About the IEC

The International Electrotechnical Commission (IEC) is the leading global organization that prepares and publishes International Standards for all electrical, electronic and related technologies.

About IEC publications

The technical content of IEC publications is kept under constant review by the IEC. Please make sure that you have the latest edition, a corrigenda or an amendment might have been published.

IEC Catalogue - webstore.iec.ch/catalogue

The stand-alone application for consulting the entire bibliographical information on IEC International Standards, Technical Specifications, Technical Reports and other documents. Available for PC, Mac OS, Android Tablets and iPad.

IEC publications search - webstore.iec.ch/advsearchform

The advanced search enables to find IEC publications by a variety of criteria (reference number, text, technical committee,...). It also gives information on projects, replaced and withdrawn publications.

IEC Just Published - webstore.iec.ch/justpublished

Stay up to date on all new IEC publications. Just Published details all new publications released. Available online and also once a month by email.

Electropedia - www.electropedia.org

The world's leading online dictionary of electronic and electrical terms containing 21 000 terms and definitions in English and French, with equivalent terms in 16 additional languages. Also known as the International Electrotechnical Vocabulary (IEV) online.

IEC Glossary - std.iec.ch/glossary

67 000 electrotechnical terminology entries in English and French extracted from the Terms and Definitions clause of IEC publications issued since 2002. Some entries have been collected from earlier publications of IEC TC 37, 77, 86 and CISPR.

IEC Customer Service Centre - webstore.iec.ch/csc

If you wish to give us your feedback on this publication or need further assistance, please contact the Customer Service Centre: sales@iec.ch.

A propos de l'IEC

La Commission Electrotechnique Internationale (IEC) est la première organisation mondiale qui élabore et publie des Normes internationales pour tout ce qui a trait à l'électricité, à l'électronique et aux technologies apparentées.

A propos des publications IEC

Le contenu technique des publications IEC est constamment revu. Veuillez vous assurer que vous possédez l'édition la plus récente, un corrigendum ou amendement peut avoir été publié.

Catalogue IEC - webstore.iec.ch/catalogue

Application autonome pour consulter tous les renseignements bibliographiques sur les Normes internationales, Spécifications techniques, Rapports techniques et autres documents de l'IEC. Disponible pour PC, Mac OS, tablettes Android et iPad.

Recherche de publications IEC - webstore.iec.ch/advsearchform

La recherche avancée permet de trouver des publications IEC en utilisant différents critères (numéro de référence, texte, comité d'études,...). Elle donne aussi des informations sur les projets et les publications remplacées ou retirées.

IEC Just Published - webstore.iec.ch/justpublished

Restez informé sur les nouvelles publications IEC. Just Published détaille les nouvelles publications parues. Disponible en ligne et aussi une fois par mois par email.

Electropedia - www.electropedia.org

Le premier dictionnaire en ligne de termes électroniques et électriques. Il contient 21 000 termes et définitions en anglais et en français, ainsi que les termes équivalents dans 16 langues additionnelles. Egalement appelé Vocabulaire Electrotechnique International (IEV) en ligne.

Glossaire IEC - std.iec.ch/glossary

67 000 entrées terminologiques électrotechniques, en anglais et en français, extraites des articles Termes et Définitions des publications IEC parues depuis 2002. Plus certaines entrées antérieures extraites des publications des CE 37, 77, 86 et CISPR de l'IEC.

