## STANDARD FOR SAFETY

### Refrigerated Vending Machines

UL Standard for Safety for Refrigerated Vending Machines, UL 541

Ninth Edition, Dated April 21, 2016

### **Summary Of Topics**

***This revision to ANSI/UL 541 dated November 19, 2020 revises installation instructions for vending machines having flammable refrigerant; [SA6.2.3](#).***

Text that has been changed in any manner or impacted by UL's electronic publishing system is marked with a vertical line in the margin.

The revised requirements are substantially in accordance with Proposal(s) on this subject dated October 16, 2020.

All rights reserved. No part of this publication may be reproduced, stored in a retrieval system, or transmitted in any form by any means, electronic, mechanical photocopying, recording, or otherwise without prior permission of UL.

UL provides this Standard "as is" without warranty of any kind, either expressed or implied, including but not limited to, the implied warranties of merchantability or fitness for any purpose.

In no event will UL be liable for any special, incidental, consequential, indirect or similar damages, including loss of profits, lost savings, loss of data, or any other damages arising out of the use of or the inability to use this Standard, even if UL or an authorized UL representative has been advised of the possibility of such damage. In no event shall UL's liability for any damage ever exceed the price paid for this Standard, regardless of the form of the claim.

Users of the electronic versions of UL's Standards for Safety agree to defend, indemnify, and hold UL harmless from and against any loss, expense, liability, damage, claim, or judgment (including reasonable attorney's fees) resulting from any error or deviation introduced while purchaser is storing an electronic Standard on the purchaser's computer system.

### **Standard for Refrigerated Vending Machines**

First Edition – August, 1958  
Second Edition – February, 1970  
Third Edition – March, 1974  
Fourth Edition – July, 1979  
Fifth Edition – February, 1989  
Sixth Edition – July, 1995  
Seventh Edition – February, 2010  
Eighth Edition – December, 2011

#### **Ninth Edition**

**April 21, 2016**

This ANSI/UL Standard for Safety consists of the Ninth edition including revisions through November 19, 2020.

The most recent designation of ANSI/UL 541 as an American National Standard (ANSI) occurred on November 19, 2020. ANSI approval for a standard does not include the Cover Page, Transmittal Pages, and Title Page.

Comments or proposals for revisions on any part of the Standard may be submitted to UL at any time. Proposals should be submitted via a Proposal Request in UL's On-Line Collaborative Standards Development System (CSDS) at <https://csds.ul.com>.

UL's Standards for Safety are copyrighted by UL. Neither a printed nor electronic copy of a Standard should be altered in any way. All of UL's Standards and all copyrights, ownerships, and rights regarding those Standards shall remain the sole and exclusive property of UL.

|----|--------------------------------------------------------|----|
| 19 | Current-Carrying Parts .....                           | 43 |
| 20 | Insulating Material .....                              | 43 |
| 21 | Capacitors .....                                       | 44 |
| 22 | Control Circuit Conductor Overcurrent Protection ..... | 45 |
|    | 22.1 Glossary .....                                    | 45 |
|    | 22.2 Tapped high-voltage control circuits .....        | 45 |
| 23 | Short-Circuit Protection .....                         | 47 |
| 24 | Dispenser Mechanism .....                              | 47 |
| 25 | Coin or Credit Mechanism .....                         | 47 |
| 26 | Lighting Systems .....                                 | 47 |
|    | 26.1 General .....                                     | 47 |
|    | 26.2 Electric-discharge lighting systems .....         | 48 |
| 27 | Fuseholders .....                                      | 49 |
| 28 | Motors .....                                           | 49 |

