Foreword .....	iv
Introduction.....	v
1 Scope .....	1
2 Normative references .....	1
3 Terms and definitions .....	2
4 Symbols and abbreviated terms .....	2
4.1 Symbols.....	2
4.2 Abbreviated terms .....	3
5 Category of corrosivity of the atmosphere.....	3
6 Classification of corrosivity of the atmosphere .....	3
7 Corrosivity determination based on corrosion rate measurement of standard specimens .....	4
8 Corrosivity estimation based on environmental information .....	4
8.1 Corrosivity estimation — General .....	4
8.2 Normative corrosivity estimation based on calculated first-year corrosion losses .....	5
8.3 Informative corrosivity estimation based on description of exposure conditions .....	6
Annex A (informative) Sources of uncertainty associated with the determination and estimation of atmospheric corrosivity.....	7
Annex B (informative) Characterization of the atmosphere in relation to its corrosivity.....	9
Annex C (informative) Description of typical atmospheric environments related to the estimation of corrosivity categories.....	13
Bibliography.....	15

## Foreword

ISO (the International Organization for Standardization) is a worldwide federation of national standards bodies (ISO member bodies). The work of preparing International Standards is normally carried out through ISO technical committees. Each member body interested in a subject for which a technical committee has been established has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work. ISO collaborates closely with the International Electrotechnical Commission (IEC) on all matters of electrotechnical standardization.

International Standards are drafted in accordance with the rules given in the ISO/IEC Directives, Part 2.

The main task of technical committees is to prepare International Standards. Draft International Standards adopted by the technical committees are circulated to the member bodies for voting. Publication as an International Standard requires approval by at least 75 % of the member bodies casting a vote.

Attention is drawn to the possibility that some of the elements of this document may be the subject of patent rights. ISO shall not be held responsible for identifying any or all such patent rights.

ISO 9223 was prepared by Technical Committee ISO/TC 156, *Corrosion of metals and alloys*.

This second edition cancels and replaces the first edition (ISO 9223:1992), which has been technically revised.
