
**Biocompatibility evaluation of
breathing gas pathways in healthcare
applications —**

**Part 1:
Evaluation and testing within a risk
management process**

*Évaluation de la biocompatibilité des voies de gaz respiratoires dans
les applications de soins de santé —*

*Partie 1: Évaluation et essais au sein d'un processus de gestion du
risque*

Foreword	iv
Introduction	v
1 Scope	1
2 Normative references	2
3 Terms and definitions	2
4 General principles applying to BIOCOMPATIBILITY evaluation of MEDICAL DEVICES	6
4.1 General	6
4.2 TYPE TESTS	7
4.3 BIOCOMPATIBILITY HAZARD identification	8
4.4 Extent of RISK ASSESSMENT	8
4.5 BIOCOMPATIBILITY evaluation plan	9
4.6 Selection of tests	10
4.7 Subsequent evaluation	10
5 Contamination of breathing gas from GAS PATHWAYS	11
5.1 * Duration of use	11
5.2 PARTICULATE MATTER (PM) emissions	13
5.3 VOLATILE ORGANIC COMPOUND (VOC) emissions	13
5.4 LEACHABLE SUBSTANCES in condensate	13
6 Adjustment for different PATIENT groups	13
6.1 General considerations	13
6.2 Adjustment for body weight	13
6.3 * Deriving a permitted concentration from a TOLERABLE EXPOSURE	14
7 * Deriving allowable limits	14
7.1 General PROCESS	14
7.2 For MEDICAL DEVICES intended for limited exposure use (≤ 24 h)	15
7.3 For MEDICAL DEVICES intended for prolonged exposure use (> 24 h but < 30 d)	16
7.4 For MEDICAL DEVICES intended for permanent contact (≥ 30 d)	16
8 RISK benefit analysis	16
9 Assess the BIOCOMPATIBILITY of the MEDICAL DEVICE	17
Annex A (informative) Rationale and guidance	18
Annex B (informative) Reference to the essential principles	20
Annex C (informative) Terminology — Alphabetized index of defined terms	21
Bibliography	23

Foreword

ISO (the International Organization for Standardization) is a worldwide federation of national standards bodies (ISO member bodies). The work of preparing International Standards is normally carried out through ISO technical committees. Each member body interested in a subject for which a technical committee has been established has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work. ISO collaborates closely with the International Electrotechnical Commission (IEC) on all matters of electrotechnical standardization.

The procedures used to develop this document and those intended for its further maintenance are described in the ISO/IEC Directives, Part 1. In particular the different approval criteria needed for the different types of ISO documents should be noted. This document was drafted in accordance with the editorial rules of the ISO/IEC Directives, Part 2 (see www.iso.org/directives).

Attention is drawn to the possibility that some of the elements of this document may be the subject of patent rights. ISO shall not be held responsible for identifying any or all such patent rights. Details of any patent rights identified during the development of the document will be in the Introduction and/or on the ISO list of patent declarations received (see www.iso.org/patents).

Any trade name used in this document is information given for the convenience of users and does not constitute an endorsement.

For an explanation on the voluntary nature of ISO standards, the meaning of ISO specific terms and expressions related to conformity assessment, as well as information about ISO's adherence to the World Trade Organization (WTO) principles in the Technical Barriers to Trade (TBT) see the following URL: www.iso.org/iso/foreword.html.

The committee responsible for this document is ISO/TC 121, *Anaesthetic and respiratory equipment*, Subcommittee SC 3, *Lung ventilators and related equipment*.

A list of all parts in the ISO 18562 series can be found on the ISO website.
