

BULLETIN 360 JANUARY 1991

The logo consists of the letters "WRC" in a bold, sans-serif font, enclosed within a circular border. This circle is positioned at the end of a long horizontal barcode that spans the width of the page.

Welding Research Council
bulletin

STRESS INDICES, PRESSURE DESIGN, AND
STRESS INTENSIFICATION FACTORS FOR
LATERALS IN PIPING

E. C. Rodabaugh

ISSN 0043-2326

These Bulletins contain final Reports from projects sponsored by the Welding Research Council, important papers presented before engineering societies and other reports of current interest.

WRC - The Welding Research Council brings together science and engineering specialists in developing the solutions to problems in welding and pressure vessel technology. They exchange knowledge, share perspectives, and execute R and D activities. As needed, the Council organizes and manages cooperative programs.

MPC – A Council of the WRC, the Materials Properties Council is dedicated to providing industry with the best technology and the best data that can be obtained on the properties of materials to help meet today's most advanced concepts in design and service, life assessment, fitness-for-service, and reliability and safety.

PVRC – A Council of the WRC, the goal of the Pressure Vessel Research Council is to encourage, promote and conduct research in the field of pressure vessels and related pressure equipment technologies, including evaluation of materials, design, fabrication, inspection and testing.