Service Clients - webstore.iec.ch/csc

CONTENTS

FOREWORD.....	5
INTRODUCTION.....	7
1 Scope.....	8
2 Normative references.....	8
3 Terms and definitions	9
4 System documentation requirements.....	11
4.1 General.....	11
4.2 System data.....	11
4.2.1 Basic system information.....	11
4.2.2 System designer information	11
4.2.3 System installer information	11
4.3 Wiring diagram.....	11
4.3.1 General	11
4.3.2 Array – General specifications.....	12
4.3.3 PV string information.....	12
4.3.4 Array electrical details.....	12
4.3.5 AC system	12
4.3.6 Earthing and overvoltage protection	12
4.4 String layout.....	13
4.5 Datasheets	13
4.6 Mechanical design information	13
4.7 Emergency systems	13
4.8 Operation and maintenance information.....	13
4.9 Test results and commissioning data	13
5 Verification	13
5.1 General.....	13
5.2 Inspection	14
5.2.1 General	14
5.2.2 DC system – General	14
5.2.3 DC system – Protection against electric shock.....	14
5.2.4 DC system – Protection against the effects of insulation faults	15
5.2.5 DC system – Protection against overcurrent	15
5.2.6 DC system – Earthing and bonding arrangements.....	15
5.2.7 DC system – Protection against the effects of lightning and overvoltage.....	16
5.2.8 DC system – Selection and erection of electrical equipment.....	16
5.2.9 AC system	16
5.2.10 Labelling and identification	16
5.3 Testing	17
5.3.1 General	17
5.3.2 Test regimes and additional tests	17
5.3.3 Test regimes for systems with module level electronics.....	17
5.3.4 Category 1 test regime – All systems.....	18
5.3.5 Category 2 test regime	19
5.3.6 Additional tests	19
6 Test procedures – Category 1	20
6.1 Continuity of protective earthing and equipotential bonding conductors	20

6.2	Polarity test.....	20
6.3	PV string combiner box test.....	20
6.4	PV string – Open circuit voltage measurement.....	21
6.5	PV string – Current measurement.....	21
6.5.1	General	21
6.5.2	PV string – Short circuit test.....	21
6.5.3	PV string – Operational test.....	23
6.6	Functional tests.....	23
6.7	PV array insulation resistance test.....	24
6.7.1	General	24
6.7.2	PV array insulation resistance test – Test method.....	24
6.7.3	PV array insulation resistance – Test procedure	25
7	Test procedures – Category 2.....	26
7.1	General.....	26
7.2	String I-V curve measurement	26
7.2.1	General	26
7.2.2	I-V curve measurement of V_{OC} and I_{SC}	26
7.2.3	I-V curve measurement – Array performance	27
7.2.4	I-V curve measurement – Identification of module / array defects or shading issues	27
7.3	PV array infrared camera inspection procedure.....	28
7.3.1	General	28
7.3.2	IR test procedure	28
7.3.3	Interpreting IR test results	29
8	Test procedures – Additional tests	30
8.1	Voltage to ground – Resistive ground systems.....	30
8.2	Blocking diode test.....	30
8.3	PV array – Wet insulation resistance test.....	30
8.3.1	General	30
8.3.2	Wet insulation test procedure	31
8.4	Shade evaluation	31
9	Verification reports	32
9.1	General.....	32
9.2	Initial verification.....	32
9.3	Periodic verification.....	33
Annex A (informative)	Model verification certificate.....	34
Annex B (informative)	Model inspection report.....	35
Annex C (informative)	Model PV array test report	38
Annex D (informative)	Interpreting I-V curve shapes	39
D.1	General.....	39
D.2	Variation 1 – Steps or notches in curve.....	40
D.3	Variation 2 – Low current.....	40
D.4	Variation 3 – Low voltage	40
D.5	Variation 4 – Rounder knee	41
D.6	Variation 5 – Shallower slope in vertical leg	41
D.7	Variation 6 – Steeper slope in horizontal leg	42
Figure 1	Example sun-path diagram	32

Figure D.1 – I-V curve shapes	39
Table 1 – Modifications to the test regime for systems with module level electronics	18
Table 2 – Minimum values of insulation resistance – PV arrays up to 10 kWp.....	25

INTERNATIONAL ELECTROTECHNICAL COMMISSION

PHOTOVOLTAIC (PV) SYSTEMS – REQUIREMENTS FOR TESTING, DOCUMENTATION AND MAINTENANCE –

Part 1: Grid connected systems – Documentation, commissioning tests and inspection