|      |                                                                                                                                            |    |
|------|--------------------------------------------------------------------------------------------------------------------------------------------|----|
| 29   | Motor Overload Protection .....                                                                                                            | 52 |
| 29.1 | General.....                                                                                                                               | 52 |
| 29.2 | Protection of single-phase nonhermetic motors .....                                                                                        | 52 |
| 29.3 | Protection of single-phase hermetic refrigerant motor-compressors .....                                                                    | 53 |
| 29.4 | Protection of three-phase motors .....                                                                                                     | 53 |
| 29.5 | Protective electronic circuits .....                                                                                                       | 53 |
| 30   | Switches and Controllers .....                                                                                                             | 55 |
| 30.1 | General.....                                                                                                                               | 55 |
| 30.2 | Relays .....                                                                                                                               | 59 |
| 30.3 | Remotely operated venders.....                                                                                                             | 59 |
| 31   | Transformer Protection .....                                                                                                               | 60 |
| 31.1 | High-voltage transformers .....                                                                                                            | 60 |
| 31.2 | Overcurrent protective devices .....                                                                                                       | 61 |
| 32   | Valves and Solenoids .....                                                                                                                 | 62 |
| 33   | Batteries and Battery Chargers.....                                                                                                        | 62 |
| 34   | Circuit Breakers, Fusing Resistors and Supplementary Protectors .....                                                                      | 62 |
| 35   | Connectors .....                                                                                                                           | 62 |
| 36   | Electrical Cable, Conduit and Tubing .....                                                                                                 | 63 |
| 37   | Electrical Insulation Systems.....                                                                                                         | 63 |
| 38   | Electromagnetic Interference Filters.....                                                                                                  | 63 |
| 39   | Fuses .....                                                                                                                                | 63 |
| 40   | Heaters .....                                                                                                                              | 63 |
| 41   | Optical Isolators and Semiconductor Devices .....                                                                                          | 63 |
| 42   | Outlet Boxes .....                                                                                                                         | 64 |
| 43   | Power Supplies .....                                                                                                                       | 64 |
| 44   | Receptacles.....                                                                                                                           | 64 |
| 45   | Terminal Blocks.....                                                                                                                       | 64 |
| 46   | Wireways, Auxiliary Gutters and Associated Fittings .....                                                                                  | 65 |
| 47   | Solar Photovoltaic Systems.....                                                                                                            | 65 |
| 48   | Information Technology Equipment .....                                                                                                     | 66 |
| 49   | Across-The-Line Capacitors, Antenna-Coupling Components, Line-Bypass Components and Fixed Capacitors for Use in Electronic Equipment ..... | 66 |

## SPACINGS

|    |                                                              |    |
|----|--------------------------------------------------------------|----|
| 50 | High-Voltage Circuits .....                                  | 66 |
| 51 | Low-Voltage Circuits.....                                    | 68 |
| 52 | Alternate Spacings – Clearances and Creepage Distances ..... | 68 |

## CARBONATION SYSTEM

|    |               |    |
|----|---------------|----|
| 53 | General ..... | 69 |
|----|---------------|----|

## PRODUCT LINES

|    |                                          |    |
|----|------------------------------------------|----|
| 54 | General .....                            | 69 |
| 55 | Thermoelectric Refrigerated Venders..... | 69 |

## REFRIGERATION SYSTEM

|      |                                       |    |
|------|---------------------------------------|----|
| 56   | Refrigerant.....                      | 70 |
| 57   | Refrigerant-Containing Parts .....    | 70 |
| 57.1 | General.....                          | 70 |
| 57.2 | Refrigerant tubing and fittings ..... | 71 |
| 58   | Pressure Limiting Devices.....        | 72 |

|      |                                        |    |
|------|----------------------------------------|----|
| 59   | Pressure Relief .....                  | 72 |
| 59.1 | General.....                           | 72 |
| 59.2 | Relief valves.....                     | 73 |
| 59.3 | Fusible plugs or rupture members ..... | 73 |

## PERFORMANCE

|      |                                                                                  |     |
|------|----------------------------------------------------------------------------------|-----|
| 60   | General .....                                                                    | 74  |
| 60.1 | Test voltages .....                                                              | 74  |
| 60.2 | Temperature measurements.....                                                    | 74  |
| 60.3 | Pressure measurements .....                                                      | 75  |
| 61   | Leakage Current Test .....                                                       | 75  |
| 62   | Input Test.....                                                                  | 77  |
| 63   | Temperature and Pressure Tests .....                                             | 77  |
| 63.1 | General.....                                                                     | 77  |
| 63.2 | Automatic venders .....                                                          | 81  |
| 64   | Dielectric Voltage-Withstand Test .....                                          | 82  |
| 65   | Heating Test.....                                                                | 83  |
| 66   | Insulation Resistance Test .....                                                 | 83  |
| 67   | Rain Test .....                                                                  | 83  |
| 68   | Stability Test .....                                                             | 87  |
| 69   | Condenser Fan Motor Failure Test.....                                            | 88  |
| 70   | Antitheft Device Test.....                                                       | 88  |
| 71   | Water Failure Test .....                                                         | 88  |
| 72   | Start-To-Discharge Test .....                                                    | 89  |
| 73   | Rupture Member Test .....                                                        | 89  |
| 74   | Fusible Plug Test.....                                                           | 89  |
| 75   | Overload and Endurance Test – Switching Devices.....                             | 90  |
| 76   | Burnout Tests – Components .....                                                 | 91  |
| 76.1 | General.....                                                                     | 91  |
| 76.2 | Electrically operated valves .....                                               | 91  |
| 76.3 | Liquid-level system .....                                                        | 91  |
| 77   | Burnout Test – High-Voltage Transformers .....                                   | 92  |
| 78   | Abnormal Tests – Thermoelectric Refrigerated Venders .....                       | 92  |
| 78.1 | General.....                                                                     | 92  |
| 78.2 | Thermoelectric venders without cooling fans.....                                 | 93  |
| 78.3 | Thermoelectric venders with cooling fans .....                                   | 93  |
| 78.4 | Thermoelectric circuits powered by other than an extra-low-voltage circuit ..... | 93  |
| 78.5 | Dielectric-Voltage Withstand – 5000 Volt Test.....                               | 93  |
| 79   | Overload Test – High-Voltage Transformers .....                                  | 93  |
| 80   | Overvoltage and Undervoltage Tests .....                                         | 94  |
| 81   | Limited Short-Circuit Test .....                                                 | 94  |
| 81.1 | General.....                                                                     | 94  |
| 81.2 | Motor Overload Protective Devices .....                                          | 96  |
| 81.3 | Bonding conductors and connections .....                                         | 96  |
| 81.4 | Motor circuit conductors and connections .....                                   | 96  |
| 81A  | Switch Mode Power Supply Units – Overload Test .....                             | 97  |
| 82   | Protective Devices – Maximum Continuous Current Test.....                        | 97  |
| 83   | Strength Tests .....                                                             | 99  |
| 84   | Glass Strength Test .....                                                        | 101 |
| 84.1 | Impact test .....                                                                | 101 |
| 84.2 | Mechanical pressure test.....                                                    | 101 |
| 85   | Glass Component Strength Test.....                                               | 101 |
| 86   | Strain Relief Test .....                                                         | 101 |
| 87   | Push-Back Strain-Relief Test.....                                                | 102 |
| 88   | Wiring Endurance Test.....                                                       | 102 |

