IAPMO Standard

Approval of an IAPMO Industry Standard requires verification by the Standards Review Committee that the standard has been developed in accordance with the policies and procedures for standards development (S-001, Standards Development Process, S-008, Appeals and S-011, Operation of the IAPMO Standards Review Committee). Although IAPMO administers the process and establishes rules to promote fairness in achieving consensus, it does not independently test, evaluate, or verify the content of standards.

Consensus is established when substantial agreement has been reached by directly and materially affected interests. Substantial agreement means much more than a simple majority, but not necessarily unanimity. Consensus requires that all views and objections be considered, and that a concerted effort be made toward their resolution.

The use of IAPMO Industry Standards is completely voluntary; their existence does not in any respect preclude anyone, whether they have approved the standards or not, from manufacturing, marketing, purchasing, or using products, processes, or procedures not conforming to the standards.

The Standards Review Committee has final authority on interpretation of any IAPMO Industry Standard. Moreover, no person save IAPMO designated staff shall have the right or authority to issue an interpretation of an IAPMO Industry Standard in the name of IAPMO. Requests for interpretations should be addressed to the secretariat or sponsor whose name appears on the title page of this standard.

CAUTION NOTICE: This IAPMO Industry Standard may be revised or withdrawn at any time. The policies and procedures require that action be taken periodically to reaffirm, revise, or withdraw this standard. Interested stakeholders of IAPMO Industry Standards may receive current information on all standards by signing up to receive updates and notices at the IAPMO Standards website www.IAPMOstandards.org.

Contents

Preface

IAPMO Standards Review Committee

1 Scope

- 1.1 General
- 1.2 Alternative Materials
- 1.3 Terminology
- 1.4 Units of Measurement

2 Reference Publications

3 Abbreviations

4 General Requirements

- 4.1 General
- 4.2 Dimensions and Tolerances
- 4.3 Components and Connections
- 4.4 Toxicity
- 4.5 Flow Rate for Manifolds with Flexible Connectors
- 4.6 Workmanship

5 Testing Requirements

- 5.1 Testing and Test Specimens
- 5.2 Test Specimen Pressurization
- 5.3 Tests
- 5.4 Performance Requirements

6 Markings and Accompanying Literature

- 6.1 Markings
- 6.2 Visibility
- 6.3 Model Number
- 6.4 Installation Instructions

Preface

This is the thirteenth edition of IAPMO IGC 109, Water Distribution Manifolds. This Standard supersedes IAPMO IGC 109-2017, Water Distribution Manifolds. The previous editions of this standard are: September 2017, May 2015, January 2010, July 2009, November 2006, August 2006, June 2006, March 2006, January 2003, November 2001, February 2001, August 1997

This Standard was developed by the IAPMO Standards Review Committee (SRC) in accordance with the policies and procedures regulating IAPMO industry standards development, Policy S-001, Standards Development Process. This Standard was approved as an IAPMO Industry Standard on September 09, 2019.

Notes:

- (1) The use of the singular does not exclude the plural (and vice versa) when the sense allows.
- (2) The use of IAPMO Standards is completely voluntary; their existence does not in any respect preclude anyone, whether he has approved the standards or not, from manufacturing, marketing, purchasing, or using products, processes, or procedures not conforming to the standards.
- (3) This standard was developed using an open process and in accordance with IAPMO Standards Policy S-001, Standards Development Process, which is available on the IAPMO Standards website (www.IAPMOstandards.org).
- (4) During its development, this Standard was made available for public review, thus providing an opportunity for additional input from stakeholders from industry, academia, regulatory agencies, and the public at large. Upon closing of public review, all comments received were duly considered and resolved by the IAPMO Standards Review Committee.
- (5) This Standard was developed in accordance with the principles of consensus, which is defined as substantial agreement; consensus implies much more than a simple majority, but not necessarily unanimity. It is consistent with this definition that a member of the IAPMO Standards Review Committee might not be in full agreement with all sections of this Standard.
- (6) Although the intended primary application of this Standard is stated in its scope, it is important to note that it remains the responsibility of the users of the Standard to judge its suitability for their particular purpose.
- (7) IAPMO Standards are subject to periodic review and suggestions for their improvement will be referred to the IAPMO Standards Review Committee. To submit a proposal for change to this Standard, you may send the following information to the International Association of Plumbing and Mechanical Officials, Attention Standards Department, at standards@IAPMOstandards.org or, alternatively, at 4755 East Philadelphia Street, Ontario, California, 91761, and include "Proposal for change" in the subject line:
 - (a) standard designation (number);
 - (b) relevant section, table, or figure number, as applicable;
 - (c) wording of the proposed change, tracking the changes between the original and the proposed wording; and
 - (d) rationale for the change.
- (8) Requests for interpretation should be clear and unambiguous. To submit a request for interpretation of this Standard, you may send the following information to the International Association of Plumbing and Mechanical Officials, Attention Standards Department, at standards.org or, alternatively, at 4755 East Philadelphia Street, Ontario, California, 91761, and include "Request for interpretation" in the subject line:
 - (a) the edition of the standard for which the interpretation is being requested;
 - (b) the definition of the problem, making reference to the specific section and, when appropriate, an illustrative sketch explaining the question;
 - (c) an explanation of circumstances surrounding the actual field conditions; and
 - (d) the request for interpretation phrased in such a way that a "yes" or "no" answer will address the issue.
