American National Standard

Approval of an American National Standard requires verification by ANSI that the requirements for due process, consensus, and other criteria for approval have been met by the standards developer.

Consensus is established when, in the judgement of the ANSI Board of Standards Review, substantial agreement has been reached by directly and materially affected interests. Substantial agreement means much more than a simple majority, but not necessarily unanimity. Consensus requires that all views and objections be considered, and that a concerted effort be made toward their resolution.

The use of American National Standards is completely voluntary; their existence does not in any respect preclude anyone, whether he has approved the standards or not, from manufacturing, marketing, purchasing, or using products, processes, or procedures not conforming to the standards.

The American National Standards Institute does not develop standards and will in no circumstances give an interpretation of any American National Standard. Moreover, no person shall have the right or authority to issue an interpretation of an American National Standard in the name of the American National Standards Institute. Requests for interpretations should be addressed to the secretariat or sponsor whose name appears on the title page of this standard.

CAUTION NOTICE: This American National Standard may be revised or withdrawn at any time. The procedures of the American National Standards Institute require that action be taken periodically to reaffirm, revise, or withdraw this standard. Purchasers of American National Standards may receive current information on all standards by calling or writing the American National Standards Institute.

	Page
Foreword	v
9.6.9 Guidelines for condition monitoring	1
9.6.9.0 Scope	1
9.6.9.0.1 Purpose	1
9.6.9.0.2 Use of this document	1
9.6.9.0.3 Monitoring and control system concepts	1
9.6.9.0.4 Monitoring interval	4
9.6.9.0.5 Control limits	5
9.6.9.1 Power monitoring	5
9.6.9.1.1 Introduction	5
9.6.9.1.2 Means of power monitoring	5
9.6.9.1.3 Power monitoring frequency	6
9.6.9.1.4 Power control limits	6
9.6.9.2 Temperature monitoring	7
9.6.9.2.1 Introduction	7
9.6.9.2.2 Means of monitoring temperature	7
9.6.9.2.3 Specific applications of temperature monitoring	7
9.6.9.2.4 Sealless pump liquid temperature	8
9.6.9.2.5 Temperature monitoring frequency	9
9.6.9.2.6 Temperature control limits	9
9.6.9.3 Leakage monitoring	9
9.6.9.3.1 Introduction	9
9.6.9.3.2 Means of monitoring leakage	9
9.6.9.3.3 Leakage monitoring frequency	10
9.6.9.3.4 Leakage control limits	10
9.6.9.4 Pressure monitoring	11
9.6.9.4.1 Introduction	11
9.6.9.4.2 Means of pressure monitoring	11
9.6.9.4.3 Pressure monitoring frequency	11
9.6.9.4.4 Pressure control limits	11
9.6.9.5 Vibration monitoring	12
9.6.9.5.1 Introduction	12
9.6.9.5.2 Means of vibration monitoring	12
9.6.9.5.3 Vibration monitoring frequency	12
9.6.9.5.4 Vibration control limits	13
9.6.9.6 Rate-of-flow monitoring	13
9.6.9.6.1 Introduction	13
9.6.9.6.2 Measuring rate of flow	13
9.6.9.6.3 Rate-of-flow monitoring frequency	13
9.6.9.6.4 Rate-of-flow control limits	13
9.6.9.7 Speed (rpm) monitoring	14
9.6.9.7.1 Introduction	14
9.6.9.7.2 Speed measurement methods	14
9.6.9.7.3 Speed monitoring frequency	14
9.6.9.7.4 Speed control limits	14

Appendix A	Condition monitoring failure modes	15
Appendix B	Condition monitoring indicators	23
Appendix C	Definitions	27
Appendix D	Index	29
