# About The Author

Stephen A. Van Note is managing director of product development for the International Code Council® (ICC), where he is responsible for developing technical resource materials in support of the International Codes. He also manages the review and technical editing of staff-written publications as well as those written by external authors. In addition, Van Note develops and presents *International Residential Code* seminars nationally. Prior to joining ICC in 2006, Van Note was a building official for Linn County, Iowa. He has 15 years of experience in code administration and enforcement, and more than 20 years of experience in the construction field, including project planning and management for residential, commercial, and industrial buildings. A certified building official and plans examiner, Van Note also holds certifications in several inspection categories.

# Figures

## **Chapter 2. Fire Safety**

2.1	Exterior wall location near lot line for dwellings without fire sprinklers	17
2.2	Exterior wall location near lot line for dwellings with fire sprinklers	18
2.3	Fire-resistant-rated separation between dwelling units of duplex	20
2.4	Fire-resistant-rated common wall between townhomes	21
2.5	Garage separation from dwelling (habitable space above garage)	24
2.6	Emergency escape and rescue windows	33
2.7	Window well for emergency escape and rescue opening	34

## **Chapter 3. Safe and Healthy Living Environments**

3.1	Landings at exterior doors	39
3.2	Stair tread and riser detail	42
3.3	Stair and handrail	44

3.4	Handrail shapes	46
3.5	Winder treads	47
3.6	Determining required guard locations	49
3.7	Guard dimensions	50
3.8	Window sill height	52
3.9	Minimum bathroom fixture clearances	58
3.10	Safety glazing	60
3.11	Glazing adjacent to stairs and bottom landing of a stairway	61

## **Chapter 4. Foundations**

4.1	Concrete foundation detail	74
4.2	Foundation drain	79

## **Chapter 5. Floors**

5.1	Cutting, notching, and drilling	95
5.2	Placement of lag screws and bolts in ledgers	104
5.3	Deck ledger connection to structure	107
5.4	Deck post to deck beam connection	108

## **Chapter 6. Wall Construction**

6.1	Notching and bored hole limitations for exterior walls and bearing walls	124
6.2	Notching and bored hole limitations for interior nonbearing walls	126
6.3	Top plate framing to accommodate piping	127

6.4	Method PFH: portal frame with hold-downs	145
6.5	Method PFG: portal frame at garage door openings in seismic design categories A, B, and C	147
6.6	Method CS-PF: continuously sheathed portal frame panel construction	148
6.7	Simple bracing	153

## **Chapter 7. Wall Covering**

7.1a	Masonry veneer details at foundation and sill	178
7.1b	Masonry veneer details at soffit and lintel	179

## **Chapter 8. Roof Framing**

8.1	Cutting, notching, and drilling	192
-----	---------------------------------	-----

## **Chapter 10. Chimneys and Fireplaces**

10.1	Chimney height above roof	209
10.2	Chimney cricket	212

## **Chapter 13. Fuel Gas**

13.1	All combustion air from indoors	243
13.2	All combustion air from outdoors	245
13.3	All combustion air from outdoors through one opening	246

**13.4 Gas vent termination locations**

(for listed caps 12 in. or smaller, at least 8 ft. from a vertical wall)	255
---	-----

**Chapter 14. Plumbing**

14.1 Protection of piping against physical damage	264
14.2 Air gap	267
14.3 Trap arm length to vent	279
14.4 Island venting	283
14.5 Air admittance valve	284
14.6 Dishwasher drain	288
14.7 Water heater elevation in garage	291

**Chapter 15. Electrical Systems**

15.1 Service working space and clearances	295
15.2 Receptacle outlet locations	318
15.3 Kitchen counter receptacle outlet locations	319
15.4 Luminaires in clothes closets	328
