

NATIONAL BOARD INSPECTION CODE

2019 EDITION

DATE OF ISSUE — JULY 1, 2019

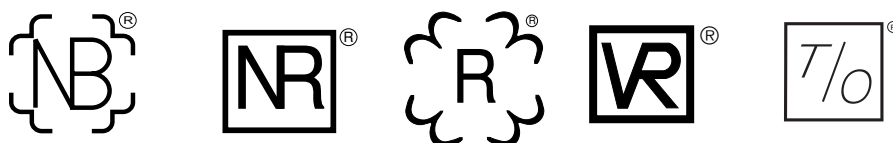

This code was developed under procedures accredited as meeting the criteria for American National Standards. The Consensus Committee that approved the code was balanced to ensure that individuals from competent and concerned interests had an opportunity to participate. The proposed code was made available for public review and comment, which provided an opportunity for additional public input from industry, academia, regulatory and Jurisdictional agencies, and the public-at-large.

The National Board does not “approve,” “rate,” or “endorse” any item, construction, proprietary device, or activity.

The National Board does not take any position with respect to the validity of any patent rights asserted in connection with any items mentioned in this document, and does not undertake to insure anyone utilizing a standard against liability for infringement of any applicable Letters Patent, nor assume any such liability. Users of a code are expressly advised that determination of the validity of any such patent rights, and the risk of infringement of such rights, is entirely their own responsibility.

Participation by federal agency representative(s) or person(s) affiliated with industry is not to be interpreted as government or industry endorsement of this code.

The National Board accepts responsibility for only those interpretations issued in accordance with governing National Board procedures and policies that preclude the issuance of interpretations by individual committee members.

The above National Board symbols are registered with the US Patent Office.

“National Board” is the abbreviation for The National Board of Boiler and Pressure Vessel Inspectors.

No part of this document may be reproduced in any form, in an electronic retrieval system or otherwise, without the prior written permission of the publisher.

All charts, graphs, tables, and other criteria that have been reprinted from the *ASME Boiler and Pressure Vessel Code*, Sections I, IV, VIII, and X are used with the permission of the American Society of Mechanical Engineers. All Rights Reserved.

PART 3 — REPAIRS AND ALTERATIONS

TABLE OF CONTENTS

Introduction	X
Foreword	XIV
Personnel	XVI
Section 1	General and Administrative Requirements	1
1.1	Scope	1
1.2	Construction Standards for Pressure-Retaining Items	1
1.3	Inspector	2
1.3.1	Authorization	2
1.3.2	Acceptance Inspection	2
1.4	Accreditation	2
1.4.1	Accreditation Process	3
1.4.2	National Board “R” Symbol Stamp	3
1.5	Quality System	3
1.5.1	Outline of Requirements for a Quality System for Qualification for the National Board “R” <i>Certificate of Authorization</i>	3
1.6	“NR” Program Requirements	8
1.6.1	Scope	8
1.6.2	General	8
1.6.2.1	Definitions	9
1.6.3	Prerequisites for Issuing a National Board “NR” <i>Certificate of Authorization</i>	10
1.6.4	Obtaining or Renewing a National Board “NR” <i>Certificate of Authorization</i>	11
1.6.5	Quality Assurance Program	11
1.6.6	Quality Assurance Program Requirements for Category 1 Activities	12
1.6.6.1	Scope	12
1.6.6.2	Quality Program Elements	12
1.6.7	Quality Assurance Program Requirements for Category 2 Activities	19
1.6.7.1	Scope	19
1.6.7.2	Quality Program Elements	19
1.6.8	Quality Assurance Program Requirements for Category 3 Activities	26
1.6.8.1	Scope	26
1.6.8.2	Quality Program Elements	27
1.6.9	Interface with the Owner’s Repair/Replacement Program (For Categories 1, 2, and 3 as Applicable)	31
Section 2	Welding and Heat Treatment	34
2.1	Scope	34
2.2	Welding, Brazing and Fusing	34
2.2.1	Procedure Specifications	34
2.2.2	Standard Welding Procedure Specifications	34
2.2.3	Performance Qualification	34
2.2.4	Qualification Records	34
2.2.5	Qualified Personnel Identification	35
2.2.6	Continuity of Qualified Personnel	35
2.2.6.1	Process Continuity Records	35
2.3	Standard Welding Procedure Specifications	35
2.4	AWS Reference Standards	41
2.5	Heat Treatment	41
2.5.1	Preheating	41
2.5.2	Postweld Heat Treatment (PWHT)	43
2.5.3	Alternative Welding Methods Without Postweld Heat Treatment	45
2.5.3.1	Welding Method 1	46
2.5.3.2	Welding Method 2	47

