

UL 778

STANDARD FOR SAFETY

Motor-Operated Water Pumps

UL Standard for Safety for Motor-Operated Water Pumps, UL 778

Sixth Edition, Dated July 7, 2016

Summary of Topics

This revision of ANSI/UL 778 dated June 29, 2021 includes the following changes in requirements:

- Addition of reference to UL 969A for cord tags; [54.6](#) – [54.14](#)***
- Editorial corrections; [40.1.2](#)***

Text that has been changed in any manner or impacted by UL's electronic publishing system is marked with a vertical line in the margin.

The revised requirements are substantially in accordance with Proposal(s) on this subject dated May 21, 2021.

All rights reserved. No part of this publication may be reproduced, stored in a retrieval system, or transmitted in any form by any means, electronic, mechanical photocopying, recording, or otherwise without prior permission of UL.

UL provides this Standard "as is" without warranty of any kind, either expressed or implied, including but not limited to, the implied warranties of merchantability or fitness for any purpose.

In no event will UL be liable for any special, incidental, consequential, indirect or similar damages, including loss of profits, lost savings, loss of data, or any other damages arising out of the use of or the inability to use this Standard, even if UL or an authorized UL representative has been advised of the possibility of such damage. In no event shall UL's liability for any damage ever exceed the price paid for this Standard, regardless of the form of the claim.

Users of the electronic versions of UL's Standards for Safety agree to defend, indemnify, and hold UL harmless from and against any loss, expense, liability, damage, claim, or judgment (including reasonable attorney's fees) resulting from any error or deviation introduced while purchaser is storing an electronic Standard on the purchaser's computer system.

UL 778

Standard for Motor-Operated Water Pumps

First Edition – October, 1980
Second Edition – October, 1991
Third Edition – April, 1996
Fourth Edition – December, 2002
Fifth Edition – February, 2010

Sixth Edition

July 7, 2016

This ANSI/UL Standard for Safety consists of the Sixth Edition including revisions through June 29, 2021.

The most recent designation of ANSI/UL 778 as an American National Standard (ANSI) occurred on June 29, 2021. ANSI approval for a standard does not include the Cover Page, Transmittal Pages, and Title Page.

The Department of Defense (DoD) has adopted UL 778 on March 11, 1991. The publication of revised pages or a new edition of this Standard will not invalidate the DoD adoption.

Comments or proposals for revisions on any part of the Standard may be submitted to UL at any time. Proposals should be submitted via a Proposal Request in UL's On-Line Collaborative Standards Development System (CSDS) at <https://csds.ul.com>.

UL's Standards for Safety are copyrighted by UL. Neither a printed nor electronic copy of a Standard should be altered in any way. All of UL's Standards and all copyrights, ownerships, and rights regarding those Standards shall remain the sole and exclusive property of UL.

CONTENTS

PART 1 – ALL SUBMERSIBLE AND NON-SUBMERSIBLE MOTOR-OPERATED PUMPS

INTRODUCTION

1	Scope	9
2	Units of Measurement	9
3	Undated References	9
4	Definitions	9
5	Instructions Provided With the Pump	12
6	Safety Critical Functions	12

CONSTRUCTION

7	General	13
8	Component Specifications	13
	8.1 Components	13
	8.2 Fuses	14
	8.3 Fuseholders	14
	8.4 Printed wiring boards	15
	8.5 Quick-connect wire connectors	15
	8.6 Terminal blocks	15
	8.7 Wire connectors	15
	8.8 Isolation devices	15
	8.9 Switch mode power supply insulation system – Triple-insulated magnet wire	16
9	Adhesives Used to Secure Parts	16
10	Electrical and Fire Enclosures	17
	10.1 General	17
	10.2 Enclosures of secondary circuits	21
11	Parts in Contact with Potable Water	21
12	Provision for Servicing	21
13	Mechanical Assembly	21
14	Protection Against Corrosion	22
15	Accessibility of Uninsulated Live Parts, Film-Coated Wire, and Moving Parts	25
16	Supply Connections	31
	16.1 General	31
	16.2 Terminal compartments	33
	16.3 Field wiring terminals and leads	36
	16.4 Identified terminals and leads	37
	16.5 Strain relief	37
	16.6 Bushings	37
	16.7 Contractor pumps	37
	16.8 Deep-well submersible pumps	38
	16.9 Sump pumps and portable pumps	38
	16.10 Cord-connected pumps	38
	16.11 Fountain pumps	40
	16.12 Elevator hoistway sump pumps	40
17	Current-Carrying or Live Parts	40
18	Insulating Material	40
19	Internal Wiring	41
	19.1 Mechanical protection	41
	19.2 Splices and connections	42
20	Spacings	42

20.1	At field-wiring terminals	42
20.2	In a motor.....	43
20.3	Spacings other than in a motor or at field-wiring terminals	43
21	Insulating Barriers	44
22	Clearance and Creepage Distances.....	45
23	Separation of Circuits	46
23.1	Separation between different internal wiring circuits (factory-installed conductors)	46
23.2	Separation between different field wiring circuits (field-installed conductors).....	46
23.3	Separation between field wiring circuits (field-installed conductors) and internal wiring circuits (factory-installed conductors)	47
23.4	Segregation methods.....	47
23.5	Separation methods.....	48
24	Grounding	48
24.1	General.....	48
24.2	Bonding	49
24.3	Grounding identification	51
24.4	Double insulation	51
25	Motors.....	52
25.1	Construction.....	52
25.2	Overload protection	53
26	Overload-Protective Devices	54
27	Capacitors	55
28	Switches and Controls	56
29	Line Voltage Submersible Pumps with Submersible Luminaires	57

PROTECTION AGAINST INJURY TO PERSONS

30	Sharp Edges	58
31	Materials.....	59
32	Stability	59
33	Polymeric Motor Supports.....	59
34	Parts Subject to Pressure.....	60
35	Pressure-Relief Devices	61
35A	Button or Coin Cell Batteries of Lithium Technologies	62

PERFORMANCE

36	Leakage Current Test	62
37	Leakage Current Test Following Humidity Conditioning	63
38	Starting Current Test.....	63
39	Input Test.....	63
40	Temperature Test	64
40.1	General.....	64
40.2	Maximum normal load.....	68
41	Dielectric Voltage-Withstand Test	69
41.1	General.....	69
41.2	Secondary circuits	70
42	Oil Dielectric Voltage-Withstand Test.....	71
43	Resistance to Moisture Test	71
44	Submersion Test	74
45	Flooding Test	74
46	Insulation Resistance Test	75
47	Test for Deterioration of Parts Subject to Flexing.....	75
48	Test for Reliability of Parts Not Subject to Flexing.....	76
49	Metallic Coating Thickness Test.....	79
50	Switches and Controls Test	80

51	Strain Relief Tests	82
52	Operation Test	82
53	Abnormal Operation Test	82
53.1	Dry operation.....	82
53.2	Burnout test.....	83
53.3	Component breakdown test.....	83
53.4	Low-voltage luminaire dry operation test.....	84
53.5	Transformer overload test.....	85
53.6	Switch mode power supply overload test	85
53.7	Secondary circuits tests	86
54	Permanence of Markings	88

MANUFACTURING AND PRODUCTION-LINE TESTS

55	Dielectric Voltage-Withstand Test	90
56	Grounding Continuity Test.....	91

RATINGS

57	Details.....	91
----	--------------	----

MARKINGS

58	Details	92
59	Cautionary	95

INSTRUCTION MANUAL

60	General	96
61	Installation and Operating Instructions	96
62	Grounding Instructions.....	97

PART 2 – PORTABLE FOUNTAIN PUMPS POWERED BY SEPARATE CLASS 2 SOURCES

CONSTRUCTION

63	General	98
64	Power Supply.....	98
65	Low-Voltage Luminaires.....	99

PERFORMANCE

66	Input.....	99
----	------------	----

RATING

67	General	99
----	---------------	----

MARKINGS

68	General	100
----	---------------	-----

MANUFACTURING AND PRODUCTION-LINE TESTS

69	General	100
----	---------------	-----

SUPPLEMENT SA – SUPPLEMENTAL REQUIREMENTS FOR PUMPS INTENDED FOR INSTALLATION IN ENVIRONMENTAL AIR HANDLING SPACES (Plenums)

SA1	Scope	101
SA2	Construction	101
SA3	Markings	101
SA4	Installation and Operating Instructions	101

SUPPLEMENT SB – UL 60335-1 BASED REQUIREMENTS FOR THE EVALUATION OF ELECTRONIC CIRCUITS**INTRODUCTION**

SB1	Scope	103
SB2	General	103
SB3	Glossary	103

CONSTRUCTION

SB4	Components	104
SB4.1	Capacitors	104
SB4.2	Isolation devices	104
SB4.3	Printed wiring boards	104
SB4.4	Temperature sensing, thermistor devices	105
SB4.5	Transformers	105
SB5	Identification of Safety Critical Circuit Functions	105
SB5.1	General	105
SB5.2	Protective electronic circuits	105
SB5.3	Operating circuits that mitigate a dangerous malfunction of the appliance	105
SB6	Evaluation of the Different Types of Electronic Circuits – All Types of Circuits	106
SB7	Circuits That Provide Safety Critical Functions	106

PERFORMANCE

SB8	General Conditions for the Tests	106
SB8.1	Details	106
SB8.2	Intentionally weak parts	107
SB8.3	Test results determined by overcurrent protection operation	107
SB9	Low-Power Circuits	108
SB9.1	Low-power circuit determination	108
SB10	Abnormal Operation and Fault Tests	108
SB11	Programmable Component Reduced Supply Voltage Test	110
SB12	Electromagnetic Compatibility (EMC) Requirements – Immunity	110

MANUFACTURING AND PRODUCTION LINE TESTS

SB13	General	111
------	---------------	-----

SUPPLEMENT SC – SECONDARY CIRCUITS EVALUATED TO NEC CLASS 2 DERIVED REQUIREMENTS

CONSTRUCTION

SC1	Secondary Circuits	113
SC1.1	Components.....	113
SC1.2	General.....	114
SC1.3	Evaluation of the different types of secondary circuits	116

PERFORMANCE

SC2	Component Breakdown Test.....	119
SC3	Secondary Circuits Tests.....	120
SC3.1	General.....	120
SC3.2	Limited energy secondary test	120
SC3.3	Limited voltage secondary test.....	120
SC3.4	Protective impedance test	121
SC3.5	Printed wiring board abnormal operation test.....	121
