Components for metal roof-decks

1 Scope This Japanese Industrial Standard specifies folded sheets and component parts that constitute metal roof-decks.

Remarks 1 Folded sheets are either the composite of metal sheet and backing material or the metal sheets only.

2 Normative references to this Standard are shown in Attached Table 1.

3 The units and numerical values given in { } in this Standard are based on the traditional unit, and are appended for informative reference.

2 Definitions of terms For the purpose of this Standard, the following definitions apply.

(1) **folded sheet** Material used as roofing material which is manufactured by folding a metal sheet into a V-shape or U-shape or the shapes similar to them.

(2) **component parts** Parts to be used for constituting roof-deck.

3 Names of respective parts The names of respective parts shall be as follows.

(1) **Roof-deck** The names of respective parts of roof-decks shall be as illustrated in Fig. 1, Fig. 2 and Fig. 3.

Fig. 1 Example of overlap type roof-deck

Fig. 2 Example of seam tightening type roof-deck

Fig. 3 Example of engagement type roof-deck

- (2) **Folded sheets** The names of respective parts of folded sheets shall be as illustrated in Fig. 4, Fig. 5 and Fig. 6.
