

Technical drawings — General principles of presentation —

Part 50: Basic conventions for representing areas on cuts and sections

ICS 01.100.01

National foreword

This British Standard reproduces verbatim ISO 128-50:2001 and implements it as the UK national standard. It partially supersedes BS ISO 128:1982 which will be withdrawn on completion of the overall revision process for ISO 128:1982.

The International Standard, implemented by this British Standard, contains some presentational defects particularly relating to the figures, about which the UK has previously expressed some concerns but not withstanding this, the standard progressed to publication without correction of those defects. It is stressed that these are purely presentational and relate to such things as lettering heights and configuration of arrow heads, in the figures. The technical content of the standard is, however, believed to be correct and it has therefore been decided to implement the standard, unmodified, with the warning that the figures should be considered as illustrations only and that the text be used as the source of definition.

The UK participation in its preparation was entrusted to Technical Committee TDW/4, Engineering drawing, metrology, precision measurement and all related documentation, which has the responsibility to:

- aid enquirers to understand the text;
- present to the responsible international/European committee any enquiries on the interpretation, or proposals for change, and keep the UK interests informed;
- monitor related international and European developments and promulgate them in the UK.

A list of organizations represented on this committee can be obtained on request to its secretary.

Cross-references

The British Standards which implement international publications referred to in this document may be found in the BSI Standards Catalogue under the section entitled “International Standards Correspondence Index”, or by using the “Find” facility of the BSI Standards Electronic Catalogue.

A British Standard does not purport to include all the necessary provisions of a contract. Users of British Standards are responsible for their correct application.

Compliance with a British Standard does not of itself confer immunity from legal obligations.

This British Standard, having been prepared under the direction of the Consumer Products and Services Sector Committee, was published under the authority of the Standards Committee and comes into effect on 15 July 2001
