

IEEE Standard for Device Discovery, Connection Management, and Control Protocol for Time-Sensitive Networking System

IEEE Computer Society

Developed by the
Microprocessor Standards Committee

IEEE Std 1722.1™-2021
(Revision of IEEE Std 1722.1-2013)

STANDARDS

Abstract: This standard specifies the protocol, device discovery, connection management and device control procedures used to facilitate interoperability between audio and video based End Stations that use IEEE 1722 based Streams on IEEE 802® based networks.

Keywords: AVDECC, ATDECC, bridged LAN, IEC 61883, IEEE 802.1™ AVB protocols, IEEE 802.1BA™, IEEE 1722.1™, IEEE Std 802.1AS™-2011, IEEE Std 802.1AS™-2020, IEEE Std 802.1Q™-2011, IEEE Std 802.1Q™-2018, IEEE Std 1722™-2011, IEEE Std 1722™-2016, LAN, QoS, time sensitive media streaming, time synchronization

Important Notices and Disclaimers Concerning IEEE Standards Documents

IEEE Standards documents are made available for use subject to important notices and legal disclaimers. These notices and disclaimers, or a reference to this page (<https://standards.ieee.org/ipr/disclaimers.html>), appear in all standards and may be found under the heading “Important Notices and Disclaimers Concerning IEEE Standards Documents.”

Notice and Disclaimer of Liability Concerning the Use of IEEE Standards Documents

IEEE Standards documents are developed within the IEEE Societies and the Standards Coordinating Committees of the IEEE Standards Association (IEEE SA) Standards Board. IEEE develops its standards through an accredited consensus development process, which brings together volunteers representing varied viewpoints and interests to achieve the final product. IEEE standards are documents developed by volunteers with scientific, academic, and industry-based expertise in technical working groups. Volunteers are not necessarily members of IEEE or IEEE SA, and participate without compensation from IEEE. While IEEE administers the process and establishes rules to promote fairness in the consensus development process, IEEE does not independently evaluate, test, or verify the accuracy of any of the information or the soundness of any judgments contained in its standards.

IEEE makes no warranties or representations concerning its standards, and expressly disclaims all warranties, express or implied, concerning this standard, including but not limited to the warranties of merchantability, fitness for a particular purpose and non-infringement. In addition, IEEE does not warrant or represent that the use of the material contained in its standards is free from patent infringement. IEEE standards documents are supplied “AS IS” and “WITH ALL FAULTS.”

Use of an IEEE standard is wholly voluntary. The existence of an IEEE standard does not imply that there are no other ways to produce, test, measure, purchase, market, or provide other goods and services related to the scope of the IEEE standard. Furthermore, the viewpoint expressed at the time a standard is approved and issued is subject to change brought about through developments in the state of the art and comments received from users of the standard.

In publishing and making its standards available, IEEE is not suggesting or rendering professional or other services for, or on behalf of, any person or entity, nor is IEEE undertaking to perform any duty owed by any other person or entity to another. Any person utilizing any IEEE Standards document, should rely upon his or her own independent judgment in the exercise of reasonable care in any given circumstances or, as appropriate, seek the advice of a competent professional in determining the appropriateness of a given IEEE standard.

IN NO EVENT SHALL IEEE BE LIABLE FOR ANY DIRECT, INDIRECT, INCIDENTAL, SPECIAL, EXEMPLARY, OR CONSEQUENTIAL DAMAGES (INCLUDING, BUT NOT LIMITED TO: THE NEED TO PROCURE SUBSTITUTE GOODS OR SERVICES; LOSS OF USE, DATA, OR PROFITS; OR BUSINESS INTERRUPTION) HOWEVER CAUSED AND ON ANY THEORY OF LIABILITY, WHETHER IN CONTRACT, STRICT LIABILITY, OR TORT (INCLUDING NEGLIGENCE OR OTHERWISE) ARISING IN ANY WAY OUT OF THE PUBLICATION, USE OF, OR RELIANCE UPON ANY STANDARD, EVEN IF ADVISED OF THE POSSIBILITY OF SUCH DAMAGE AND REGARDLESS OF WHETHER SUCH DAMAGE WAS FORESEEABLE.

Translations

The IEEE consensus development process involves the review of documents in English only. In the event that an IEEE standard is translated, only the English version published by IEEE is the approved IEEE standard.

Official statements

A statement, written or oral, that is not processed in accordance with the IEEE SA Standards Board Operations Manual shall not be considered or inferred to be the official position of IEEE or any of its committees and shall not be considered to be, nor be relied upon as, a formal position of IEEE. At lectures, symposia, seminars, or educational courses, an individual presenting information on IEEE standards shall make it clear that the presenter's views should be considered the personal views of that individual rather than the formal position of IEEE, IEEE SA, the Standards Committee, or the Working Group.