2.5.3.3	Welding Method 3	48
2.5.3.4	Welding Method 4	49
2.5.3.5	Welding Method 5	51
2.5.3.6	Welding Method 6	51
Section 3	Requirements for Repairs and Alterations	53
3.1	Scope	53
3.2	General Requirements for Repairs and Alterations	53
3.2.1	Material Requirements for Repairs and Alterations	53
3.2.2	Replacement Parts	53
3.2.3	Drawings	54
3.2.4	Design Requirements for Repairs and Alterations	54
3.2.5	Calculations	55
3.2.6	Reference to Other Codes and Standards	55
3.2.7	Change of Service	55
3.3	Repairs to Pressure-Retaining Items	55
3.3.1	Defect Repairs	55
3.3.2	Routine Repairs	55
3.3.3	Examples of Repairs	56
3.3.4	Repair Methods	57
3.3.4.1	Scope	57
3.3.4.2	Defect Repairs	58
3.3.4.3	Wasted Areas	60
3.3.4.4	Seal Welding	66
3.3.4.5	Re-Ending or Piecing Pipes or Tubes	67
3.3.4.6	Patches	68
3.3.4.7	Stays	70
3.3.4.8	Repair of Pressure-Retaining Items Without Complete Removal of Defects	70
3.3.4.9	Tube Plugging in Firetube Boilers	71
3.3.5	Repair of ASME Section VIII, Division 2 or 3, Pressure Vessels	71
3.3.5.1	Scope	71
3.3.5.2	Repair Plan	71
3.4	Alterations	72
3.4.1	Re-Rating	72
3.4.2	Alterations Based on Allowable Stress Values	72
3.4.3	Encapsulation	73
3.4.4	Examples of Alterations	74
3.4.5	Alteration of ASME Code Section VIII, Division 2 or 3, Pressure Vessels	75
3.4.5.1	Alteration Plan	75
Section 4	Examination and Testing	76
4.1	Scope	76
4.2	Nondestructive Examination	76
4.3	Pressure Gages, Measurement, Examination, and Test Equipment	76
4.4	Examination and Test for Repairs and Alterations	76
4.4.1	Test or Examination Methods Applicable to Repairs	76
4.4.2	Test or Examination Methods Applicable to Alterations	79
Section 5	Certification/Documentation and Stamping	81
5.1	Scope	81
5.2	Documentation	81
5.2.1	Preparation of Form R-1 (Report of Repair)	81
5.2.2	Preparation of Form R-2 (Report of Alteration)	81
5.2.3	Preparation of Form R-3 Report of Parts Fabricated by Welding	82
5.2.4	Preparation of Form R-4 Report Supplement Sheet	82
5.3	Distribution of Form R-1	82
5.4	Distribution of Form R-2	82
5.5	Registration of Forms – General	82
5.5.1	Registration for Repairs	83

5.5.2	Registration for Alterations	83
5.5.3	Registration for Fiber-Reinforced Vessels	83
5.5.4	Registration for Nuclear Repair/Replacement Activities	83
5.5.5	Registration for Graphite Vessels	83
5.6	Form Registration Log	83
5.7	Stamping Requirements for Repairs and Alterations	83
5.7.1	General	83
5.7.2	Stamping Requirements for Repairs	84
5.7.3	Stamping Requirements for Alterations	84
5.7.4	Stamping Requirements for Parts	84
5.7.5	Specific Requirements for Stamping and Nameplates	84
5.8	Stamping for Fiber-Reinforced Vessels	86
5.8.1	Stamping for Repairs	86
5.8.2	Stamping for Alterations	86
5.9	Stamping Requirements for Yankee Dryers	87
5.10	Alternative Marking and Stamping for Graphite Pressure Equipment	87
5.11	Removal of Original Stamping or Nameplate	88
5.12	Repair and Alteration Forms and Instructions for Completing Forms	88
5.12.1	Form R-1, <i>Report of Repair</i>	88
5.12.2	Form R-2, <i>Report of Alteration</i>	88
5.12.3	Form R-3, <i>Report of Parts Fabricated By Welding</i>	88
5.12.4	Form R-4, <i>Report Supplementary Sheet</i>	88
5.12.4.1	Instructions for Completing National Board Form R-1 Report	88
5.12.4.2	Instructions for Completing National Board Form R-2 Report	90
5.12.4.3	Instructions for Completing National Board Form R-3 Report	93
5.12.4.4	Instructions for Completing National Board Form R-4 Report	95
5.12.5	Form NR-1, <i>Nuclear Components and Systems in Nuclear Power Plants</i>	96
5.12.5.1	Guide for Completing National Board Form NR-1 Reports of Repair/Replacement Activities for Nuclear Facilities	96
5.12.6	Form NVR-1, <i>Nuclear Pressure Relief Devices</i>	97
5.12.6.1	Guide for Completing National Board Form NVR-1 Reports of Repair/Replacement Activities for Nuclear Pressure Relief Devices	97
Section 6	Supplements	113
Supplement 1	Steam Locomotive Firetube Boiler Repairs	113
S1.1	Scope	113
S1.1.1	Federal Railroad Administration (FRA)	113
S1.1.2	Requirements for Welding Activities	113
S1.1.3	Materials	113
S1.1.3.1	Material List for Steam Locomotive Boilers	113
S1.1.4	Formula and Calculations for Steam Locomotive Boilers	114
S1.2	Locomotive Firetube Boiler Repairs	115
S1.2.1	Repair of Staybolt Holes	115
S1.2.2	Threaded Staybolts	115
S1.2.3	Ball Socket-Type Flexible Staybolts, Sleeves, and Caps	117
S1.2.4	Seal Welded Staybolts	120
S1.2.5	Welded Installation of Staybolts	121
S1.2.5.1	Un-Threaded Fillet-Welded Staybolts	121
S1.2.6	Diagonal Braces, Gusset Braces, and Throat Sheet/Tubesheet Braces	121
S1.2.6.1	Girder Stays and Crown Bars	123
S1.2.6.2	Sling Stays	124
S1.2.6.3	Expansion Stays	125
S1.2.7	Threaded Studs	127
S1.2.8	Patch Bolts	127
S1.2.9	Flues, Arch Tubes, Circulators, Thermic Syphons	128
S1.2.9.1	Flue and Tube Re-Ending	129
S1.2.9.2	Arch Tubes	129
S1.2.9.3	Tube Wall Thickness for Arch Tubes	131

S1.2.9.4	Thermic Syphons	131
S1.2.9.5	Circulators	133
S1.2.9.6	Installation of Boiler Flues	133
S1.2.9.7	Ferrules	134
S1.2.10	Repairs and Alterations to Boiler Barrel Unstayed Areas	134
S1.2.11	Repairs and Alterations to Boiler Barrel Stayed Area	135
S1.2.11.1	Firebox Sheet Repair	135
S1.2.11.2	Fireboxes and Other Stayed Area Patches	135
S1.2.11.3	Repair of Stayed Firebox Sheets Grooved or Wasted at the Mudring	136
S1.2.11.4	Mudring Repairs	137
S1.2.11.5	Repair of Firebox, Wrapper, and Tubesheet Knuckles	138
S1.2.11.6	Tubesheet Repairs	144
S1.2.12	Seams and Joints	145
S1.2.12.1	Caulking Riveted Seams and Rivet Heads	145
S1.2.12.2	Threaded Openings in Vessel Walls, Bushings, and Welded Nozzles (Washout Plug Holes and Other Connections)	146
S1.2.13	Fittings and Gages	147
S1.2.13.1	Water Gage Connection	147
S1.2.14	Throttle Pipes, Dry Pipes, Superheater Headers & Front End Steam Pipes	148
Supplement 2 Historical Boilers		149
S2.1	Scope	149
S2.2	Introduction	149
S2.3	Responsibilities	149
S2.4	Repairs and Alterations	149
S2.5	Construction Standards.....	149
S2.6	Accreditation.....	150
S2.7	Materials.....	150
S2.7.1	Material List for Historical Boiler Repairs	150
S2.7.2	Replacement Parts	151
S2.8	Welded Repair Inspection	151
S2.9	Welding	151
S2.10	Heat Treatment.....	151
S2.11	Nondestructive Examination and Testing	152
S2.12	Documentation	152
S2.13	Repair Methods	152
S2.13.1	Repair of Threaded Staybolt Holes	152
S2.13.2	Installation of Threaded Staybolts	153
S2.13.3	Seal Welding of Threaded Staybolts	154
S2.13.4	Installation of Welded Staybolts	155
S2.13.5	Threaded Studs.....	156
S2.13.6	Patch Bolts	156
S2.13.7	Flue and Tube Re-Ending	157
S2.13.8	Flue and Tube Installation	159
S2.13.9	Repairs and Alterations to Unstayed Areas.....	161
S2.13.9.1	Weld Buildup of Wastage and Grooving in Unstayed Areas	161
S2.13.9.2	Welded Repair of Cracks in Unstayed Areas	162
S2.13.9.3	Welded Flush Patches in Unstayed Areas	162
S2.13.9.4	Repair of Cracks, Grooving, and Wastage Using a Riveted Patch in Unstayed Areas	163
S2.13.9.5	Barrel Replacement.....	164
S2.13.10	Repairs and Alterations to Stayed Areas.....	165
S2.13.10.1	Weld Buildup of Wastage and Grooving in Stayed Areas	165
S2.13.10.2	Welded Repair of Cracks in Stayed Areas	165
S2.13.10.3	Welded Flush Patches in Stayed Areas	165
S2.13.10.4	Repair of Stayed Firebox Sheets Grooved or Wasted at the Mudring	166
S2.13.11	Repair of Firebox and Tubesheet Knuckles	168
S2.13.11.1	Weld Buildup of Wastage and Grooving in Firebox and Tubesheet Knuckles	168
S2.13.11.2	Welded Repair of Cracks in Firebox and Tubesheet Knuckles	168
S2.13.11.3	Welded Flush Patches in Firebox and Tubesheet Knuckles	169

S2.13.12	Repair of Tubesheets	171
S2.13.12.1	Weld Buildup of Wastage and Grooving in Tubesheets	171
S2.13.12.2	Welded Repair of Cracks in Tubesheets	171
S2.13.12.3	Welded Flush Patches in Tubesheets	172
S2.13.13	Seams, Joints, and Rivets	173
S2.13.13.1	Caulking Riveted Seams and Rivet Heads	173
S2.13.13.2	Rivet Holes	174
S2.13.13.3	Assembly of Riveted Joints	174
S2.13.13.4	Riveting	174
S2.13.13.5	Seal Welding Seam, Joints, and Rivet Heads	178
S2.13.14	Repair of Openings	179
S2.13.14.1	Repair of Threaded Openings	179
S2.13.14.2	Repair of Handhole Openings	179
S2.13.14.3	Repair of Fusible Plug Opening	180
S2.13.14.4	Repair of Handhole Doors	181
Supplement 3	Repair and Alteration of Graphite Pressure Equipment	182
S3.1	Scope	182
S3.2	Repairs	182
S3.3	Repairs of a Routine Nature	184
S3.4	Alterations	184
S3.5	Repair Guide for Impervious Graphite	185
S3.5.1	Introduction	185
S3.5.2	Typical Graphite Fractures	189
S3.5.2.1	Major Fracture	189
S3.5.2.2	Intermediate Fracture	189
S3.5.2.3	Minor Fracture	190
S3.5.2.4	Finishing the Repair	191
S3.5.3	Graphite Repair by Plug Stitching	191
S3.5.3.1	Plug Stitching Procedure	192
S3.5.4	Plugging or Leaking of Damaged Tubes	193
S3.5.5	Tube Replacement	195
S3.5.6	Reimpregnation of Graphite Parts (Tubesheets, Heads, and Blocks)	197
S3.5.6.1	Control of Impregnation Material	198
Supplement 4	Repair and Alteration of Fiber-Reinforced Thermosetting Plastic	
	Pressure Equipment	199
S4.1	Scope	199
S4.2	Inspector Qualifications	199
S4.3	Tools	200
S4.4	Limitations	200
S4.5	Repair Limitations for Filament Wound Vessels	200
S4.6	Vessels Fabricated Using Elevated Temperature Cured Resin Systems	200
S4.7	Code of Construction	201
S4.8	Materials	201
S4.9	Replacement Parts	201
S4.10	Secondary Bonding	201
S4.10.1	Secondary Bonding Procedure Specifications	201
S4.10.2	Performance Qualifications	202
S4.10.3	Records	202
S4.10.4	Secondary Bonder's Identification	202
S4.10.5	Secondary Bonder's Continuity	202
S4.11	Curing	202
S4.12	Nondestructive Examination	202
S4.13	Pressure and Acoustic Emission Tests	207
S4.13.1	Pressure Gages, Measurement, and Examination and Test Equipment	207
S4.14	Acceptance Inspection	207
S4.14.1	Stamping	207
S4.14.2	Documentation	207

S4.14.3	Registration of Documentation	207
S4.14.4	Distribution of Documentation	207
S4.15	Pressure Testing For Repairs	207
S4.16	Additional Requirements for Repairs	208
S4.16.1	Scope	208
S4.16.2	Drawings	208
S4.16.3	Repair Plan	208
S4.16.4	Routine Repairs	209
S4.16.5	Repair Methods	209
S4.17	Additional Requirements for Alterations	209
S4.17.1	Scope	209
S4.17.2	Design	209
S4.17.3	Alteration Plan	210
S4.17.4	Calculations	210
S4.17.5	Re-Rating	210
S4.17.6	Pressure Testing	211
S4.18	Repair and Alteration Methods	212
S4.18.1	General Requirements	212
S4.18.2	Classification of Repairs	212
S4.18.2.1	Type 1A – Repair of the Corrosion Barrier	212
S4.18.2.2	Type 1B – Repair of the Corrosion Barrier for Vessels with Precision Bores	214
S4.18.2.3	Type 2 – Corrosion Barrier and Internal Structural Layer Repairs	216
S4.18.2.4	Type 3 – External Structural Layer Repairs	216
S4.18.2.5	Type 4 – Alterations	218
S4.18.2.6	Type 5 – Miscellaneous General External Repairs or Alterations	218
S4.18.2.7	Type 6 – Thermoplastic Repairs	218
S4.18.2.8	Type 7 – Gel Coat Repairs	219
Supplement 5	General Requirements for Repairs and Alterations to Yankee Dryers	220
S5.1	Scope	220
S5.2	Examinations and Test Methods	220
S5.3	Yankee Dryer Repair Methods	220
S5.3.1	Replacement Parts for Yankee Dryers	220
S5.4	Repair Guide for Yankee Dryers	220
S5.5	Procedures That Do Not Require Stamping or Nameplate Attachment	221
S5.6	Damage Repair	221
S5.6.1	Repair of Local Thinning	221
S5.6.2	Treatment of Crack-Like Flaws	222
S5.6.3	Driven Plug Repair	223
S5.6.4	Threaded Plug Repair	223
S5.7	Alterations to Yankee Dryers	223
S5.7.1	Scope	223
S5.7.2	Alteration Types	223
Supplement 6	Repair, Alteration, and Modification of DOT Transport Tanks	225
S6.1	Scope	225
S6.2	Definitions	225
S6.3	Construction Standards	225
S6.4	Accreditation and Registration	225
S6.5	Materials	225
S6.6	Replacement Parts	225
S6.7	Authorization	226
S6.8	Inspection	226
S6.8.1	Inspector Duties for Repairs, Alterations, and Modifications	226
S6.9	Welding	227
S6.9.1	Welding Procedure Specification	227
S6.9.2	Standard Welding Procedure Specifications	227
S6.9.3	Performance Qualification	227
S6.9.4	Welding Records	227

