## Contents

	Page
1 Scope .....	1
2 Normative references .....	1
3 Grade and designation .....	1
4 Manufacturing process .....	2
5 Chemical composition .....	2
6 Carbon equivalent and chemical composition on sensitivity of welding crack .....	2
7 Mechanical properties .....	3
7.1 Tensile strength, yield point or proof stress, yield ratio and elongation .....	3
7.2 Flattening resistance .....	4
7.3 Tensile strength of weld .....	4
7.4 Charpy absorbed energy .....	4
8 Dimensions, mass and dimensional tolerances .....	6
8.1 Dimensions and unit mass .....	6
8.2 Dimensional tolerances .....	9
9 Appearance .....	10
10 Test .....	10
10.1 Chemical analysis .....	10
10.2 Mechanical test .....	10
10.3 Other tests .....	13
11 Inspection and reinspection .....	13
11.1 Inspection .....	13
11.2 Reinspection .....	13
12 Marking .....	13
13 Report .....	14
Annex A (normative) Nitride type nitrogen determination method .....	15

## Foreword

This translation has been made based on the original Japanese Industrial Standard revised by the Minister of Economy, Trade and Industry through deliberations at the Japanese Industrial Standards Committee as the result of proposal for revision of Japanese Industrial Standard submitted by The Japan Iron and Steel Federation (JISF) with the draft being attached, based on the provision of Article 12 Clause 1 of the Industrial Standardization Law applicable to the case of revision by the provision of Article 14.

Consequently, **JIS G 3475: 2011** is replaced with this Standard.

However, **JIS G 3475: 2011** may be applied in the **JIS** mark certification based on the relevant provisions of Article 19 Clause 1, etc. of the Industrial Standardization Law until February 19, 2015.

This **JIS** document is protected by the Copyright Law.

Attention is drawn to the possibility that some parts of this Standard may conflict with patent rights, applications for a patent after opening to the public or utility model rights. The relevant Minister and the Japanese Industrial Standards Committee are not responsible for identifying any of such patent rights, applications for a patent after opening to the public or utility model rights.
