

Radio-frequency Identification of Animals – Technical Concept

(Based on International Standard ISO 11785)

NZS/ISO 11785:2001

COMMITTEE REPRESENTATION

This Standard was prepared by the Radio-frequency Identification of Animals Committee for the Standards Council established under the Standards Act 1988.

The committee consisted of representatives from the following organizations:

Animal Health Board Inc.
Department of Internal Affairs
Livestock Improvement Corporation Limited
Local Government New Zealand
MAF Quality Management
NZ Kennel Club Inc.
NZ Meat Industry Association
NZ Veterinary Association Inc.
Opotiki District Council
Royal New Zealand Society for the Prevention of Cruelty to Animals

AMENDMENTS

<i>No</i>	<i>Date of issue</i>	<i>Description</i>	<i>Entered by, and date</i>

CONTENTS

Contents	1
List of Figures	1
List of Tables	2
Preface	3
Foreword	3
Introduction	4
1 Scope	7
2 Conformance	7
3 Normative references	7
4 Definitions	7
5 Abbreviations	9
6 Requirements	9
6.1 Full duplex system	10
6.2 Half duplex system	11
Annex A (informative) Integration of installed bases	14
A.1 Introduction	14
A.2 Technical characteristics of known and widely used technologies	14
A.2.1 Destron (FECAVA version) technology	14
A.2.2 Datamars technology	15
A.2.3 Trovan technology	16
A.3 Concept for including the technologies in an FDX/HDX transceiver	16
Annex B (normative) CRC check for error detection	18
B.1 Description	18
B.2 CRC check source code example	18
B.3 Reference	19
Annex C (informative) Synchronization	20
C.1 Introduction	20
C.2 Wired synchronization	20
C.3 Wireless synchronization	20

List of Figures

Figure 1 Signal structures of the FDX identification telegram	10
Figure 2 Structure of the FDX identification telegram	10
Figure 3 Timing of the decay of the activation field	11
Figure 4 Signal structures of the HDX identification telegram	12
Figure 5 Structure of the HDX identification telegram	12
Figure A.1 Signal structures of binary 0 of Destron (FECAVA version)	14
Figure A.2 Structure of the Destron (FECAVA version) identification telegram	15
Figure A.3 The structure of the Datamars identification telegram	16
Figure A.4 The structure of the Trovan identification telegram	16

Contents continued overleaf

Figure A.5 Schematic diagram of a transceiver combined
with a module to read one of the technologies
described in this annex 17

Figure B.1 Schematic diagram of the CRC check 18

Figure C.1 Interrogation protocol patterns 21
