Foreword

ISO (the International Organization for Standardization) is a worldwide federation of national standards bodies (ISO member bodies). The work of preparing International Standards is normally carried out through ISO technical committees. Each member body interested in a subject for which a technical committee has been established has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work.

Draft International Standards adopted by the technical committees are circulated to the member bodies for approval before their acceptance as International Standards by the ISO Council. They are approved in accordance with ISO procedures requiring at least 75 % approval by the member bodies voting.

International Standard ISO 2859/2 was prepared by Technical Committee ISO/TC 69, *Applications of statistical methods*. It replaces, in part, the first edition of ISO 2859, published in 1974.

NOTE — ISO 2859/2 was originally circulated as ISO/DIS 7362.

Contents

	Page
0 Introduction	1
1 Scope and field of application	1
2 Definitions	2
3 Choice of sampling plan	2
4 Rules for acceptance and non-acceptance	3
5 Double and multiple sampling plans	4
6 Examples illustrating how to use this part of ISO 2859	4
7 Compatibility with ISO 2859/1	4
Tables	5 to 21
