

CSA Z462:21 National Standard of Canada

Workplace electrical safety

Standards Council of Canada Conseil canadien des normes

Legal Notice for Standards

Canadian Standards Association (CSA) standards are developed through a consensus standards development process approved by the Standards Council of Canada. This process brings together volunteers representing varied viewpoints and interests to achieve consensus and develop a standard. Although CSA administers the process and establishes rules to promote fairness in achieving consensus, it does not independently test, evaluate, or verify the content of standards.

Disclaimer and exclusion of liability

This document is provided without any representations, warranties, or conditions of any kind, express or implied, including, without limitation, implied warranties or conditions concerning this document's fitness for a particular purpose or use, its merchantability, or its non-infringement of any third party's intellectual property rights. CSA does not warrant the accuracy, completeness, or currency of any of the information published in this document. CSA makes no representations or warranties regarding this document's compliance with any applicable statute, rule, or regulation.

IN NO EVENT SHALL CSA, ITS VOLUNTEERS, MEMBERS, SUBSIDIARIES, OR AFFILIATED COMPANIES, OR THEIR EMPLOYEES, DIRECTORS, OR OFFICERS, BE LIABLE FOR ANY DIRECT, INDIRECT, OR INCIDENTAL DAMAGES, INJURY, LOSS, COSTS, OR EXPENSES, HOWSOEVER CAUSED, INCLUDING BUT NOT LIMITED TO SPECIAL OR CONSEQUENTIAL DAMAGES, LOST REVENUE, BUSINESS INTERRUPTION, LOST OR DAMAGED DATA, OR ANY OTHER COMMERCIAL OR ECONOMIC LOSS, WHETHER BASED IN CONTRACT, TORT (INCLUDING NEGLIGENCE), OR ANY OTHER THEORY OF LIABILITY, ARISING OUT OF OR RESULTING FROM ACCESS TO OR POSSESSION OR USE OF THIS DOCUMENT, EVEN IF CSA HAS BEEN ADVISED OF THE POSSIBILITY OF SUCH DAMAGES, INJURY, LOSS, COSTS, OR EXPENSES.

CSA is a private not-for-profit company that publishes voluntary standards and related documents. CSA has no power, nor does it undertake, to enforce compliance with the contents of the standards or other documents it publishes.

Important notice and disclaimer concerning the NFPA standard from which this document has been adapted

This document is adapted by the Canadian Standards Association (CSA), from an NFPA document originally developed and promulgated by the National Fire Protection Association (NFPA). The NFPA 70E standard contained within this NFPA document in its original format, like all NFPA codes and standards, is developed through a consensus standards development process approved by the American National Standards Institute. This process brings together volunteers representing varied viewpoints and interests to achieve consensus on fire and other safety issues. While the NFPA administers the process and establishes rules to promote fairness in the development of consensus, it does not independently test, evaluate, or verify the accuracy of any information or the soundness of any judgments contained in its codes and standards. All commentary, other than the promulgated standard, has been developed by the NFPA or the CSA.

The NFPA and the CSA disclaim liability for any personal injury, property or other damages of any nature whatsoever, whether special, indirect, consequential or compensatory, directly or indirectly resulting from the publication, use of, or reliance on this document. The NFPA and the CSA also make no guaranty or warranty as to the accuracy or completeness of any information published in these documents.

In issuing and making this document available, the NFPA and the CSA are not undertaking to render professional or other services for or on behalf of any person or entity. Nor is the NFPA or CSA undertaking to perform any duty owed by any person or entity to someone else. Anyone using this document should rely on his or her own independent judgment or, as appropriate, seek the advice of a competent professional in determining the exercise of reasonable care in any given circumstances.

Neither the NFPA nor the CSA has any power, nor do they undertake, to police or enforce compliance with the contents of this document. Nor do the NFPA or CSA list, certify, test, or inspect products, designs, or installations for compliance with this document. Any certification or other statement of compliance with the requirements of these documents shall not be attributable to the NFPA or CSA and is solely the responsibility of the certifier or maker of the statement.

For additional notices and disclaimers concerning NFPA codes and standards see www.nfpa.org/disclaimers.

Intellectual property rights and ownership

This document is a derivative work adapted by the Canadian Standards Association (CSA) from NFPA 70E, *Standard for Electrical Safety in the Workplace* (2018 edition), the rights to which were licensed to CSA by the National Fire Protection Association[®]. Copyright to this document is held by the National Fire Protection Association[®]. CSA is the owner of all trademarks (except as otherwise noted to the contrary). Without limitation, the unauthorized use, modification, copying, or distribution of this document may violate laws that protect NFPA and CSA, as authorized licensee, and may give rise to a right in NFPA and/or CSA to seek legal redress for such use, modification, copying, or distribution. To the extent permitted by licence or law, CSA and the NFPA reserve all intellectual property rights in this document.

