Table of Contents

1. Scope	1
1.1 Products and Applications Included	1
1.2 Regulatory and Other Requirements	1
1.3 Fiber Optic Topologies.....	1
2.1 Definitions	3
2.2 Abbreviations And Acronyms.....	6
3. Safety and Cautions for Fiber Optic Installation.....	7
3.1 Fiber Optic Installation Safety	7
3.2 Cleanliness	8
4. Installation Requirements	9
4.1 General Guidelines	9
4.2 Support Structures	9
4.3 Removal of Abandoned Cables	9
4.4 Fire Stopping	10
4.5 Grounding and Bonding	10
5. Fiber Optic Cables.....	11
5.1 Cable Types.....	11
5.2 Flammability — Cable Ratings and Markings	12
5.3 Fiber Optic Cable Color Codes	12
5.4 Installing Fiber Optic Cable.....	13
5.5 Cable Plant Hardware	15
5.6 Use of Cable Ties.....	15
6. Fiber Optic Termination.....	16
6.1 General.....	16
6.2 Fiber Optic Connectors	16
6.3 Fiber Optic Splices	18
7. Testing the Installed Fiber Optic Cable Plant.....	19
7.1 General.....	19
7.2 Continuity Testing.....	19
7.3 Insertion Loss	19
7.4 OTDR Testing.....	19
8. Administration, Management, and Documentation	21
8.1 General.....	21

Annex A: Calculating the Loss Budget for a Fiber Optic Cable Plant.....	22
A.1 Information Necessary to Calculate Loss Budget.....	22
A.3 Calculate the fiber loss:	23
A.4 Calculate the connector loss:	23
A.5 Calculate the splice loss:.....	24
A.6 To calculate the total cable loss, add the losses calculated above:	24
A.7 Interpreting the result:	24
Annex B: Field Test Requirements	25
B.1 General.....	25
B.2 Insertion Loss Of Fiber Optic Cables.....	25
B.3 OTDR Testing.....	27
Annex C: Reference Standards.....	29

(This foreword is not a part of the standard)

Foreword

National Electrical Installation Standards™ are designed to improve communication among specifiers, purchasers, and suppliers of electrical construction services. They define a minimum baseline of quality and workmanship for installing electrical products and systems. *NEIS®* are intended to be referenced in contract documents for electrical construction projects. The following language is recommended:

Fiber optic cables shall be installed in accordance with NECA/FOA 301, *Standard for Installing and Testing Fiber Optics*.

Use of *NEIS®* is voluntary, and neither the National Electrical Contractors Association nor the Fiber Optic Association assumes any obligation or liability to users of this publication. Existence of a standard shall not preclude any member or nonmember of NECA or FOA from specifying or using alternate construction methods permitted by applicable regulations.

The installation and maintenance practices recommended by this publication are intended to comply with the edition of the National Electrical Code (NEC) in effect at the time of publication. Because they are quality standards, *NEIS®* may in some instances go beyond the minimum requirements of the NEC. It is the responsibility of users of this standard to comply with state and local electrical codes when installing electrical products and systems.

Suggestions for revisions and improvements to this standard are welcome. They should be addressed to:
