Foreword

This document has been developed by the Pressure Equipment Consultation Forum (PECF), Safety Assessment Federation (SAFed) and Engineering Equipment and Materials Users Association (EEMUA) in consultation with Lloyd's Register and other stakeholders within the pressure equipment industry to help designers, purchasers, installation contractors, users and other parties achieve their legal requirements to ensure pressure equipment can be correctly certified prior to use in the United Kingdom.

This document has been prepared using technical advice provided by the Health and Safety Executive (HSE).

SAFed Publication – PEDG 2 – Edition 01

EEMUA publication 245 – Edition 01

First publication - Dated: July 2021

Contents

1. Introduction	5
2. Scope	6
3. Application	8
4. Design and construction.....	9
<i>Design</i>	<i>9</i>
<i>Construction</i>	<i>10</i>
5. Provision of information and marking	11
<i>Information</i>	<i>11</i>
<i>Marking.....</i>	<i>12</i>
6. Installation	13
<i>Pressure testing.....</i>	<i>13</i>
7. Safe Operating Limits	15
8. Bibliography and References	16
9. Glossary	17
Appendix A – Worked examples of assemblies and installations.....	18
A0. A package boiler	19
The New Boiler Does Not Bear Any Conformity Marking.....	19
The End User Has Assumed The Role Of Importer	19
The System May Be Seen As A Replacement	19
The New Boiler Will Modify The Existing System And PSSR WSE	19
A1. Multiple Suppliers/Installers of an Assembly/System.....	20
Failings	22
A2. Site assembly of a pressure system	23
Main issues to consider:.....	23
Extent of original supporting paperwork for UKCA/CE manufactured component parts	23
Global Conformity Assessment	23
Remainder of pipework site manufacture and assembly	23
Written Scheme of Examination	23