Comments on standards

Comments for revision of IEEE Standards documents are welcome from any interested party, regardless of membership affiliation with IEEE or IEEE SA. However, **IEEE does not provide interpretations, consulting information, or advice pertaining to IEEE Standards documents.**

Suggestions for changes in documents should be in the form of a proposed change of text, together with appropriate supporting comments. Since IEEE standards represent a consensus of concerned interests, it is important that any responses to comments and questions also receive the concurrence of a balance of interests. For this reason, IEEE and the members of its Societies and Standards Coordinating Committees are not able to provide an instant response to comments, or questions except in those cases where the matter has previously been addressed. For the same reason, IEEE does not respond to interpretation requests. Any person who would like to participate in evaluating comments or in revisions to an IEEE standard is welcome to join the relevant IEEE working group. You can indicate interest in a working group using the Interests tab in the Manage Profile & Interests area of the [IEEE SA myProject system](#). An IEEE account is needed to access the application.

Comments on standards should be submitted using the [Contact Us](#) form.

Laws and regulations

Users of IEEE Standards documents should consult all applicable laws and regulations. Compliance with the provisions of any IEEE Standards document does not constitute compliance to any applicable regulatory requirements. Implementers of the standard are responsible for observing or referring to the applicable regulatory requirements. IEEE does not, by the publication of its standards, intend to urge action that is not in compliance with applicable laws, and these documents may not be construed as doing so.

Data privacy

Users of IEEE Standards documents should evaluate the standards for considerations of data privacy and data ownership in the context of assessing and using the standards in compliance with applicable laws and regulations.

Copyrights

IEEE draft and approved standards are copyrighted by IEEE under US and international copyright laws. They are made available by IEEE and are adopted for a wide variety of both public and private uses. These include both use, by reference, in laws and regulations, and use in private self-regulation, standardization, and the promotion of engineering practices and methods. By making these documents available for use and adoption by public authorities and private users, IEEE does not waive any rights in copyright to the documents.

Photocopies

Subject to payment of the appropriate licensing fees, IEEE will grant users a limited, non-exclusive license to photocopy portions of any individual standard for company or organizational internal use or individual, non-commercial use only. To arrange for payment of licensing fees, please contact Copyright Clearance Center, Customer Service, 222 Rosewood Drive, Danvers, MA 01923 USA; +1 978 750 8400; <https://www.copyright.com/>. Permission to photocopy portions of any individual standard for educational classroom use can also be obtained through the Copyright Clearance Center.

Updating of IEEE Standards documents

Users of IEEE Standards documents should be aware that these documents may be superseded at any time by the issuance of new editions or may be amended from time to time through the issuance of amendments, corrigenda, or errata. An official IEEE document at any point in time consists of the current edition of the document together with any amendments, corrigenda, or errata then in effect.

Every IEEE standard is subjected to review at least every 10 years. When a document is more than 10 years old and has not undergone a revision process, it is reasonable to conclude that its contents, although still of some value, do not wholly reflect the present state of the art. Users are cautioned to check to determine that they have the latest edition of any IEEE standard.

In order to determine whether a given document is the current edition and whether it has been amended through the issuance of amendments, corrigenda, or errata, visit [IEEE Xplore](#) or [contact IEEE](#). For more information about the IEEE SA or IEEE's standards development process, visit the IEEE SA Website.

Errata

Errata, if any, for all IEEE standards can be accessed on the [IEEE SA Website](#). Search for standard number and year of approval to access the web page of the published standard. Errata links are located under the Additional Resources Details section. Errata are also available in [IEEE Xplore](#). Users are encouraged to periodically check for errata.

Patents

IEEE Standards are developed in compliance with the [IEEE SA Patent Policy](#).

Attention is called to the possibility that implementation of this standard may require use of subject matter covered by patent rights. By publication of this standard, no position is taken by the IEEE with respect to the existence or validity of any patent rights in connection therewith. If a patent holder or patent applicant has filed a statement of assurance via an Accepted Letter of Assurance, then the statement is listed on the IEEE SA Website at <https://standards.ieee.org/about/sasb/patcom/patents.html>. Letters of Assurance may indicate whether the Submitter is willing or unwilling to grant licenses under patent rights without compensation or under reasonable rates, with reasonable terms and conditions that are demonstrably free of any unfair discrimination to applicants desiring to obtain such licenses.

Essential Patent Claims may exist for which a Letter of Assurance has not been received. The IEEE is not responsible for identifying Essential Patent Claims for which a license may be required, for conducting inquiries into the legal validity or scope of Patents Claims, or determining whether any licensing terms or conditions provided in connection with submission of a Letter of Assurance, if any, or in any licensing agreements are reasonable or non-discriminatory. Users of this standard are expressly advised that determination of the validity of any patent rights, and the risk of infringement of such rights, is entirely their own responsibility. Further information may be obtained from The IEEE Standards Association.