S6.9.5	Welders' Identification	228
S6.9.6	Welders' Continuity	228
S6.10	Heat Treatment.....	228
S6.10.1	Preheating	228
S6.10.2	Postweld Heat Treatment	228
S6.10.3	Alternatives to Postweld Heat Treatment	228
S6.11	Nondestructive Examination.....	229
S6.12	Coatings and Linings.....	229
S6.13	Measurement, Examination, and Test Equipment	229
S6.14	Acceptance Inspection	229
S6.15	General Stamping Requirements.....	229
S6.15.1	Specific "R" Stamping and Nameplate Requirements.....	230
S6.15.2	Removal of Original Stamping or Nameplate	230
S6.16	"R" Forms	230
S6.16.1	Documentation	230
S6.16.2	Preparation of "R" Forms.....	231
S6.16.3	Distribution	231
S6.16.4	Registration of Form R-1 and Form R-2.....	231
S6.17	Additional Requirements for Repairs, Alterations, or Modifications.....	231
S6.17.1	Scope	231
S6.17.2	Repairs of Defects.....	231
S6.17.3	Modifications	231
S6.17.4	Drawings	231
S6.17.5	Authorization	232
S6.18	Examination and Test.....	232
S6.18.1	Methods.....	232
S6.19	Repairs, Alterations, or Modification Reports	233
Supplement 7 Repair and Alterations of Pressure Vessels in Liquefied Petroleum Gas Service		234
S7.1	Scope	234
S7.2	General and Administrative Requirements	234
S7.3	Welding	234
S7.4	Requirements for Repairs and Alterations	234
S7.5	Requirements for Change of Service from Above Ground to Underground Service	234

10.1	Scope	259
Section 11	Index	269

INTRODUCTION

It is the purpose of the *National Board Inspection Code* (NBIC) to maintain the integrity of pressure-retaining items by providing rules for post-construction activities including installation, and after the items have been placed into service, by providing rules for inspection and repair and alteration, thereby ensuring that these items may continue to be safely used.

The NBIC is intended to provide rules, information, and guidance to manufacturers, Jurisdictions, inspectors, owner-users, installers, contractors, and other individuals and organizations performing or involved in post-construction activities, thereby encouraging the uniform administration of rules pertaining to pressure retaining items.

SCOPE

The NBIC recognizes three important areas of post-construction activities where information, understanding, and following specific requirements will promote public and personal safety. These areas include:

- Installation
- Inspection
- Repairs and Alterations

The NBIC provides rules, information, and guidance for post-construction activities, but does not provide details for all conditions involving pressure-retaining items. Where complete details are not provided in this code, the code user is advised to seek guidance from the Jurisdiction and from other technical sources.

The words shall, should, and may are used throughout the NBIC and have the following intent:

- Shall – action that is mandatory and required.
- Should – indicates a preferred but not mandatory means to accomplish the requirement unless specified by others such as the Jurisdiction.
- May – permissive, not required or a means to accomplish the specified task.

