## STANDARD FOR SAFETY

Balance-of-System Components for  
Photovoltaic Systems – Design  
Qualification Natural Environments

UL Standard for Safety for Balance-of-System Components for Photovoltaic Systems – Design Qualification Natural Environments, UL 62093

First Edition, Dated February 24, 2017

### **Summary of Topics**

***This revision of ANSI/UL 62093 dated June 3, 2021 is being issued to update the title page to reflect the most recent designation as a Reaffirmed American National Standard (ANS). No technical changes have been made.***

Text that has been changed in any manner or impacted by UL's electronic publishing system is marked with a vertical line in the margin.

The requirements are substantially in accordance with Proposal(s) on this subject dated April 2, 2021.

All rights reserved. No part of this publication may be reproduced, stored in a retrieval system, or transmitted in any form by any means, electronic, mechanical photocopying, recording, or otherwise without prior permission of UL.

UL provides this Standard "as is" without warranty of any kind, either expressed or implied, including but not limited to, the implied warranties of merchantability or fitness for any purpose.

In no event will UL be liable for any special, incidental, consequential, indirect or similar damages, including loss of profits, lost savings, loss of data, or any other damages arising out of the use of or the inability to use this Standard, even if UL or an authorized UL representative has been advised of the possibility of such damage. In no event shall UL's liability for any damage ever exceed the price paid for this Standard, regardless of the form of the claim.

Users of the electronic versions of UL's Standards for Safety agree to defend, indemnify, and hold UL harmless from and against any loss, expense, liability, damage, claim, or judgment (including reasonable attorney's fees) resulting from any error or deviation introduced while purchaser is storing an electronic Standard on the purchaser's computer system.

**First Edition**

**February 24, 2017**

This ANSI/UL Standard for Safety consists of the First Edition including revisions through June 3, 2021.

The most recent designation of ANSI/UL 62093 as a Reaffirmed American National Standard (ANS) occurred on May 18, 2021. ANSI approval for a standard does not include the Cover Page, Transmittal Pages, Title Page, or Preface. The National Difference Page and IEC Foreword are also excluded from the ANSI approval of IEC-based standards.

Comments or proposals for revisions on any part of the Standard may be submitted to UL at any time. Proposals should be submitted via a Proposal Request in UL's On-Line Collaborative Standards Development System (CSDS) at <https://csds.ul.com>.

UL's Standards for Safety are copyrighted by UL. Neither a printed nor electronic copy of a Standard should be altered in any way. All of UL's Standards and all copyrights, ownerships, and rights regarding those Standards shall remain the sole and exclusive property of UL.

|                                                                                       |          |
|---------------------------------------------------------------------------------------|----------|
| <b>PREFACE .....</b>                                                                  | <b>5</b> |
| <b>NATIONAL DIFFERENCES .....</b>                                                     | <b>7</b> |
| <b>FOREWORD .....</b>                                                                 | <b>9</b> |
| 1 Scope and object .....                                                              | 11       |
| 2 Normative references .....                                                          | 11       |
| 3 Sampling .....                                                                      | 12       |
| 4 Marking .....                                                                       | 12       |
| 5 Documentation .....                                                                 | 13       |
| 5.1 General .....                                                                     | 13       |
| 5.1DV Modification in accordance with the following additions and replacements: ..... | 16       |
| 6 Testing .....                                                                       | 17       |
| 6.1 Service use .....                                                                 | 17       |
| 6.2 Test sequence .....                                                               | 17       |
| 7 Pass criteria.....                                                                  | 21       |
| 7.1 General pass criteria.....                                                        | 21       |
| 7.2 Specific requirements for charge controllers .....                                | 21       |
| 7.3 Specific requirements for secondary batteries.....                                | 22       |
| 8 Major visual defects.....                                                           | 24       |
| 8DV Modification of item (b) by replacing it with the following: .....                | 25       |
| 9 Report.....                                                                         | 25       |
| 10 Modifications.....                                                                 | 25       |
| 11 Test procedures.....                                                               | 25       |
| 11.1 Visual inspection.....                                                           | 25       |
| 11.2 Functioning tests.....                                                           | 26       |
| 11.3 Specific performance tests for components.....                                   | 30       |
| 11.4 Insulation test .....                                                            | 33       |
| 11.5 Outdoor exposure test.....                                                       | 34       |
| 11.6 Protection against mechanical impacts (IK-code).....                             | 35       |
| 11.7 Protection against dust, water and foreign bodies (IP-code) .....                | 35       |
| 11.8 Shipping vibration test .....                                                    | 36       |
| 11.9 Shock test .....                                                                 | 36       |
| 11.10 UV test .....                                                                   | 37       |
| 11.11 Thermal cycling test.....                                                       | 38       |
| 11.12 Humidity-freeze test .....                                                      | 40       |
| 11.13 Damp heat test .....                                                            | 42       |
| 11.14 Robustness of terminals test.....                                               | 43       |
| 11.15 Damp heat, cyclic test .....                                                    | 45       |

**Annex A (informative) Switching thresholds for charge controllers using the battery voltage as the main parameter for the switching algorithm**
