NEW ZEALAND STANDARD

Transport of dangerous goods on land

Superseding NZS 5433.1&2:2012

This is a preview. [Click here to purchase the full publication.](#)

COMMITTEE REPRESENTATION

This standard was prepared by the P5433 Transport of Dangerous Goods on Land Committee. The membership of the committee was approved by the New Zealand Standards Approval Board and appointed by the New Zealand Standards Executive under the Standards and Accreditation Act 2015.

The committee consisted of representatives of the following nominating organisations:

Environmental Protection Authority (EPA)	MITO New Zealand Incorporated
Fire and Emergency New Zealand	New Zealand Defence Force
HazKnow Limited	New Zealand Police
KiwiRail	New Zealand Transport Agency
Liquefied Petroleum Gas Association of New Zealand	Responsible Care New Zealand
Mainfreight/Chemcouriers	Road Transport Forum NZ
Maritime NZ	Waste Management Institute New Zealand (WasteMINZ)
Ministry of Health – Office of Radiation Safety (ORS)	WorkSafe New Zealand

ACKNOWLEDGEMENT

Standards New Zealand gratefully acknowledges the contribution of time and expertise from all those involved in developing this standard.

Foreword	xii
Section	
1 GENERAL	1
1.1 Scope and purpose	1
1.2 Application	1
1.3 Overview of the standard	2
1.4 Interpretation	4
1.5 Definitions	4
1.6 Abbreviations	14
1.7 Notations	15
1.8 Summary of the requirements of the Dangerous Goods Rule	15
2 CLASSIFICATION OF DANGEROUS GOODS	20
2.1 Introduction	20
2.2 Class 1 – Explosives	34
2.3 Class 2 – Gases	38
2.4 Class 3 – Flammable liquids and desensitised explosives	40
2.5 Class 4 – Flammable solids; substances liable to spontaneous combustion; substances which, in contact with water, emit flammable gases	43
2.6 Class 5 – Oxidizing substances and organic peroxides	47
2.7 Class 6 – Toxic substances and infectious substances	50
2.8 Class 7 – Radioactive material	54
2.9 Class 8 – Corrosive substances	60
2.10 Class 9 – Miscellaneous dangerous substances and articles and environmentally hazardous substances	61
3 PACKAGING	66
3.1 Packaging used for transport of dangerous goods	66
3.2 Markings for intermediate bulk containers (IBC)	70
3.3 Markings for large packagings	73
3.4 Markings for portable tanks	74
3.5 Packagings for dangerous goods in excepted quantities	74

4	USE OF PACKAGING, INCLUDING INTERMEDIATE BULK CONTAINERS AND LARGE PACKAGINGS	75
4.1	Introduction	75
4.2	Use of portable tanks and multiple-element gas containers	78
4.3	Use of bulk containers for solid dangerous goods	79
5	MARKING AND LABELLING	84
5.1	Introduction	84
5.2	Overpack markings	84
5.3	Special marks	84
5.4	Labelling	85
5.5	Positioning of class labels	89
5.6	Empty containers	89
5.7	Salvage packagings	92
6	DOCUMENTATION	93
6.1	General	93
6.2	Dangerous goods declaration	93
6.3	Container packing certificate and vehicle packing certificate	95
6.4	Emergency response telephone number	96
6.5	Tracked substances	97
6.6	Schedule of quantity information	97
7	CHECKING DANGEROUS GOODS BEFORE TRANSPORT	98
7.1	Checks when accepting dangerous goods for transport	98
7.2	Key elements	98
7.3	Packaging unacceptable for transport	99
7.4	Labelling	101
8	SEGREGATION	102
8.1	Application	102
8.2	Separation distance	104
8.3	Food items	104
8.4	Fire risk substances	104
8.5	Segregation devices	104
8.6	Transport of dangerous goods by ship	105
9	PLACARDING	110
9.1	General	110
9.2	Design	110
9.3	Emergency information panel	111

