This MSS Standard Practice was developed under the consensus of the MSS Technical Committee 106, *Cast Iron Valves*, and the MSS Coordinating Committee. The content of this Standard Practice is the resulting efforts of knowledgeable and experienced industry volunteers to provide an effective, clear, and non-exclusive standard that will benefit the industry as a whole. This MSS Standard Practice describes minimal requirements and is intended as a basis for common practice by the manufacturer, the user, and the industry at large. It is the responsibility of the user of this Standard Practice to establish appropriate safety and health practices and determine the applicability of regulatory requirements prior to use. The existence of an MSS Standard Practice does not in itself preclude the manufacture, sale, or use of products not conforming to the Standard Practice. Mandatory conformance to this Standard Practice is established only by reference in other documents such as a code, specification, sales contract, or public law, as applicable. MSS has no power, nor does it undertake, to enforce or certify compliance with this document. Any certification or other statement of compliance with the requirements of this Standard Practice shall not be attributable to MSS and is solely the responsibility of the certifier or maker of the statement.

“Unless indicated otherwise within this MSS Standard Practice, other standards documents referenced to herein are identified by the date of issue that was applicable to this Standard Practice at the date of approval of this MSS Standard Practice (see Annex C). This Standard Practice shall remain silent on the validity of those other standards of prior or subsequent dates of issue even though applicable provisions may not have changed.”

By publication of this Standard Practice, no position is taken with respect to the validity of any potential claim(s) or of any patent rights in connection therewith. MSS shall not be held responsible for identifying any patent rights. Users are expressly advised that determination of patent rights and the risk of infringement of such rights are entirely their responsibility.

For all MSS Standard Practices, the term “shall” means “must” and “shall not” means “must not”.

In this Standard Practice, all text, notes, annexes, tables, figures, and references are construed to be “normative” and essential to understand the standard’s message. All appendices, footnotes, or other information denoted as “supplemental”, that may be included within this Standard Practice, DO NOT include mandatory or normative requirements.

The U.S. customary units and SI (metric) units in this Standard Practice are regarded separately as the standard; each should be used independently of the other and may not be technically equivalent. Combining or converting values between the two systems may result in non-conformance with this Standard Practice.

This Standard Practice has been substantively revised from the previous 2014 edition. It is suggested that if the user is interested in knowing what changes have been made, that a direct page by page comparison should be made of this document and that of the previous edition.

Non-toleranced dimensions in the Standard Practice are nominal unless otherwise specified.

Excerpts of this Standard Practice may be quoted with written permission. Credit lines should read ‘Extracted from MSS SP-136-2020 with permission of the publisher, Manufacturers Standardization Society of the Valve and Fittings Industry’. TABLE OF CONTENTS**SECTION**

1	SCOPE	1
2	VALVE DESIGNATION, CLASSES, AND SIZES	1
3	PRESSURE-TEMPERATURE RATINGS	2
4	MATERIALS	3
5	DESIGN	3
6	WORKMANSHIP	5
7	TESTING	5
8	MARKING	6
9	COATING AND PAINTING	6

TABLE

1	Pressure-Temperature Ratings, ASTM A395/A395M, Non-Shock, psi	7
2	Pressure-Temperature Ratings, ASTM A536, Non-Shock, psi	7
3	Shell Test Pressure	8
4	Minimum Duration of Tests	8
B1	Pressure-Temperature Ratings, ASTM A395/A395M, Non-Shock, bar	11
B2	Pressure-Temperature Ratings, ASTM A536, Non-Shock, bar	11

FIGURE

A1	Full-Waterway Metal-to-Metal Seat Type I	9
A2	Full-Waterway Composition-to-Metal Seat Type II	9
A3	Clear-Waterway Metal-to-Metal Seat Type III	10
A4	Clear-Waterway Composition-to-Metal Seat Type IV	10

ANNEX

A	Valve Types – Figures A1 through A4	9
B	Pressure-Temperature Ratings in SI (Metric) Units	11
C	Referenced Standards and Applicable Dates	12