FOREWORD

- 1) The International Electrotechnical Commission (IEC) is a worldwide organization for standardization comprising all national electrotechnical committees (IEC National Committees). The object of IEC is to promote international co-operation on all questions concerning standardization in the electrical and electronic fields. To this end and in addition to other activities, IEC publishes International Standards, Technical Specifications, Technical Reports, Publicly Available Specifications (PAS) and Guides (hereafter referred to as "IEC Publication(s)"). Their preparation is entrusted to technical committees; any IEC National Committee interested in the subject dealt with may participate in this preparatory work. International, governmental and non-governmental organizations liaising with the IEC also participate in this preparation. IEC collaborates closely with the International Organization for Standardization (ISO) in accordance with conditions determined by agreement between the two organizations.
- 2) The formal decisions or agreements of IEC on technical matters express, as nearly as possible, an international consensus of opinion on the relevant subjects since each technical committee has representation from all interested IEC National Committees.
- 3) IEC Publications have the form of recommendations for international use and are accepted by IEC National Committees in that sense. While all reasonable efforts are made to ensure that the technical content of IEC Publications is accurate, IEC cannot be held responsible for the way in which they are used or for any misinterpretation by any end user.
- 4) In order to promote international uniformity, IEC National Committees undertake to apply IEC Publications transparently to the maximum extent possible in their national and regional publications. Any divergence between any IEC Publication and the corresponding national or regional publication shall be clearly indicated in the latter.
- 5) IEC itself does not provide any attestation of conformity. Independent certification bodies provide conformity assessment services and, in some areas, access to IEC marks of conformity. IEC is not responsible for any services carried out by independent certification bodies.
- 6) All users should ensure that they have the latest edition of this publication.
- 7) No liability shall attach to IEC or its directors, employees, servants or agents including individual experts and members of its technical committees and IEC National Committees for any personal injury, property damage or other damage of any nature whatsoever, whether direct or indirect, or for costs (including legal fees) and expenses arising out of the publication, use of, or reliance upon, this IEC Publication or any other IEC Publications.
- 8) Attention is drawn to the Normative references cited in this publication. Use of the referenced publications is indispensable for the correct application of this publication.
- 9) Attention is drawn to the possibility that some of the elements of this IEC Publication may be the subject of patent rights. IEC shall not be held responsible for identifying any or all such patent rights.

DISCLAIMER

This Consolidated version is not an official IEC Standard and has been prepared for user convenience. Only the current versions of the standard and its amendment(s) are to be considered the official documents.

This Consolidated version of IEC 62446-1 bears the edition number 1.1. It consists of the first edition (2016-01) [documents 82/1036/FDIS and 82/1056A/RVD] and its amendment 1 (2018-08) [documents 82/1415/FDIS and 82/1426/RVD]. The technical content is identical to the base edition and its amendment.

In this Redline version, a vertical line in the margin shows where the technical content is modified by amendment 1. Additions are in green text, deletions are in strikethrough red text. A separate Final version with all changes accepted is available in this publication.

[This is a preview. Click here to purchase the full publication.](#)

International Standard IEC 62446-1 has been prepared by IEC technical committee 82: Solar photovoltaic energy systems.

This first edition constitutes a technical revision.

This edition includes the following significant technical change with respect to IEC 62446:2009:

- the scope has been expanded to include a wider range of system test and inspection regimes to encompass larger and more complex PV systems.

This publication has been drafted in accordance with the ISO/IEC Directives, Part 2.

A list of all parts in the IEC 62446 series, published under the general title *Photovoltaic (PV) systems – Requirements for testing, documentation and maintenance*, can be found on the IEC website.

The committee has decided that the contents of the base publication and its amendment will remain unchanged until the stability date indicated on the IEC web site under "http://webstore.iec.ch" in the data related to the specific publication. At this date, the publication will be

- reconfirmed,
- withdrawn,
- replaced by a revised edition, or
- amended.

IMPORTANT – The 'colour inside' logo on the cover page of this publication indicates that it contains colours which are considered to be useful for the correct understanding of its contents. Users should therefore print this document using a colour printer.

INTRODUCTION

Grid connected PV systems are expected to have a lifetime of decades, with maintenance or modifications likely at some point over this period. Building or electrical works in the vicinity of the PV array are very likely, for example roof works adjacent to the array or modifications (structural or electrical) to a home that has a PV system. The ownership of a system may also change over time, particularly for systems mounted on buildings. Only by the provision of adequate documentation at the outset can the long term performance and safety of the PV system and works, on or adjacent to the PV system, be ensured.

This part of IEC 62446 is split into two sections:

- **System documentation requirements** – This section details the information that shall be provided within the documentation provided to the customer following installation of a grid connected PV system.
- **Verification** – This section provides the information expected to be provided following initial (or periodic) verification of an installed system. It includes requirements for inspection and testing.

This part of IEC 62446 references IEC TS 62548:2013, which is in the process of being converted into an International Standard. It is envisaged that work on the second edition of IEC 62446-1 will start when IEC 62548 is completed.