ORGANIZATION

The NBIC is organized into four parts to coincide with specific post-construction activities involving pressure-retaining items. Each part provides general and specific rules, information, and guidance within each applicable post-construction activity. Other NBIC parts or other published standards may contain additional information or requirements needed to meet the rules of the NBIC. Specific references are provided in each part to direct the user where to find this additional information. NBIC parts are identified as:

- Part 1, Installation – This part provides requirements and guidance to ensure all types of pressure retaining items are installed and function properly. Installation includes meeting specific safety criteria for construction, materials, design, supports, safety devices, operation, testing, and maintenance.
- Part 2, Inspection – This part provides information and guidance needed to perform and document inspections for all types of pressure-retaining items. This part includes information on personnel safety, non-destructive examination, tests, failure mechanisms, types of pressure equipment, fitness for service, risk-based assessments, and performance-based standards.
- Part 3, Repairs and Alterations – This part provides requirements and guidance to perform, verify, and document acceptable repairs or alterations to pressure retaining items regardless of code of construction. Alternative methods for examination, testing, heat treatment, etc., are provided when the original code of construction requirements cannot be met. Specific acceptable and proven repair methods are also provided.
- Part 4, Pressure Relief Devices – This part provides information and guidance to ensure pressure relief devices are installed properly, information and guidance needed to perform and document inspections for pressure relief devices, and information and guidance to perform, verify, and document acceptable repairs to pressure relief devices.

Each NBIC part is divided into major sections as outlined in the Table of Contents.

Tables, charts, and figures provide relevant illustrations or supporting information for text passages, and are designated with numbers corresponding to the paragraph they illustrate or support within each section. Multiple tables, charts, or figures referenced by the same paragraph will have additional letters reflecting the order of reference. Tables, charts, and figures are located in or after each major section within each NBIC part.

TEXT IDENTIFICATION AND NUMBERING

Each page in the text will be designated in the top header with the publication's name, part number, and part title. The numbering sequence for each section begins with the section number followed by a dot to further designate major sections (e.g., 1.1, 1.2, 1.3). Major sections are further subdivided using dots to designate subsections within that major section (e.g., 1.1.1, 1.2.1, 1.3.1). Subsections can further be divided as necessary. Paragraphs under sections or subsections shall be designated with small letters in parenthesis (e.g., a), b), c)) and further subdivided using numbers in parenthesis (e.g., 1), 2), 3)).

Subdivisions of paragraphs beyond this point will be designated using a hierarchical sequence of letters and numbers followed by a dot.

Example: 2.1 Major Section
 2.1.1 Section
 2.1.2 Section
 2.1.2. Subsection
 a) paragraph
 b) paragraph
 1) subparagraph
 2) subparagraph
 a. subdivisions
 1. subdivisions
 2. subdivisions
 b. subdivisions
 1. subdivisions
 2. subdivisions

Tables and figures will be designated with the referencing section or subsection identification. When more than one table or figure is referenced in the same section or subsection, letters or numbers in sequential order will be used following each section or subsection identification.

SUPPLEMENTS

Supplements are contained in each part of the NBIC to provide requirements and guidance only pertaining to a specific type of pressure-retaining item (e.g., Locomotive Boilers, Historical Boilers, Graphite Pressure Vessels.) Supplements follow the same numbering system used for the main text only preceded by the Letter "S." Each page of the supplement will be tabbed to identify the supplement number.

EDITIONS

Editions, which include revisions and additions to this code, are published every two years. Editions are permissive on the date issued and become mandatory six months after the date of issue.

CODE STAMPING

ASME Code "Stamping" referenced throughout the NBIC includes the ASME Boiler and Pressure Vessel Code Symbol Stamps used for conformity assessment prior to the 2010 edition/2011 addendum and the equivalent ASME Certification Mark with Designator required to meet the later editions of the ASME Boiler and Pressure Vessel Code Sections. When other construction codes or standards are utilized for repairs or alterations, stamping shall mean the identification symbol stamp required by that code or standard.
