### About the IEC

The International Electrotechnical Commission (IEC) is the leading global organization that prepares and publishes International Standards for all electrical, electronic and related technologies.

### About IEC publications

The technical content of IEC publications is kept under constant review by the IEC. Please make sure that you have the latest edition, a corrigenda or an amendment might have been published.

- Catalogue of IEC publications: [www.iec.ch/searchpub](http://www.iec.ch/searchpub)

The IEC on-line Catalogue enables you to search by a variety of criteria (reference number, text, technical committee,...). It also gives information on projects, withdrawn and replaced publications.

- IEC Just Published: [www.iec.ch/online\\_news/justpub](http://www.iec.ch/online_news/justpub)

Stay up to date on all new IEC publications. Just Published details twice a month all new publications released. Available on-line and also by email.

- Electropedia: [www.electropedia.org](http://www.electropedia.org)

The world's leading online dictionary of electronic and electrical terms containing more than 20 000 terms and definitions in English and French, with equivalent terms in additional languages. Also known as the International Electrotechnical Vocabulary online.

- Customer Service Centre: [www.iec.ch/webstore/custserv](http://www.iec.ch/webstore/custserv)

### A propos de la CEI

La Commission Electrotechnique Internationale (CEI) est la première organisation mondiale qui élabore et publie des normes internationales pour tout ce qui a trait à l'électricité, à l'électronique et aux technologies apparentées.

### A propos des publications CEI

Le contenu technique des publications de la CEI est constamment revu. Veuillez vous assurer que vous possédez l'édition la plus récente, un corrigendum ou amendement peut avoir été publié.

- Catalogue des publications de la CEI: [www.iec.ch/searchpub/cur\\_fut-f.htm](http://www.iec.ch/searchpub/cur_fut-f.htm)

Le Catalogue en-ligne de la CEI vous permet d'effectuer des recherches en utilisant différents critères (numéro de référence, texte, comité d'études,...). Il donne aussi des informations sur les projets et les publications retirées ou remplacées.

- Just Published CEI: [www.iec.ch/online\\_news/justpub](http://www.iec.ch/online_news/justpub)

Restez informé sur les nouvelles publications de la CEI. Just Published détaille deux fois par mois les nouvelles publications parues. Disponible en-ligne et aussi par email.

- Electropedia: [www.electropedia.org](http://www.electropedia.org)

Le premier dictionnaire en ligne au monde de termes électroniques et électriques. Il contient plus de 20 000 termes et définitions en anglais et en français, ainsi que les termes équivalents dans les langues additionnelles. Egalement appelé Vocabulaire Electrotechnique International en ligne.

- Service Clients: [www.iec.ch/webstore/custserv/custserv\\_entry-f.htm](http://www.iec.ch/webstore/custserv/custserv_entry-f.htm)

| 5 Ratings.....                                           | 15 |
| 5.1 General.....                                         | 15 |
| 5.2 Rated voltage .....                                  | 15 |
| 5.2.1 Input energizing voltage .....                     | 15 |
| 5.2.2 Auxiliary energizing voltage .....                 | 16 |
| 5.2.3 Rated insulation voltage .....                     | 16 |
| 5.3 Rated current .....                                  | 16 |
| 5.3.1 Input energizing current.....                      | 16 |
| 5.3.2 Auxiliary energizing current .....                 | 17 |
| 5.4 Binary input and output .....                        | 17 |
| 5.4.1 Binary input .....                                 | 17 |
| 5.4.2 Binary output .....                                | 17 |
| 5.5 Transducer analogue input and output.....            | 17 |
| 5.5.1 Transducer analogue input .....                    | 17 |
| 5.5.2 Transducer analogue output .....                   | 17 |
| 5.6 Frequency .....                                      | 17 |
| 5.6.1 Rated frequency .....                              | 17 |
| 5.6.2 Frequency operating range.....                     | 17 |
| 5.7 Rated burden .....                                   | 17 |
| 5.8 Rated ambient temperature .....                      | 17 |
| 6 Design and construction .....                          | 18 |
| 6.1 Marking .....                                        | 18 |
| 6.2 Dimensions .....                                     | 18 |
| 6.3 Enclosure protection.....                            | 18 |
| 6.4 Product safety requirements .....                    | 18 |
| 6.5 Functional performance requirements.....             | 18 |
| 6.5.1 General .....                                      | 18 |
| 6.5.2 Intrinsic accuracy .....                           | 18 |
| 6.5.3 Operating accuracy .....                           | 19 |
| 6.5.4 Performance under dynamic system conditions .....  | 19 |
| 6.5.5 Performance under transient signal conditions..... | 19 |
| 6.5.6 Multifunctional protection relay .....             | 19 |
| 6.5.7 Programmable logic.....                            | 20 |
| 6.6 Communication protocols .....                        | 20 |
| 6.7 Binary input and output .....                        | 20 |

|                       |                                                                             |    |
|-----------------------|-----------------------------------------------------------------------------|----|
| 6.7.1                 | Binary input .....                                                          | 20 |
| 6.7.2                 | Binary output .....                                                         | 20 |
| 6.8                   | Transducer analogue input and output .....                                  | 20 |
| 6.8.1                 | Transducer analogue input .....                                             | 20 |
| 6.8.2                 | Transducer analogue output .....                                            | 20 |
| 6.9                   | Input circuit for energizing quantities .....                               | 20 |
| 6.9.1                 | Characteristic energizing quantity .....                                    | 20 |
| 6.9.2                 | Auxiliary energizing quantity .....                                         | 21 |
| 6.10                  | Burden tests .....                                                          | 21 |
| 6.10.1                | Burden for voltage transformers .....                                       | 21 |
| 6.10.2                | Burden for current transformers .....                                       | 21 |
| 6.10.3                | Burden for AC power supply .....                                            | 21 |
| 6.10.4                | Burden for DC power supply .....                                            | 21 |
| 6.10.5                | Burden for binary input .....                                               | 22 |
| 6.11                  | Contact performance .....                                                   | 22 |
| 6.12                  | Climatic performance .....                                                  | 23 |
| 6.12.1                | General .....                                                               | 23 |
| 6.12.2                | Verification procedure .....                                                | 23 |
| 6.12.3                | Climatic environmental tests .....                                          | 25 |
| 6.13                  | Mechanical requirements .....                                               | 31 |
| 6.13.1                | Vibration response and endurance (sinusoidal) .....                         | 31 |
| 6.13.2                | Shock response, shock withstand and bump .....                              | 31 |
| 6.13.3                | Seismic .....                                                               | 32 |
| 6.14                  | Pollution .....                                                             | 32 |
| 6.15                  | Electromagnetic compatibility (EMC) .....                                   | 32 |
| 7                     | Tests .....                                                                 | 32 |
| 7.1                   | General .....                                                               | 32 |
| 7.2                   | Test reference conditions .....                                             | 32 |
| 7.3                   | Test overview .....                                                         | 33 |
| 7.4                   | Type test report content .....                                              | 34 |
| 8                     | Marking, labelling and packaging .....                                      | 35 |
| 9                     | Rules for transport, storage, installation, operation and maintenance ..... | 35 |
| 10                    | Product documentation .....                                                 | 35 |
| Annex A (informative) | Type testing guidelines .....                                               | 37 |
| Annex B (informative) | Intrinsic, operating and overall system accuracy .....                      | 40 |
| Annex C (informative) | Guidance on dependability .....                                             | 42 |
| Bibliography          | .....                                                                       | 45 |

## INTERNATIONAL ELECTROTECHNICAL COMMISSION

**MEASURING RELAYS AND PROTECTION EQUIPMENT –****Part 1: Common requirements****FOREWORD**

- 1) The International Electrotechnical Commission (IEC) is a worldwide organization for standardization comprising all national electrotechnical committees (IEC National Committees). The object of IEC is to promote international co-operation on all questions concerning standardization in the electrical and electronic fields. To this end and in addition to other activities, IEC publishes International Standards, Technical Specifications, Technical Reports, Publicly Available Specifications (PAS) and Guides (hereafter referred to as "IEC Publication(s)"). Their preparation is entrusted to technical committees; any IEC National Committee interested in the subject dealt with may participate in this preparatory work. International, governmental and non-governmental organizations liaising with the IEC also participate in this preparation. IEC collaborates closely with the International Organization for Standardization (ISO) in accordance with conditions determined by agreement between the two organizations.
- 2) The formal decisions or agreements of IEC on technical matters express, as nearly as possible, an international consensus of opinion on the relevant subjects since each technical committee has representation from all interested IEC National Committees.
- 3) IEC Publications have the form of recommendations for international use and are accepted by IEC National Committees in that sense. While all reasonable efforts are made to ensure that the technical content of IEC Publications is accurate, IEC cannot be held responsible for the way in which they are used or for any misinterpretation by any end user.
- 4) In order to promote international uniformity, IEC National Committees undertake to apply IEC Publications transparently to the maximum extent possible in their national and regional publications. Any divergence between any IEC Publication and the corresponding national or regional publication shall be clearly indicated in the latter.
- 5) IEC provides no marking procedure to indicate its approval and cannot be rendered responsible for any equipment declared to be in conformity with an IEC Publication.
- 6) All users should ensure that they have the latest edition of this publication.
- 7) No liability shall attach to IEC or its directors, employees, servants or agents including individual experts and members of its technical committees and IEC National Committees for any personal injury, property damage or other damage of any nature whatsoever, whether direct or indirect, or for costs (including legal fees) and expenses arising out of the publication, use of, or reliance upon, this IEC Publication or any other IEC Publications.
- 8) Attention is drawn to the Normative references cited in this publication. Use of the referenced publications is indispensable for the correct application of this publication.
- 9) Attention is drawn to the possibility that some of the elements of this IEC Publication may be the subject of patent rights. IEC shall not be held responsible for identifying any or all such patent rights.

International Standard IEC 60255-1 has been prepared by IEC technical committee 95: Measuring relays and protection equipment.

This standard cancels and replaces the second edition of IEC 60255-6, published in 1988, and constitutes a technical revision.

The text of this standard is based on the following documents:

| FDIS       | Report on voting |
|------------|------------------|
| 95/252FDIS | 95/257/RVD       |

Full information on the voting for the approval of this standard can be found in the report on voting indicated in the above table.

This publication has been drafted in accordance with the ISO/IEC Directives, Part 2.

A list of all the parts in the IEC 60255 series, under the general title *Measuring relays and protection equipment*, can be found on the IEC website.

The committee has decided that the contents of this publication will remain unchanged until the maintenance result date indicated on the IEC web site under "<http://webstore.iec.ch>" in the data related to the specific publication. At this date, the publication will be

- reconfirmed,
- withdrawn,
- replaced by a revised edition, or
- amended.

**IMPORTANT – The “colour inside” logo on the cover page of this publication indicates that it contains colours which are considered to be useful for the correct understanding of its contents. Users should therefore print this publication using a colour printer.**

## INTRODUCTION

### NUMBERING OF STANDARDS FALLING UNDER THE RESPONSIBILITY OF TC 95

In accordance with the decision taken at the technical committee 95 meeting in Paris on 2006-04-06 (item 12 of 95/191/RM) a new numbering system will be established of the standards falling under the responsibility of TC 95. Numbering of the standards will follow the following principle:

- common standards will start with IEC 60255 –;
- protection functional standards will start with IEC 60255-100 series;
- technical reports will start with IEC 60255-200 series.

The IEC 60255 series will consist of the following parts, under the general title *Measuring relays and protection equipment*. Five parts (Parts 3, 8, 12, 13 and 16) will be renumbered and Part 6 will be replaced by Part 1.

#### a) Common standards:

Part 1: Common requirements

Part 11: Interruptions to and alternating component (ripple) in d.c. auxiliary energizing quantity of measuring relays

Part 21: Vibration, shock, bump and seismic tests

Part 22: Electrical disturbance tests

Part 24: Common format for transient data exchange (COMTRADE) for power systems

Part 25: Electromagnetic emission tests

Part 26: Electromagnetic compatibility requirements

Part 27: Product safety requirements

#### b) Protection functional standards:

121 Functional requirements for distance protection (revision of IEC 60255-16)

124 Functional requirements for volts per hertz protection

125 Functional requirements for synchronizing or synchronism-check

127 Functional requirements for over/under voltage protection (revision of IEC 60255-3) (including the phase, neutral, residual and negative sequence)

132 Functional requirements for over/under power protection (revision of IEC 60255-12) (including the real reactive and power factor)

140 Functional requirements for loss of excitation protection

149 Functional requirements for thermal protection (revision of IEC 60255-8)

151 Functional requirements for over/under current protection (revision of IEC 60255-3) (including the phase, ground, residual and negative sequence)

160 Functional requirements for voltage or current unbalance protection

167 Functional requirements for directional current protection

178 Functional requirements for power swing/out-of-step protection

179 Functional requirements for reclosing

181 Functional requirements for frequency relay (including over/under, rate of change)

- 185 Functional requirements for teleprotection function
- 187 Functional requirements for differential protection (revision of IEC 60255-13)  
(including generator, transformer, busbar, line and restricted earth fault)
- 195 Functional requirements for synchrophasor measurement

NOTE 1 The functional standard for synchrophasor measurement may be developed from IEEE Std C37.118:1995 [1]<sup>1</sup>.

NOTE 2 The last two digits of the part of the proposed functional standard new numbering correspond to device function numbers as established in IEEE Std C37.2:1996[2].

c) Technical reports:

- Part 200: Application guide for generator protection
- Part 201: Application guide for motor protection
- Part 202: Application guide for transformer protection
- Part 203: Application guide for reactor protection
- Part 204: Application guide for bus protection
- Part 205: Application guide for line protection
- Part 206: Application guide for breaker failure protection

---

<sup>1</sup> Figures in square brackets refer to the bibliography.

## MEASURING RELAYS AND PROTECTION EQUIPMENT –

### Part 1: Common requirements

#### 1 Scope

This part of IEC 60255 specifies common rules and requirements applicable to measuring relays and protection equipment including any combination of devices to form schemes for power system protection such as control, monitoring and process interface equipment in order to obtain uniformity of requirements and tests.

All measuring relays and protection equipment used for protection within the power system environment are covered by this standard. Other standards in this series may define their own requirements which in such cases shall take precedence.

For special applications (marine, aerospace, explosive atmospheres, computers, etc.), the general requirements within this standard may need to be enhanced by additional special requirements.

The requirements are applicable only to relays in new condition. All tests in this standard are type tests, unless otherwise declared.

#### 2 Normative references

The following referenced documents are indispensable for the application of this document. For dated references, only the edition cited applies. For undated references, the latest edition of the referenced document (including any amendments) applies.
