**National foreword**

This British Standard is the UK implementation of ISO 1219-2:2012. It supersedes BS ISO 1219-2:1995, which is withdrawn.

The UK participation in its preparation was entrusted to Technical Committee MCE/18, Fluid power systems and components.

A list of organizations represented on this committee can be obtained on request to its secretary.

This publication does not purport to include all the necessary provisions of a contract. Users are responsible for its correct application.

## Sommaire

|                                                                                                  |      |
|--------------------------------------------------------------------------------------------------|------|
| Avant-propos .....                                                                               | viii |
| Introduction.....                                                                                | x    |
| 1     Domaine d'application .....                                                                | 1    |
| 2     Références normatives .....                                                                | 2    |
| 3     Termes et définitions .....                                                                | 3    |
| 4     Règles générales .....                                                                     | 3    |
| 4.1   Présentation .....                                                                         | 3    |
| 4.2   Format .....                                                                               | 4    |
| 4.3   Disposition des dessins .....                                                              | 5    |
| 4.4   Appareils .....                                                                            | 8    |
| 5     Règles d'identification des appareils dans les circuits hydrauliques et pneumatiques ..... | 9    |
| 5.1   Code d'identification des composants et des ensembles flexibles .....                      | 9    |
| 5.1.1   Généralités .....                                                                        | 9    |
| 5.1.2   Code de groupe fonctionnel ( <u>X</u> –XX.X) .....                                       | 11   |
| 5.1.3   Code de fluide (X– <u>XX</u> .X) .....                                                   | 11   |
| 5.1.4   Numéro de circuit (X–XX. <u>X</u> ) .....                                                | 12   |
| 5.1.5   Numéro de composant (X–XX. <u>X</u> ) .....                                              | 12   |
| 5.2   Identification des orifices .....                                                          | 12   |
| 5.3   Code d'identification des réseaux de tuyauterie .....                                      | 13   |
| 5.3.1   Généralités .....                                                                        | 13   |
| 5.3.2   Numéro d'identification facultatif .....                                                 | 14   |
| 5.3.3   Informations techniques .....                                                            | 14   |
| 5.3.4   Exemples .....                                                                           | 15   |
| 5.4   Code d'application facultatif pour les réseaux de tuyauterie .....                         | 15   |
| 5.4.1   Généralités .....                                                                        | 15   |
| 5.4.2   Code de fluide .....                                                                     | 16   |
| 5.4.3   Code de conduite .....                                                                   | 17   |
| 5.4.4   Indicateur de niveau de pression .....                                                   | 17   |
| 5.4.5   Exemple .....                                                                            | 17   |
| 6     Informations techniques sur le schéma de circuit .....                                     | 18   |
| 6.1   Généralités .....                                                                          | 18   |
| 6.2   Fonction du circuit .....                                                                  | 18   |
| 6.3   Désignation des références électriques .....                                               | 18   |
| 6.4   Composants .....                                                                           | 19   |
| 6.4.1   Réservoirs, récepteurs d'air et réservoirs tampon .....                                  | 19   |
| 6.4.2   Alimentation d'air .....                                                                 | 20   |
| 6.4.3   Pompes .....                                                                             | 20   |
| 6.4.4   Dispositifs d'entraînement .....                                                         | 21   |
| 6.4.5   Distributeurs de commande directionnelle .....                                           | 21   |
| 6.4.6   Régulateurs de débit, orifices et soupapes d'étranglement non réglables .....            | 22   |
| 6.4.7   Distributeurs de commande de pression et pressostats .....                               | 22   |
| 6.4.8   Vérins .....                                                                             | 22   |
| 6.4.9   Actionneurs semi-rotatifs .....                                                          | 23   |
| 6.4.10   Moteurs .....                                                                           | 23   |
| 6.4.11   Accumulateurs .....                                                                     | 24   |
| 6.4.12   Filtres .....                                                                           | 24   |
| 6.4.13   Réseau de tuyauterie .....                                                              | 25   |
| 6.4.14   Indicateurs de niveau de fluide .....                                                   | 25   |
| 6.4.15   Indicateur de température .....                                                         | 25   |
