STANDARD FOR SAFETY

Metal-Clad Cables

UL Standard for Safety for Metal-Clad Cables, UL 1569

Fifth Edition, Dated May 4, 2018

Summary of Topics

This is the new harmonized edition of UL 1569/NMX-J-726-ANCE for use in Mexico and the United States. The requirements of this Standard are in accordance with Article 330 of the National Electrical Code in the United States, and Article 330 of the Standard for Electrical Installations, NOM-001-SEDE in Mexico, and that the requirements do not cover medium voltage cables covered in UL 1072 or NMX-J-142/1-ANCE.

The new requirements are substantially in accordance with Proposal(s) on this subject dated August 11, 2017 and January 26, 2018.

All rights reserved. No part of this publication may be reproduced, stored in a retrieval system, or transmitted in any form by any means, electronic, mechanical photocopying, recording, or otherwise without prior permission of UL.

UL provides this Standard "as is" without warranty of any kind, either expressed or implied, including but not limited to, the implied warranties of merchantability or fitness for any purpose.

In no event will UL be liable for any special, incidental, consequential, indirect or similar damages, including loss of profits, lost savings, loss of data, or any other damages arising out of the use of or the inability to use this Standard, even if UL or an authorized UL representative has been advised of the possibility of such damage. In no event shall UL's liability for any damage ever exceed the price paid for this Standard, regardless of the form of the claim.

Users of the electronic versions of UL's Standards for Safety agree to defend, indemnify, and hold UL harmless from and against any loss, expense, liability, damage, claim, or judgment (including reasonable attorney's fees) resulting from any error or deviation introduced while purchaser is storing an electronic Standard on the purchaser's computer system.

Commitment for Amendments

This standard is issued jointly by the Association of Standardization and Certification (ANCE) and Underwriters Laboratories Inc. (UL). Comments or proposals for revisions on any part of the standard may be submitted to ANCE or UL at anytime. Revisions to this standard will be made only after processing according to the standards development procedures of ANCE and UL. ANCE will incorporate the same revisions into a new edition of the standard bearing the same date of issue as the UL pages.

UL's Standards for Safety are copyrighted by UL. Neither a printed nor electronic copy of a Standard should be altered in any way. All of UL's Standards and all copyrights, ownerships, and rights regarding those Standards shall remain the sole and exclusive property of UL.

This ANSI/UL Standard for Safety consists of the Fifth Edition. The most recent designation of ANSI/UL 1569 as an American National Standard (ANSI) occurred on May 4, 2018. ANSI approval for a standard does not include the Cover Page, Transmittal Pages, Title Page (front and back), or the Preface.

The Department of Defense (DoD) has adopted UL 1569 on July 23, 1983. The publication of revised pages or a new edition of this Standard will not invalidate the DoD adoption.

Comments or proposals for revisions on any part of the Standard may be submitted to UL at any time. Proposals should be submitted via a Proposal Request in UL's On-Line Collaborative Standards Development System (CSDS) at <https://csds.ul.com>.

CONTENTS

PREFACE	5
1 Scope	6
2 Definitions	6
3 General	7
3.1 Units of measure	7
3.2 Compliance	7
3.3 Materials	8
3.4 Reference publications	8
4 Construction	11
4.1 Conductors	11
4.2 Optical fiber members	15
4.3 Assembly	16
5 Performance	23
5.1 Continuity of conductors	23
5.2 Test of zinc coating on steel armor	23
5.3 Deformation test of thermoplastic and XL jackets	23
5.4 Test for tightness of armor on conductors	24
5.5 Flexibility test	24
5.6 Cold bend test	24
5.7 Cold impact (optional)	25
5.8 Dielectric voltage-withstand	25
5.9 Tension	25
5.10 Impact test	26
5.11 Crush resistance – all cable	27
5.12 Crush resistance – cable marked for direct burial	28
5.13 Fault-current test	29
5.14 Overload current tests	30
5.15 Cable flame test (overall jacket in place)	31
5.16 Vertical-tray flame tests on cables	34
5.17 Vertical-tray fire and smoke release test for jacketed cables with optional “ST1” marking	34
5.18 Sunlight-resistance test	35
5.19 Test for mechanical water absorption	35
5.20 Test for surface print on inner and overall jackets	35
6 Marking	35
6.1 Intervals	35
6.2 Re-identified cable core (US only)	36
6.3 Color of insulated grounding conductor	36
6.4 Identification of ungrounded circuit conductor(s)	36
6.5 Identification of grounded circuit conductor(s)	37
6.6 On or in the cable	37
6.7 On the tag, reel, or carton	39
6.8 Date of manufacture	42
6.9 Insulated equipment-grounding conductors	42
6.10 Isolated-grounding conductors	44
6.11 Copper-clad aluminum	45
6.12 Aluminum	45
6.13 Compact-stranded copper conductors	46
6.14 Responsibility for the insulated conductors	46

6.15 Dual marking	47
6.16 Installation instructions	47

Annex A (normative) Chemical composition of ACM, AA 8000 series aluminum alloy conductor materials

Annex B (normative) Copper-clad aluminum (US only)

Annex C (informative) Typical test samples and constructions that they represent

Annex D (normative) Water absorption test

D.1 General	67
D.2 Preparation of specimens	67
D.3 Procedure	68
D.4 Results and calculations	68

Annex E (normative) Alternative national markings

PREFACE

This is the harmonized ANCE and UL standard for Metal-Clad Cables. It is the first edition of NMX-J-726-ANCE, and the fifth edition of UL 1569. This edition of UL 1569 supersedes the previous edition published on November 13, 2014.

This harmonized standard was prepared by the Association of Standardization and Certification, (ANCE) and Underwriters Laboratories Inc. (UL). The efforts and support of the Technical Harmonization Subcommittee 20, Building Wire and Cable on the Harmonization of Electrotechnical Standards of the Nations of the Americas (CANENA), are gratefully acknowledged.

This standard is considered suitable for use for conformity assessment within the stated scope of the standard.

The present Mexican standard was developed by the CT 20, Electric Cables from the Comité de Normalización de la Asociación de Normalización y Certificación, A.C., CONANCE, with the collaboration of CANAME member manufacturers and users.

This standard will be submitted to the American National Standards Institute (ANSI) for publication as an American National Standard.

Application of Standard

Where reference is made to a specific number of samples to be tested, the specified number is to be considered a minimum quantity.

Note: Although the intended primary application of this standard is stated in its scope, it is important to note that it remains the responsibility of the users of the standard to judge its suitability for their particular purpose.

Level of Harmonization

This standard is published as an equivalent standard for ANCE and UL.
