

ANSI C12.11-2007

American National Standard

for Instrument Transformers for
Revenue Metering
10kV BIL through 350 kV BIL
(0.6 kV NSV through 69 kV NSV)

ANSI C12.11-2007
Revision of
ANSI C12.11-2006

American National Standard

For Instrument Transformers for Revenue Metering
10kV BIL through 350 kV BIL
(0.6 kV NSV through 69 kV NSV)

Secretariat:

National Electrical Manufacturers Association

Approved November 6, 2007

American National Standards Institute, Inc.

NOTICE AND DISCLAIMER

The information in this publication was considered technically sound by the consensus of persons engaged in the development and approval of the document at the time it was developed. Consensus does not necessarily mean that there is unanimous agreement among every person participating in the development of this document.

NEMA standards and guideline publications, of which the document contained herein is one, are developed through a voluntary consensus standards development process. This process brings together volunteers and/or seeks out the views of persons who have an interest in the topic covered by this publication. While NEMA administers the process and establishes rules to promote fairness in the development of consensus, it does not write the document and it does not independently test, evaluate, or verify the accuracy or completeness of any information or the soundness of any judgments contained in its standards and guideline publications.

NEMA disclaims liability for any personal injury, property, or other damages of any nature whatsoever, whether special, indirect, consequential, or compensatory, directly or indirectly resulting from the publication, use of, application, or reliance on this document. NEMA disclaims and makes no guaranty or warranty, express or implied, as to the accuracy or completeness of any information published herein, and disclaims and makes no warranty that the information in this document will fulfill any of your particular purposes or needs. NEMA does not undertake to guarantee the performance of any individual manufacturer or seller's products or services by virtue of this standard or guide.

In publishing and making this document available, NEMA is not undertaking to render professional or other services for or on behalf of any person or entity, nor is NEMA undertaking to perform any duty owed by any person or entity to someone else. Anyone using this document should rely on his or her own independent judgment or, as appropriate, seek the advice of a competent professional in determining the exercise of reasonable care in any given circumstances. Information and other standards on the topic covered by this publication may be available from other sources, which the user may wish to consult for additional views or information not covered by this publication.

NEMA has no power, nor does it undertake to police or enforce compliance with the contents of this document. NEMA does not certify, test, or inspect products, designs, or installations for safety or health purposes. Any certification or other statement of compliance with any health or safety-related information in this document shall not be attributable to NEMA and is solely the responsibility of the certifier or maker of the statement.

AMERICAN NATIONAL STANDARD

Approval of an American National Standard requires verification by ANSI that the requirements for due process, consensus, and other criteria for approval have been met by the standards developer.

Consensus is established when, in the judgment of the ANSI Board of Standards Review, substantial agreement has been reached by directly and materially affected interests. Substantial agreement means much more than a simple majority, but not necessarily unanimity. Consensus requires that all views and objections be considered, and that a concerted effort be made toward their resolution.

The use of American National Standards is completely voluntary; their existence does not in any respect preclude anyone, whether he has approved the standards or not, from manufacturing, marketing, purchasing, or using products, processes, or procedures not conforming to the standards.

The American National Standards Institute does not develop standards and will in no circumstances give an interpretation of any American National Standard. Moreover, no person shall have the right or authority to issue an interpretation of an American National Standard in the name of the American National Standards Institute. Requests for interpretations should be addressed to the secretariat or sponsor whose name appears on the title page of this standard.

Caution Notice: This American National Standard may be revised or withdrawn at any time. The procedures of the American National Standards Institute require that action be taken periodically to reaffirm, revise, or withdraw this standard. Purchasers of American National Standards may receive current information on all standards by calling or writing the American National Standards Institute.

Contents

	Page
1 Scope.....	1
2 References	1
3 Definitions	1
3.1 Accuracy Class	1
3.2 Indoor Applications of Instrument Transformers	1
4 General Requirements	1
4.1 ANSI / IEEE C57.13 Provisions	1
4.2 Metric Conversion.....	2
4.3 Space for User Identification	2
4.4 Serial Numbers	2
5 Current Transformers	2
5.1 Nameplates.....	2
5.1.1 Ratio Marking Syntax	2
5.1.2 Ratio Marking	2
5.1.3 Tapped-secondary Current Transformer Secondary Terminal Indication.....	2
5.1.4 Indoor Application Rating Factor	2
5.1.5 Bar Code.....	2
5.2 Primary Rating Marking on Body of Current Transformers	2
5.3 Terminals	3
5.3.1 Primary Terminals	3
5.3.2 Secondary Terminals and Voltage Terminals	3
5.4 Polarity Marking	3
5.4.1 Polarity Marking Permanence	3
5.4.2 Polarity Marking Contrast	3
5.4.3 Polarity Marking Relief.....	3
5.4.4 Primary and Secondary Polarity Marks	3
5.4.5 Direct Burial Polarity Marking	3
5.5 Test Card	3
5.6 Effect of Cooling Air Temperature on Permissible Temperature Rise for 55 °C Rise Transformers	4
5.7 Indoor and Outdoor Current Transformers, 10 kV BIL (0.6 kV NSV)	4
5.7.1 Electrical Characteristics and Dimensions	4
5.7.2 Current Ratings	4
5.8 Indoor Current Transformers, 60 kV BIL through 110 kV BIL (4.8 kV NSV through 14.4 kV NSV)	12
5.8.1 Electrical Characteristics and Dimensions	12
5.8.2 Current Ratings	14
5.9 Outdoor Current Transformers, 60 kV BIL through 110 kV BIL (4.8 kV NSV through 14.4 kV NSV)	14
5.9.1 Electrical Characteristics and Dimensions	14
5.9.2 Current Ratings	14
5.10 Small-Size Outdoor Current Transformers, 125 kV BIL through 200kV BIL (25 kV NSV through 34.5 kV NSV)	14
5.10.1 Electrical Characteristics and Dimensions	14
5.10.2 Current Ratings	14
5.11 Large-Size Outdoor Current Transformers, 150 kV BIL through 350 kV BIL (25 kV NSV through 69 kV NSV).....	15
5.11.1 Electrical Characteristics and Dimensions	15
5.11.2 Current Ratings	15
6 Voltage Transformers	20
6.1 Terminals	20
6.1.1 Primary Terminals	20
