Summary of pages

This document comprises a front cover, an inside front cover, pages i to iv, pages 1 to 39, an inside back cover and a back cover.

Foreword

This PAS was sponsored by the UK Government's Centre for the Protection of National Infrastructure (CPNI). Its development was facilitated by BSI Standards Limited and published under licence from the British Standards Institution. It came into effect on 31 August 2013.

Acknowledgement is given to the following organizations that were involved in the development of this guide as members of the steering group.

- Allen Fencing Limited
- ATG Access
- Bavak Security Group
- Building Research Establishment (BRE)
- Centre for the Protection of National Infrastructure (CPNI)
- D.J. Goode and Associates Limited
- MFD International Limited
- MIRA Limited
- Perimeter Security Suppliers Association (PSSA)
- Transport Research Laboratory (TRL).

Acknowledgement is also given to the valuable contribution made by those organizations that reviewed the working drafts of PAS 69 and who submitted comments for consideration.

Supersession

This PAS supersedes PAS 69:2006, which will be withdrawn on publication of this PAS.

Information about this document

PAS 69 has been updated and extended in the light of recent industry developments and changes to good practice for the installation, selection and use of vehicle security barriers.

The British Standards Institution retains ownership and copyright of this PAS. BSI Standards Limited as the publisher of the PAS reserves the right to withdraw or amend this PAS on receipt of authoritative advice that it is appropriate to do so. This PAS will be reviewed at intervals not exceeding two years, and any amendments arising from the review will be published as an amended PAS and publicized in Update Standards.

This PAS is not to be regarded as a British Standard. It will be withdrawn upon publication of its content in, or as, a British Standard.

The PAS process enables a document to be rapidly developed in order to fulfil an immediate need in industry. A PAS may be considered for further development as a British Standard, or constitute part of the UK input into the development of a European or International Standard.

Relationship with other publications

PAS 68 was originally developed alongside PAS 69 and is an impact test specification for vehicle security barriers.

An international workshop agreement (IWA) is currently in development for the International Organization for Standardization (ISO) that covers similar content to PAS 68 and PAS 69. However, both PAS 68 and PAS 69 are well-established in the UK and they are being revised to meet immediate industry requirements and developments in the vehicle secure barrier (VSB) industry since their last publication.

Presentational conventions

The guidance in this standard is presented in roman (i.e. upright) type. Any recommendations are expressed in sentences in which the principal auxiliary verb is "should".

Commentary, explanation and general informative material is presented in smaller italic type, and does not constitute a normative element.

Contractual and legal considerations

This publication does not purport to include all the necessary provisions of a contract. Users are responsible for its correct application.

Compliance with a PAS cannot confer immunity from legal obligations.

Particular attention is drawn to the following specific Acts:

- The Data Protection Act 1998 [1];
- The Equality Act 2010 [2].