|    |                                                               |     |
|----|---------------------------------------------------------------|-----|
| 89 | Accelerated Aging Tests on Gaskets and Adhesives .....        | 103 |
| 90 | Metallic Coating Thickness Test .....                         | 104 |
| 91 | Label Adhesion Tests .....                                    | 105 |
|    | 91.1 General .....                                            | 105 |
|    | 91.2 Oven-aging test .....                                    | 106 |
|    | 91.3 Immersion test .....                                     | 106 |
|    | 91.4 Standard atmosphere test .....                           | 106 |
|    | 91.5 Unusual condition exposure test .....                    | 106 |
| 92 | Tests on Nonmetallic Materials .....                          | 106 |
| 93 | Fastener Strength Test .....                                  | 107 |
| 94 | Refrigerant Identification Tests .....                        | 108 |
|    | 94.1 General .....                                            | 108 |
|    | 94.2 Infrared analysis .....                                  | 108 |
|    | 94.3 Gas chromatography analysis .....                        | 108 |
| 95 | Protective Electronic Circuit Tests .....                     | 109 |
|    | 95.1 General .....                                            | 109 |
|    | 95.2 Fault conditions abnormal test .....                     | 109 |
|    | 95.3 Electromagnetic compatibility (EMC) tests .....          | 110 |
|    | 95.4 Programmable component reduced supply voltage test ..... | 111 |
|    | 95.5 Fuse-link test .....                                     | 112 |

## MANUFACTURING AND PRODUCTION TESTS

|      |                                          |     |
|------|------------------------------------------|-----|
| 96   | Pressure Tests .....                     | 112 |
| 97   | Production Fatigue Test .....            | 113 |
| 98   | Grounding Continuity Tests .....         | 113 |
| 99   | Dielectric Voltage-Withstand Tests ..... | 113 |
| 100  | Annual Refrigerant Identification .....  | 115 |
| 100A | Protective Electronic Circuit Test ..... | 116 |

## MARKING

|     |                                          |     |
|-----|------------------------------------------|-----|
| 101 | General .....                            | 116 |
| 102 | Protective Electronic Circuit Test ..... | 118 |
| 103 | Electrical Ratings .....                 | 118 |
| 104 | Coin and Credit Mechanism .....          | 124 |
| 105 | Accessories .....                        | 124 |
| 106 | Installation Instructions .....          | 125 |

## SUPPLEMENT SA – REQUIREMENTS FOR REFRIGERATED VENDERS EMPLOYING A FLAMMABLE REFRIGERANT IN THE REFRIGERATING SYSTEM

|     |                                                        |     |
|-----|--------------------------------------------------------|-----|
| SA1 | Scope .....                                            | 127 |
| SA2 | Definitions .....                                      | 127 |
| SA3 | General .....                                          | 127 |
| SA4 | Construction .....                                     | 128 |
|     | SA4.1 General .....                                    | 128 |
|     | SA4.2 Tubing and fittings .....                        | 128 |
| SA5 | Performance .....                                      | 129 |
|     | SA5.1 Leakage test .....                               | 129 |