IMPORTANT NOTICE

IEEE Standards do not guarantee or ensure safety, security, health, or environmental protection, or ensure against interference with or from other devices or networks. IEEE Standards development activities consider research and information presented to the standards development group in developing any safety recommendations. Other information about safety practices, changes in technology or technology implementation, or impact by peripheral systems also may be pertinent to safety considerations during implementation of the standard. Implementers and users of IEEE Standards documents are responsible for determining and complying with all appropriate safety, security, environmental, health, and interference protection practices and all applicable laws and regulations.

Participants

At the time this standard was submitted to the IEEE SA Standards Board for approval, the IEEE Standard Device Discovery, Connection Management and Control Protocol for P1722 based devices Working Group Working Group had the following membership:

Richard Bugg, *Chair*
Genio Kronauer, *Vice Chair*
Fabian Braun, *Secretary*
Jeff Koftinoff, *Editor*
Ashley Butterworth, *Editor*

Ana Yndurain	Craig Gunther	Mark Hu
Andrew Elder	Dave Olsen	Martin Zarzycki
Andy Lucas	Don Pannell	Matt Jackson
Arno Gramatke	Eric Schulz	Matt Mora
Bart Swinnen	Gordon Bechtel	Michael Johas Teener
Bob Noseworthy	Joris Volders	Morten Lave
Brajendra Kumar Singh	Karel Heurtefeux	Petr Nechaev
Brian Edem	Kieran Tyrrell	Richard Foss
Christophe Calmejane	Marc Illouz	Rimas Avizienis
Cole Peterson	Marc Schettke	Steve Matovski

The following members of the individual balloting committee voted on this standard. Balloters may have voted for approval, disapproval, or abstention.

Alon Regev	John Vergis	Rimas Avizienis
Arno Gramatke	Kieran Tyrrell	Rodney Cummings
Arumugam Paventhan	Marc Schettke	Stephen McCann
Ashley Butterworth	Marco Hernandez	Stuart Kerry
Bartien Sayogo	Max Turner	Ting Li
Christian Boiger	Maximilian Riegel	Travis Breitreutz
Dorothy Stanley	Oren Yuen	Walter Struppler
Gavin Lai	Piotr Karocki	Werner Hoelzl
Glen Kramer	Raj Jain	Woojung Huh
Glenn Parsons	Rajesh Murthy	Yongbum Kim
Jeff Koftinoff	Ralph Kearfott	Yu Yuan
John Kay	Richard Bugg	

When the IEEE SA Standards Board approved this standard on 9 November 2021, it had the following membership:

Gary Hoffman, *Chair*
Jon Walter Rosdahl, *Vice Chair*
John D. Kulick, *Past Chair*
Konstantinos Karachalios, *Secretary*

Annette Reilly	Doug Edwards	Kevin Lu
Chenhui Niu	Edward A. Addy	Lei Wang
Daidi Zhong	F. Keith Waters	Mehmet Ulema
Daleep C. Mohla	Howard Li	Ramy Ahmed Fathy
Damir Novosel	Howard Wolfman	Sha Wei
Daozhuang Lin	J. Travis Griffith	Thomas Koshy
David J. Law	Joseph L. Koepfinger*	
Dorothy Stanley	Karl Weber	

* Member Emeritus

Introduction

This introduction is not a part of IEEE Std 1722.1™-2021, Device Discovery, Connection Management, and Control Protocol for Time-Sensitive Networking System.

Increasingly, entertainment media are digitally transported. Streaming audio/video and interactive applications over local area networks is becoming more common.

This standard builds on the work done by the IEEE 802.1™ AVB task group by providing a common audio/video transport protocol capable of supporting the needs of both consumer and professional audio/video applications.

Contents

1. Overview	16
1.1. Scope	17
1.2. Purpose	17
1.3. Word usage	17
2. Normative references	18
3. Definitions, acronyms and abbreviations	20
3.1. Definitions	20
3.2. Acronyms and abbreviations	22
4. Other information	24
4.1. Numerical values	24
4.2. Bit, octet, doublet, and quadlet ordering	24
4.3. Field value conventions	25
4.4. AVTPDU Diagram Conventions	26
5. General requirements	27
5.1. Overview	27
5.2. ATDECC End Station	27
5.2.1. Requirements and options	27
5.3. ATDECC Entity	28
5.3.1. Requirements and options	28
5.4. ATDECC Controller	30
5.4.1. Requirements and options	30
5.4.2. Multiple Controllers	36
5.4.3. Controller behavior	36
5.5. ATDECC Talker	36
5.5.1. Requirements and options	36
5.6. ATDECC Listener	40
5.6.1. Requirements and options	40
5.7. ATDECC Responder	43
5.7.1. Requirements and options	43