Patent rights

Attention is drawn to the possibility that some of the elements of this standard may be the subject of patent rights. CSA shall not be held responsible for identifying any or all such patent rights. Users of this standard are expressly advised that determination of the validity of any such patent rights is entirely their own responsibility.

Visit CSA Group's policy on privacy at <u>www.csagroup.org/legal</u> to find out how we protect your personal information.

Canadian Standards Association (operating as "CSA Group"), under whose auspices this National Standard has been produced, was chartered in 1919 and accredited by the Standards Council of Canada to the National Standards system in 1973. It is a not-forprofit, nonstatutory, voluntary membership association engaged in standards development and certification activities.

CSA Group standards reflect a national consensus of producers and users — including manufacturers, consumers, retailers, unions and professional organizations, and governmental agencies. The standards are used widely by industry and commerce and often adopted by municipal, provincial, and federal governments in their regulations, particularly in the fields of health, safety, building and construction, and the environment.

Individuals, companies, and associations across Canada indicate their support for CSA Group's standards development by volunteering their time and skills to Committee work and supporting CSA Group's objectives through sustaining memberships. The more than 7000 committee volunteers and the 2000 sustaining memberships together form CSA Group's total membership from which its Directors are chosen. Sustaining memberships represent a major source of income for CSA Group's standards development activities.

CSA Group offers certification and testing services in support of and as an extension to its standards development activities. To ensure the integrity of its certification process, CSA Group regularly and continually audits and inspects products that bear the CSA Group Mark.

In addition to its head office and laboratory complex in Toronto, CSA Group has regional branch offices in major centres across Canada and inspection and testing agencies in eight countries. Since 1919, CSA Group has developed the necessary expertise to meet its corporate mission: CSA Group is an independent service organization whose mission is to provide an open and effective forum for activities facilitating the exchange of goods and services through the use of standards, certification and related services to meet national and international needs.

For further information on CSA Group services, write to CSA Group 178 Rexdale Boulevard Toronto, Ontario, M9W 1R3 Canada

Standards Council of Canada Conseil canadien des normes

Cette Norme Nationale du Canada n'est disponible qu'en anglais.

Although the intended primary application of this Standard is stated in its Scope, it is important to note that it remains the responsibility of the users to judge its suitability for their particular purpose. *A trademark of the Canadian Standards Association, operating as "CSA Group"

A National Standard of Canada is a standard developed by a Standards Council of Canada (SCC) accredited Standards Development Organization, in compliance with requirements and guidance set out by SCC. More information on National Standards of Canada can be found at <u>www.scc.ca</u>.

SCC is a Crown corporation within the portfolio of Innovation, Science and Economic Development (ISED) Canada. With the goal of enhancing Canada's economic competitiveness and social wellbeing, SCC leads and facilitates the development and use of national and international standards. SCC also coordinates Canadian participation in standards development, and identifies strategies to advance Canadian standardization efforts.

Accreditation services are provided by SCC to various customers, including product certifiers, testing laboratories, and standards development organizations. A list of SCC programs and accredited bodies is publicly available at <u>www.scc.ca</u>.

Preface 9

- **1 Scope** *11*
- 1.1 General 11
- 1.2 Application 11
- 1.3 Suitability 11
- 1.4 Use with related standards and regulations 11
- 1.5 Organization of this Standard 11
- 1.6 Measurements 12
- 1.7 Terminology 12
- 2 Reference publications 12
- 3 Definitions 22

4 Safety-related work practices 32

- 4.1 General requirements for electrical-safety-related work practices and procedures 32
- 4.1.1 General 32
- 4.1.2 Purpose 32
- 4.1.3 Responsibility 33
- 4.1.4 Organization 33
- 4.1.5 Electrical safety policy 33
- 4.1.6 Electrically safe work condition 33
- 4.1.7 Electrical safety program 34
- 4.1.8 Training 38
- 4.1.9 Host and contract employers' responsibilities 41
- 4.1.10 Electrical equipment 42
- 4.1.11 Test instruments and equipment 42
- 4.1.12 Portable (cord-and-plug-connected) electric equipment 42
- 4.1.13 Ground-fault circuit interrupter (GFCI) protection 44
- 4.1.14 Overcurrent protection modification 45
- 4.2 Establishing an electrically safe work condition 45
- 4.2.1 Lockout program 45
- 4.2.2 Lockout principles 45
- 4.2.3 Lockout equipment 46
- 4.2.4 Lockout procedures 47
- 4.2.5 Process for establishing and verifying an electrically safe work condition 51
- 4.2.6 Temporary protective grounding equipment 52
- 4.3 Work involving electrical hazards 53
- 4.3.1 General 53
- 4.3.2 Energized electrical work permit 53
- 4.3.3 [Reserved for future use] 54
- 4.3.4 Shock risk assessment 54
- 4.3.5 Arc flash risk assessment 57

