Introduction.....	1
1 Scope.....	1
2 Normative references	1
3 Terms and definitions	1
4 Symbol and meaning thereof.....	4
5 Base of tightening	6
5.1 Relation between torque and clamp force.....	6
5.2 Relation between tightening angle and clamp force	6
5.3 Yield clamp force	6
5.4 Yield tightening torque.....	7
6 Tightening control method of thread fasteners	7
6.1 General matters.....	7
6.2 Torque control method	7
6.3 Angle control method	11
6.4 Torque gradient control method.....	13
Annex A (informative) Calculation example of torque coefficient correspond- ing to coefficient of friction between thread surfaces and between bearing surfaces	15
Annex B (informative) Theoretical value of yield clamp force corresponding to coefficient of friction between thread surfaces	17

Foreword

This translation has been made based on the original Japanese Industrial Standard revised by the Minister of Economy, Trade and Industry through deliberations at the Japanese Industrial Standards Committee as the result of proposal for revision of Japanese Industrial Standard submitted by The Japan Research Institute for Screw Threads and Fasteners (JFRI)/Japanese Standards Association (JSA) with the draft being attached, based on the provision of Article 12 Clause 1 of the Industrial Standardization Law applicable to the case of revision by the provision of Article 14.

Consequently **JIS B 1083**:1990 is replaced with this Standard.

This **JIS** document is protected by the Copyright Law.

Attention is drawn to the possibility that some parts of this Standard may conflict with a patent right, application for a patent after opening to the public, utility model right or application for registration of utility model after opening to the public which have technical properties. The relevant Minister and the Japanese Industrial Standards Committee are not responsible for identifying the patent right, application for a patent after opening to the public, utility model right or application for registration of utility model after opening to the public which have the said technical properties.
