**RECOMMENDED PRACTICE:
LIGHTING INDUSTRIAL FACILITIES**
AN AMERICAN NATIONAL STANDARD

Publication of this Recommended Practice
has been approved by IES.
Suggestions for revisions
should be directed to IES.

Prepared by
The IES Industrial Lighting Committee

Copyright 2020 by the Illuminating Engineering Society.

Approved by the IES Standards Committee October 11, 2019 as a Transaction of the Illuminating Engineering Society.

Approved March 23, 2020 as an American National Standard.

All rights reserved. No part of this publication may be reproduced in any form, in any electronic retrieval system or otherwise, without prior written permission of the IES.

Published by the Illuminating Engineering Society, 120 Wall Street, New York, New York 10005.

IES Standards are developed through committee consensus and produced by the IES Office in New York. Careful attention is given to style and accuracy. If any errors are noted in this document, please forward them to Brian Liebel, IES Director of Standards, at standards@ies.org or the above address for verification and correction. The IES welcomes and urges feedback and comments.

Printed in the United States of America.

DISCLAIMER

IES publications are developed through the consensus standards development process approved by the American National Standards Institute. This process brings together volunteers representing varied viewpoints and interests to achieve consensus on lighting recommendations. While the IES administers the process and establishes policies and procedures to promote fairness in the development of consensus, it makes no guaranty or warranty as to the accuracy or completeness of any information published herein.

The IES disclaims liability for any injury to persons or property or other damages of any nature whatsoever, whether special, indirect, consequential or compensatory, directly or indirectly resulting from the publication, use of, or reliance on this document.

In issuing and making this document available, the IES is not undertaking to render professional or other services for or on behalf of any person or entity. Nor is the IES undertaking to perform any duty owed by any person or entity to someone else. Anyone using this document should rely on his or her own independent judgment or, as appropriate, seek the advice of a competent professional in determining the exercise of reasonable care in any given circumstances.

The IES has no power, nor does it undertake, to police or enforce compliance with the contents of this document. Nor does the IES list, certify, test or inspect products, designs, or installations for compliance with this document. Any certification or statement of compliance with the requirements of this document shall not be attributable to the IES and is solely the responsibility of the certifier or maker of the statement.

AMERICAN NATIONAL STANDARD

Approval of an American National Standard requires verification by ANSI that the requirements for due process, consensus, and other criteria have been met by the standards developer.

Consensus is established when, in the judgment of the ANSI Board of Standards Review, substantial agreement has been reached by directly and materially affected interests. Substantial agreement means much more than a simple majority, but not necessarily unanimity. Consensus requires that all views and objections be considered, and that a concerted effort be made toward their resolution.

The use of American National Standards is completely voluntary; their existence does not in any respect preclude anyone, whether that person has approved the standards or not, from manufacturing, marketing, purchasing, or using products, processes, or procedures not conforming to the standards.

The American National Standards Institute does not develop standards and will in no circumstances give an interpretation to any American National Standard. Moreover, no person shall have the right or authority to issue an interpretation of an American National Standard in the name of the American National Standards Institute. Requests for interpretations should be addressed to the secretariat or sponsor whose name appears on the title page of this standard.

CAUTION NOTICE: This American National Standard may be revised at any time. The procedures of the American National Standards Institute require that action be taken to reaffirm, revise, or withdraw this standard no later than five years from the date of approval. Purchasers of American National Standards may receive current information on all standards by calling or writing the American National Standards Institute.

CONTENTS

Foreword	1
1.0 Introduction and Scope	1
1.1 Introduction.....	1
1.2 Purpose and Scope	2
2.0 Lighting the Industrial Environment	2
2.1 General Design Considerations for Lighting Industrial Areas	2
2.2 Code Compliance	3
3.0 Quality of Lighting in Industrial Facilities	3
3.1 Luminance and Luminance Ratios	3
3.2 Modeling of Objects.....	5
3.3 Glare and Visual Comfort.....	5
3.4 Material Characteristics	5
3.5 Shadows	6
3.6 Source/Task/Eye Geometry.....	7
3.7 Task Visibility: Flicker and Strobe.....	7
3.8 Light Source Color.....	9
3.8.1 Color Temperature and Correlated Color Temperature.....	9
3.8.2 Color Rendering	10
3.8.3 Safety Colors.....	11
4.0 Light Sources	11
4.1 Daylight.....	11
4.2 Electric Light Sources.....	12
4.2.1 Light Emitting Diodes (LEDs)	12
4.2.2 Fluorescent Systems	13
4.2.3 Induction Systems	14
4.2.4 High Intensity Discharge (HID) Lighting Systems	14
4.2.5 Other Light Sources	15