© 2021 Canadian Standards Association

4.3.6 [Reserved for future use] 63

- 4.3.7 Personal and other protective equipment 63
- 4.3.8 Other precautions for personnel activities 81
- 4.3.9 Work within the limited approach boundary of overhead lines 83
- 4.3.10 Underground electrical lines and equipment 84
- 4.3.11 Cutting or drilling 84
- 4.3.12 Cutting, removing, or rerouting of conductors 85

5 Safety-related maintenance requirements 86

- 5.1 General 86
- 5.2 Maintenance program 86
- 5.3 General maintenance requirements *86*
- 5.3.1 Equipment maintenance 86
- 5.3.2 Qualified persons 87
- 5.3.3 Single-line diagram 87
- 5.3.4 Identification of components 87
- 5.3.5 Identification of circuits 87
- 5.3.6 Warning signs 87
- 5.3.7 Spaces about electrical equipment 87
- 5.3.8 Grounding and bonding 87
- 5.3.9 Safety equipment 88
- 5.3.10 Life safety systems 88
- 5.3.11 Electrical cables and single and multiple conductors 88
- 5.3.12 Overhead line clearances 88
- 5.4 Specific maintenance requirements 88
- 5.4.1 Protective devices 88
- 5.4.2 Overcurrent relays 88
- 5.4.3 Fuses 89
- 5.4.4 Arc flash relays 89
- 5.4.5 Ground fault devices and systems 89
- 5.4.6 Disconnecting means 89
- 5.4.7 Capacitors 90
- 5.4.8 Control equipment 90
- 5.4.9 Equipment in hazardous locations 90
- 5.4.10 Batteries and battery rooms *90*

6 Safety requirements for special equipment 91

- 6.1 General 91
- 6.1.1 Organization of Clause <u>6</u> 91
- 6.1.2 Responsibility 91
- 6.2 Safety-related work practices for electrolytic cells *91*
- 6.2.1 General 91
- 6.2.2 Safety training 91
- 6.2.3 Worker training 91
- 6.2.4 Safeguarding of workers in the cell line working zone 92
- 6.2.5 Portable tools and equipment 95
- 6.2.6 Maintenance of electrolytic cells 96
- 6.3 Safety requirements related to batteries and battery rooms or battery enclosures 96
- 6.3.1 General 96

January 2021

© 2021 Canadian Standards Association

- 6.3.2 Safety procedures 96
- 6.3.3 Electrolyte hazards 98
- 6.3.4 Tools and equipment 98
- 6.3.5 Cell flame arresters and cell ventilation 98
- 6.4 Safety-related work practices for use of lasers 99
- 6.4.1 General 99
- 6.4.2 Hazardous energy *99*
- 6.4.3 Electrical safety training 99
- 6.4.4 Safeguarding of persons from electrical hazards associated with lasers and laser systems 99
- 6.4.5 Responsibility for electrical safety 100
- 6.5 Safety-related work practices for power electronic equipment 100
- 6.5.1 General 100
- 6.5.2 Hazards associated with power electronic equipment 100
- 6.5.3 Specific measures for personnel safety 101
- 6.6 Safety-related work requirements for research and development laboratories 101
- 6.6.1 General 101
- 6.6.2 Applicability of this Standard 102
- 6.6.3 Competent person 102
- 6.6.4 Establishment of an electrical safety authority 102
- 6.6.5 Specific measures and controls for personnel safety 102
- 6.6.6 Approval 103
- 6.6.7 Custom built, non-approved research equipment, 1000 V or less, ac or dc 103
- 6.6.8 Custom built, unlisted research equipment, greater than 1000 V, ac or dc 104
- 6.6.9 Energy thresholds 104
- 6.6.10 Establishing an electrically safe work condition 104

Annex A (informative) — Aligning implementation of this Standard with CSA Z45001 105			
Annex B (informative) — Safety-related electrical maintenance 111			
Annex C (informative) — Limits of approach 114			
Annex D (informative) — Incident energy and arc flash boundary calculation methods 118			
Annex E (informative) — Electrical safety program 126			
Annex F (informative) — Risk assessment and risk control 128			
Annex G (informative) — Sample lockout policy and program and sample general lockout procedure (individual lockout) 133			
Annex H (informative) — Guidance on selection of protective clothing and other personal protective equipment 142			
Annex I (informative) — Sample job briefing and planning checklists 147			
Annex J (informative) — Sample energized electrical work permit 151			
Annex K (informative) — General categories of electrical hazards 154			
Annex L (informative) — Typical application of safeguards in the cell line working zone 157			
Annex M (informative) — Layering of protective clothing and total system arc rating 158			
Annex N (informative) — Example of industrial procedures and policies for working within the limited approach boundary of overhead or buried electrical power lines and equipment 160			
Annex O (informative) — Safety-related design 164			
Annex P (informative) — Electrical switching and isolation 168			
Annex Q (informative) — Arc flash and shock warning equipment labels 173			
Annex R (informative) — Substation systems and equipment 176