10	TRANSPORT PROCEDURES – SPECIAL PROVISIONS AND SAFETY MEASURES	113
10.1	General.....	113
10.2	Protection from sunlight and heat	113
10.3	Number of packages	113
10.4	Temperature control provisions	113
10.5	Transport under temperature control	115
11	EMERGENCY MANAGEMENT	117
11.1	Be prepared – Have a plan	117
11.2	Seven important considerations in an emergency.....	117
11.3	Fire extinguishers.....	120
11.4	Quick-guide.....	120
11.5	Emergency procedures	120

13.1	Compliance with legislation.....	124
13.2	Monitoring to achieve and maintain full compliance.....	124
13.3	Audit process.....	124
Appendix		
A	Hazchem emergency action code key (Informative)	125
B	Dangerous goods labels and placards (Normative).....	128
C	Dangerous goods declaration example (Informative)	142
D	Load plan and packing certificate example (Informative)	145
E	Safety data sheet example (Informative).....	147
F	Specification for segregation devices (Normative).....	157
G	Transport of infectious substances (Informative)	164
H	Requirements relating to carriage of dangerous goods by sea (Informative)	169
J	Class 9 lithium batteries (Informative)	173
K	Asbestos (Normative).....	178
L	Examples of who may carry radioactive material packages (Informative)	183

Table

1a	Purpose of transport explanations.....	16
1b	Packaging and quantities.....	17
2	Dangerous goods transported for domestic or recreational purposes.....	18
3	Dangerous goods transported as tools of trade, for agricultural use, or for a commercial purpose, but not for hire or direct reward.....	18
4	Dangerous goods transported for hire or reward.....	19
5	Classes of dangerous goods	21
6	GHS/dangerous goods pictogram and classification comparisons	22
7	Precedence of hazards and packing groups for Classes 3, 4, and 8 and for Divisions 5.1 and 6.1	32
8	Division of Class 1 goods	36
9	Compatibility group and classification codes	36
10	Combination of division and compatibility group	38
11	Packing group of flammable liquids.....	42
12	Package categories by transport index and maximum radiation levels	58
13	Comparison of HSNO and UNRTDG/GHS aquatic toxicity criteria	64
14	Examples of markings for new packagings	68
15	Examples of reconditioning markings.....	69
16	Example of a salvage marking	70
17	Examples of markings for packagings for Division 6.2, infectious substances....	70
18	Markings on IBCs.....	71
19	Additional markings on IBCs.....	72
20	Markings on large packagings	74
21	Advice for circumstances when empty containers are not dangerous goods.....	91
22	Segregation of packages of dangerous goods for land transport	107
23	Additional maritime segregation requirements	109
24	Derivation of control and emergency temperatures.....	114
25	Quick-guide for management of spills and leaks.....	121
B1	Guide to minimum label and text sizes.....	128
B2	Colours of labels	130
F1	Type II segregation device tests.....	159
G1	Liquid or non-liquid infectious effluent and sludges	168
L1	Carriers of radioactive material packages	183

Figure

1	Category I – WHITE label	58
2	Category II – YELLOW label.....	59
3	Category III – YELLOW label.....	59
4	Placard	60
5	United Nations packaging symbol	67
6	Recommended method of marking the month of manufacture.....	68
7	Symbol to indicate maximum permitted stacking load	72
8	Alternative symbol to date markings	73
9	Handling label	86
10	Examples of special markings for strong acid and strong alkali.....	86
11	Package label (mark) for lithium batteries on all packages.....	87
12	Class 9 diamond label for packages containing lithium-metal and lithium-ion batteries exceeding the dangerous goods trigger levels	87
13	Marking and labelling of a combination package (fibreboard box) containing liquid inner packagings	88
14	Example of marking and labelling for a single packaging (steel drum).....	88
15	Clean and empty dangerous goods containers.....	92
16	Packing	100
17	Labelling.....	101
18	Example of emergency information panel.....	111
19	Placards and marks for diesel classified as: UN 3082, Environmentally Hazardous Substance, Liquid, N.O.S.....	112
20	Directory board for use with mixed loads	112
A1	Hazchem emergency action code	126
B1	Label details	135
J1	Lithium metal – Defibrillator battery	176
J2	Slightly more difficult determination of watt-hour rating.....	176
J3	Transport cradle	177
J4	Example of lithium-ion battery	177
J5	Example of lithium-ion battery	177
