be reported to the European organization responsible for its conversion onto a European Standard. A review of this publication will be initiated 2 years after its publication by the European organization so that a decision can be taken on its status at the end of its three-year life. The commencement of the review period will be notified by an announcement in *Update Standards*.

According to the replies received by the end of the review period, the responsible BSI Committee will decide whether to support the conversion into a European Standard, to extend the life of the prestandard or to withdraw it. Comments should be sent in writing to the Secretary of BSI Technical Committee PEL/78, Tools for live working, at 389 Chiswick High Road, London W4 4AL, giving the document reference and clause number and proposing, where possible, an appropriate revision of the text.

A list of organizations represented on this committee can be obtained on request to its secretary.

Cross-references

The British Standards which implement international or European publications referred to in this document may be found in the BSI Standards Catalogue under the section entitled "International Standards Correspondence Index", or by using the "Find" facility of the BSI Standards Electronic Catalogue.

Summary of pages

This document comprises a front cover, an inside front cover, the ENV title page, pages 2 to 22, an inside back cover and a back cover.

The BSI copyright date displayed in this document indicates when the document was last issued.

This Draft for Development, having been prepared under the direction of the Electrotechnical Sector Policy and Strategy Committee, was published under the authority of the Standards Policy and Strategy Committee on 22 February 2002

Matting of insulating material for electrical purposes
(IEC 61111:1992 + corrigendum 2000, modified)

Tapis en matériau pour travaux
électriques
(CEI 61111:1992 + corrigendum 2000,
modifiée)

Matten aus Isolierendem Material für
elektrische Anwendungen
(IEC 61111:1992 + Corrigendum 2000,
modifiziert)

This European prestandard was approved by CENELEC on 2001-03-24 as a prospective standard for provisional application. The period of validity of this ENV is limited initially to three years. After two years the members of CENELEC will be requested to submit their comments, particularly on the question whether the ENV can be converted into a European Standard (EN).

CENELEC members are required to announce the existence of this ENV in the same way as for an EN and to make the ENV available promptly at national level in an appropriate form. It is permissible to keep conflicting national standards in force (in parallel to the ENV) until the final decision about the possible conversion of the ENV into an EN is reached.

CENELEC members are the national electrotechnical committees of Austria, Belgium, Czech Republic, Denmark, Finland, France, Germany, Greece, Iceland, Ireland, Italy, Luxembourg, Netherlands, Norway, Portugal, Spain, Sweden, Switzerland and United Kingdom.

Foreword

The text of the International Standard IEC 61111:1992 + corrigendum May 2000, prepared by IEC TC 78, Tools for live working, together with the common modifications prepared by the Technical Committee CENELEC TC 78, Equipment and tools for live working, was submitted to the CENELEC questionnaire and vote procedure and was approved by CENELEC as ENV 61111 on 2001-03-24.

The following date was fixed:

- latest date by which the existence of the ENV
has to be announced at national level (doa) 2001-07-01

Annexes designated "normative" are part of the body of the prestandard.

Annexes designated "informative" are given only for information.

In this prestandard, annexes A, B, C, D and ZA are normative and annexes E, F, and G are informative.

Annex ZA has been added by CENELEC.
