	Page
1 Scope	1
2 Normative references	1
3 Terms and definitions	1
4 Symbol of grade and applicable wall thickness	1
5 Manufacturing method	2
6 Chemical composition	2
7 Carbon equivalent	2
8 Mechanical properties	3
8.1 Tensile strength, yield point or proof stress, and elongation	3
8.2 Flattening resistance	3
8.3 Tensile strength of weld	3
8.4 Charpy absorbed energy	4
9 Dimensions, unit mass and dimensional tolerances	4
9.1 Dimensions and unit mass	4
9.2 Dimensional tolerances	5
10 Appearance	6
11 Supplementary quality requirement	7
12 Tests	7
12.1 Chemical analysis	7
12.2 Mechanical tests	7
13 Inspection and reinspection	10
13.1 Inspection	10
13.2 Reinspection	10
14 Marking	10
15 Report	11
Annex A (normative) Supplementary quality requirement	12

Foreword

This Japanese Industrial Standard has been revised by the Minister of Economy, Trade and Industry through deliberations at the Japanese Industrial Standards Committee as the result of proposal for revision of Japanese Industrial Standard submitted by The Japan Iron and Steel Federation (JISF) with a draft being attached, based on the provision of Article 12, paragraph (1) of the Industrial Standardization Act applied mutatis mutandis pursuant to the provision of Article 16 of the said Act. This edition replaces the previous edition (**JIS G 3474:2016**), which has been technically revised.

However, **JIS G 3474: 2016** may be applied in the **JIS** mark certification based on the relevant provisions of Article 30, paragraph (1), etc. of the Industrial Standardization Act until 19 May 2022.

This **JIS** document is protected by the Copyright Act.

Attention is drawn to the possibility that some parts of this Standard may conflict with patent rights, published patent application or utility model rights. The relevant Minister and the Japanese Industrial Standards Committee are not responsible for identifying any of such patent rights, published patent application or utility model rights.
