## STANDARD FOR SAFETY

**Power Ventilators** 

AUGUST 24, 2021 - UL705 tr1

UL Standard for Safety for Power Ventilators, UL 705

Seventh Edition, Dated July 19, 2017

#### **Summary of Topics**

This revision of ANSI/UL 705 dated August 24, 2021 includes the following:

- Updating the Standard to Include Additional Requirements for Ventilator for Heat and Smoke Control; Supplement <u>SD</u>
- Deletion of Reference to Withdrawn Standard, UL 508C; 14.3.6, 16.1.1
- Editorial Updates to Make DC Dielectric Voltage-Withstand Test Consistent with Other Standards; 23.5, 24.3, 26.1

Text that has been changed in any manner or impacted by UL's electronic publishing system is marked with a vertical line in the margin.

The new and revised requirements are substantially in accordance with Proposal(s) on this subject dated December 18, 2020, March 19, 2021 and June 21, 2021.

All rights reserved. No part of this publication may be reproduced, stored in a retrieval system, or transmitted in any form by any means, electronic, mechanical photocopying, recording, or otherwise without prior permission of UL.

UL provides this Standard "as is" without warranty of any kind, either expressed or implied, including but not limited to, the implied warranties of merchantability or fitness for any purpose.

In no event will UL be liable for any special, incidental, consequential, indirect or similar damages, including loss of profits, lost savings, loss of data, or any other damages arising out of the use of or the inability to use this Standard, even if UL or an authorized UL representative has been advised of the possibility of such damage. In no event shall UL's liability for any damage ever exceed the price paid for this Standard, regardless of the form of the claim.

Users of the electronic versions of UL's Standards for Safety agree to defend, indemnify, and hold UL harmless from and against any loss, expense, liability, damage, claim, or judgment (including reasonable attorney's fees) resulting from any error or deviation introduced while purchaser is storing an electronic Standard on the purchaser's computer system.

#### **UL 705**

#### Standard for Safety for Power Ventilators

The First through Third editions were titled Power Roof Ventilators.

First Edition – December, 1966 Second Edition – July, 1972 Third Edition – November, 1977 Fourth Edition – December, 1984 Fifth Edition – June, 1994 Sixth Edition – January, 2004

#### **Seventh Edition**

July 19, 2017

This ANSI/UL Standard for Safety consists of the Seventh Edition including revisions through August 24, 2021.

The most recent designation of ANSI/UL 705 as an American National Standard (ANSI) occurred on August 24, 2021. ANSI approval for a standard does not include the Cover Page, Transmittal Pages, and Title Page.

The Department of Defense (DoD) has adopted UL 705 on February 5, 1993. The publication of revised pages or a new edition of this Standard will not invalidate the DoD adoption.

Comments or proposals for revisions on any part of the Standard may be submitted to UL at any time. Proposals should be submitted via a Proposal Request in UL's On-Line Collaborative Standards Development System (CSDS) at https://csds.ul.com.

UL's Standards for Safety are copyrighted by UL. Neither a printed nor electronic copy of a Standard should be altered in any way. All of UL's Standards and all copyrights, ownerships, and rights regarding those Standards shall remain the sole and exclusive property of UL.

APPENDIX A Examples of Controls Performing as Operating or Protective Controls (Informative)

#### INTRODUCTION

#### 1 Scope

- 1.1 These requirements cover power ventilators of the roof-and wall-mounted types and duct fans of the straight-through type intended for commercial or industrial use, residential fans intended for heated and conditioned air and for connection to permanently installed wiring systems in accordance with the National Electrical Code, NFPA 70.
- 1.2 These requirements also cover dryer exhaust duct power ventilators (DEDPV) for single residential dryers.
- 1.2.1 These requirements cover roof or wall-mounted ventilators and duct fans of the straight-through type for restaurant exhaust appliances.
- 1.2.2 These requirements cover power ventilators for restaurant exhaust appliances.
- 1.3 These requirements do not cover the following:
  - a) Ventilating equipment such as attic, wall-insert, ceiling-insert, household hood, window fans, or canopy fans or blowers;
  - b) Air-moving equipment with integral air-tempering means;
  - c) Dryer type fans used for drying carpets or floors;
  - d) Household and commercial blower inflator type fans;
  - e) Evaporative coolers: Evaporative cooler pumps, including retrofit pumps:
  - f) Air filtering appliances;
  - g) Deodorizers and air fresheners;
  - h) Component fans;
  - i) Low voltage component fans;
  - j) Fans and blowers that circulate air, such as desk, ceiling-suspended, and hassock fans;
  - k) Ventilators rated more than 600 volts;
  - I) Ventilators employing universal motors rated more than 250 volts;
  - m) Air heaters equipped with fans;
  - n) Draft fans for furnaces;
  - o) Heating-ventilating units;
  - p) Blowers employed as components in equipment such as furnaces, mechanical-refrigeration equipment, or air conditioners;
  - q) Fusible links and similar equipment that may be provided to disconnect a fan or close shutters in the event of fire:
  - r) Ventilators specifically intended for use in exhausting any of the following: gases other than air, atmospheres causing corrosion to the ventilator, air with water spray, or flammable vapors; or