5.0	Lighting Equipment – Luminaires	16
5.1	General Luminaire Characteristics and Performance	16
5.2	Operating Considerations	17
5.3	Indoor Industrial Luminaires	17
5.3.1	Classification by Light Distribution	17
5.3.2	Classification by Luminaire Type	18
5.4	Exterior Industrial Luminaires	20
6.0	Electrical System Considerations	21
7.0	Lighting Controls	22
8.0	Building Construction Features That Influence Luminaire Selection and Luminaire Placement	22
9.0	Lighting System Economic Analysis	24
10.0	Lighting System Maintenance	24
10.1	Maintenance in an Industrial Environment	25
10.2	Maintenance Safety	25
11.0	Special Considerations in Industrial Applications	26
11.1	Lighting and Space Conditioning	26
11.2	Classified Areas	26
11.2.1	Hazardous Location Classes	27
11.2.2	Hazardous Location Conditions	27
11.2.3	The Nature of Hazardous Substances	27
11.2.4	Classified Location Luminaires	28
11.3	High Humidity or Corrosive Atmospheres	28
11.4	High Ambient Temperatures	28
11.5	Low Ambient Temperatures	29
11.6	Clean Rooms	29
11.7	Food and Drug Processing	29
12.0	Lighting Criteria	30
12.1	Illuminance: Horizontal, Vertical, and Intermediate Planes	31
12.1.1	Horizontal Illuminance	31
12.1.2	Vertical Illuminance	31
12.2	Initial and Maintained Illuminance	32
12.3	Visual Age of Occupants	32

12.4	Illuminance Measurements.....	33
12.4.1	Light Measurement Equipment.....	33
12.4.2	Measurement Point Grids	33
13.0	General Lighting.....	34
14.0	Supplementary Task Lighting	35
14.1	Portable Luminaires.....	35
15.0	Special Effects and Techniques	36
15.1	Classification of Visual Tasks and Lighting Techniques.....	36
15.2	Color Contrast.....	36
15.3	Lighting Techniques for Inspection Tasks.....	36
16.0	Emergency, Safety and Security Lighting	41
16.1	Emergency Lighting.....	41
16.2	Safety Lighting.....	42
16.3	Security Lighting.....	42
17.0	Lighting for Specific Tasks	43
17.1	Molding of Metal and Plastic Parts	43
17.1.1	Foundry Molding (Sand Casting).....	43
17.1.2	Molding Parts of Die-Cast Aluminum and Injection Molded Plastic.....	44
17.1.3	Inspection of Sand Castings	44
17.1.4	Inspection of Die Castings and Opaque Injection Molded Plastic Parts	44
17.2	Parts Manufacturing and Assembly	45
17.3	Machining Metal Parts	46
17.4	Lighting and Visibility Issues for Sheet Metal Fabrication.....	46
17.4.1	Punch Press.....	46
17.4.2	Shear.....	47
17.5	Lighting for Large Component Subassembly and Final Assembly.....	47
17.6	Control Rooms	48
17.7	Manufacturing Electronic Assemblies	48
18.0	Lighting for Specific Visual Tasks.....	49
18.1	Convex Surfaces.....	49
18.2	Flat Surfaces	49
18.3	Scribed Marks.....	49
18.4	Center-Punch Marks.....	50
18.5	Concave Specular Surfaces	50
18.6	Flat Specular Surfaces	50
18.7	Convex Specular Surfaces	51

19.0 Warehouse and Storage Area Lighting	51
19.1 Types of Warehouse Area and Storage Systems	51
19.2 Warehouse Illuminance	52
19.2.1 Vertical Illuminance	52
19.2.2 Horizontal Illuminance	53
19.3 Warehouse Lighting Design Considerations	53
19.3.1 Intermittent Use	53
19.3.2 Lighting Design Considerations by Area	53
19.3.3 Other Lighting Design Considerations	54
 20.0 Outdoor Area Lighting	 54
20.1 Lighting Zones	54
20.2 Projected Lighting System	55
20.3 Distributed Lighting System	55
20.4 Outdoor Tower Platforms, Stairways, and Ladders	56
20.5 Special Equipment	56
20.6 Low Illuminance and Visual Acuity Outdoors	56
 Annex A – Illuminance Recommendations	 57
Annex B – Ingress Protection (IP) Ratings	99
