

ANSI/ISEA 101-2014
Revision of ANSI/ISEA 101-1996

**American National Standard for
Limited-Use and Disposable Coveralls –
Size and Labeling Requirements**

Secretariat
International Safety Equipment Association

Approved July 8, 2014
American National Standards Institute, Inc.

American National Standard

An American National Standard implies a consensus of those substantially concerned with its scope and provisions. An American National Standard is intended as a guide to aid the manufacturer, the consumer, and the general public. The existence of an American National Standard does not in any respect preclude anyone, whether they have approved the standard or not, from manufacturing, marketing, purchasing, or using products, processes, or procedures not conforming to the standard. American National Standards are subject to periodic review and users are cautioned to obtain the latest editions.

The American National Standards Institute does not develop standards and will in no circumstances give an interpretation of any American National Standard. Moreover, no persons shall have the right or authority to issue an interpretation of an American National Standard in the name of the American National Standards Institute.

CAUTION NOTICE: This American National Standard may be revised or withdrawn at any time. The procedures of the American National Standards Institute require that action be taken to reaffirm, revise, or withdraw this standard no later than five years from the date of publication. Purchasers of American National Standards may receive current information on all standards by calling or writing the American National Standards Institute.

Foreword [This Foreword is not part of American National Standard ANSI/ISEA 101-2014)

This standard provides minimum size, packaging and labeling requirements for limited-use and disposable coveralls. Garments covered under this standard are used in a variety of workplaces including grain and milling operations, automotive repair, painting and dry chemical applications, abrasive blasting, food processing and construction work. The standard also provides guidance on the proper size selection of such garments.

This ANSI/ISEA 101-2014 standard updates the 1996 edition by expanding the sizing chart to accommodate a majority of the working population who utilize such garments. In addition, the Appendix details a set of tests designed to validate the sizing of a garment selected for a worker based on height and weight.

ANSI/ISEA 101-2014 was processed and approved using consensus procedures prescribed by the American National Standards Institute (ANSI). The following organizations were contacted prior to the approval of this standard. Inclusion in this list does not necessarily imply that a listed organization concurred with the submittal of the proposed standard to ANSI.

American Coatings Association
Argus Hazco
Atlas Industrial Contractors
Honeywell Safety Products
International Safety Equipment Association
National Institute for Occupational Safety and Health

National Waste & Recycling Association
Safety Equipment Institute
Specialized Response Solutions
Standard Safety Equipment Company
SWS Environmental Solutions
Syracuse Utilities

Suggestions for the improvement of this standard are welcome. They should be sent to:
